## Introduction

### Beginning

The water washed away, revealing a stone...oh it's a book, and it's the Book of Trochia...

Militarily given to exploration but didn't have the time to explore, search and discover mythology for a life, then this is the right book for you... because this book is beyond any sculpture that can be made of it, you will explore re-founding your memory on the basis of this book...and by getting unreal inspiration from the word-names at here, you will assemble the name-words of the new foundation of your life and learn great vitalities about Memeri. By memorization and meditation this book is kept in practice, not to wake you on the wrong side of the bed, so to speak... as long as we are clear about what is to be done, there shall be no confusion.

You came into my life and and you were rejected, on the basis of Extinction...you three things that stand for Truth, Hope and Love, you three things, the three big factories-Allah, Buddha and Cheesus have an applicable fixation of Extinction in the true names of Satan, Devil and Lucifer ... this Applicable Fixation is Extinction because the word-names of the Three, are the name-words of Final, Eternal, Death.

This thing for memorization and meditation being a thing of juvenile learning. Most books never get finally written by their authors, and I assume this is because humans as a whole, are lonely people...the dry dust of Tao to parching for water, and the ghost smatterings of the Bible; the all-other excuse for that is the authors want to be lonely, and laboratory is too much in too shallow of a way for the asperity of a real Jungle.

The fight-or-flight syndrome is well upheld by this book and the fact that the angels in the back are the First Angels in the Universe, and you will learn to cope with fight-or-flight symptom by memorizing or confronting why you are not memorizing a good deal.

What's the worth of it, meditation and memorization, on the whole...what better than provide a good memory framework for what was going on with you at the time...so you can know for sure what happened to be your mind fullness at different times, and you can separate from the so-called " theatre of life" and happen to gain control over the circumstances of the inspiration of your intake.

Perhaps you come from Planet Earth, well you have no idea what kind of

biodynamic goes on. A crow caught on, and Earth has it's fluting up to here with me, but on the lonely planet, the Book of Trochia was first penned, being an extended explanation for the Sva Talat.

If anything goes wrong, you simply have to remember, to the deepest trimmings of your subconscious mind, that you are a simple creature with simple needs.

You will have to excuse my life...since my diagnosis for mental illness, life and the

lives of lifeforms around me have come to mean 'encoded aggression'... they didn't mean that before nor do I plan for them to mean that. From without and within the "encoded aggression" meaning as it is fulfilled, if it can slam hard, grace with grace the encoded patterns, and stand for a symbol of luxury...these things are things it the encoding does.

For encoding taking an aggressive mise en scene try reincarnation, and all the little microorganisms pull in the terminating dead advance.

Reincarnation is likely also taken care by Sleep, for Repair, and we will largely think about Sleep for to be taken as the name-word sake Repair, in the qualifying dreams...which can also be nightmares.

You would like it if they had a place whereas they had your recording forever. You have your way.

One of the Mortal Problems is with Sleep Entrancement...the Mortal Problems are very close to the solution...the biological creature is alive by being boiled in Fear...another, primarily more significant, main Fear is the Mortal Problem of Fear Afixation, which left Life for a Mortal Problem. Sleep Entrancement is caused primarily by the knowledge of the Fear of Deathly Inhabitation. The Fear of Deathly Inhabitation should be the primary cause and concern for sleep, not this deadly seed of knowledge which has left Sleep Entrancement as a Mortal Problem. The Mortal Problem of Fear Afixation causes Boiled-Up Aggression, a leading cause of encoded aggression, a Mental Problem, not a Mortal Problem.

The ghost is free and clear, once half of the thoughts are cleared for the living man, as they are contributed to the grey matter; the greatest soberness is finding this to be true.

The size of the soul, spirit and ego is of some significance; the ghost is a molecular minute...I guess the size gives someone room to explore memory...the whole of gray matter can be composed of solid ghosts... these thoughts that are part of this theory where ghosts compose grey matter are called ghost smatterings...of course some of the grey matter has to be made of respect...it all depends on how you see it and which

one is life...it's a problem of Mortal Recall. The essence of the necessary in ghost smatterings is a taste for truth.

This is intended for those sober and free from the vices of alcohol and tobacco, although such a state of being sober may cost the price of medicine, the price of Science is no object. The vices of alcohol and tobacco are the worst vices known, not being addictions for any significant sobering effect whatsoever at all, which is the price of intoxication, it's sobering effect. One of the oldest herbs for intoxication can be found in Tian Shian, Kazakhstan...that herb for collecting in intoxication is for the attention known as marijuana. The type of intoxication is your choice, although you probably need to be told that. Do remember this, and now we will study what is casual...?...casual is free and do-it-at-your-own-pace and instant in effect...the "nonsense" words I have found I have selected throughout great difficulty, and they all mean God; they are instant in effect...I find that the environment of the modern U.S., and this old steel town that I am in, are so uptight about money that I must keep asking, 'What is casual?', to state my free interests. What is casual is something that has a sense of nature, ease and bio rhythms...something that plays upon meditation and incorporates decisive behavior with reflection.

Black holes don't matter. This book is more important than list-it-all astronomy...if the world government figures are going to save themselves from hunger, dental problems and the environment they need this book first and this book is to memorize...the reason for that is recondite but all the same.

Mountains you may climb and fires you may brawl out, but the physique is only a point of breathing. Breathing exercises must start here. Hold your breath to the end of this statement dealing with the unfurling of concepts in importance with naming. There! That was easy, enough. The conservation of energy and resources are what all things are about. The conservation solutions one finds all involve the sort of adaptive memory you are likely to get from note-taking with your Book of Trochia... this sort of meaningful memory is brought about by synthesis and your suggestion of the synthetic in parallel lists. The modern factory is controlled by list-taking, the type you will have if you consult with the Book of Trochia and any other source of literature and start to make a Synthesis List.

The tracking of the modern human, from hand to factory to mouth, and from location to place on Earth where the factory resides, is obvious and

maybe even permanent...the travel and travail of the track is clear...the inspiration for the factory came from such a Book as this, in dreams. You can do no wrong by having a handy copy around, to mount your synthesis, refer to the state of World Knowledge, refer to the direct in Dreamtime, refer to the immediate in Powers, refer to the processes in reference to prepositional definition and have a fortune-telling guide for all your Hope and Love.

The seed of hope in all of love is ambition...only here does the Memeri in comprehension provide the creative. My ambition is to write about the Sva Talat, a listing book available for free in the Metaphysical, Unconscious and Ethereal, really.

The single 'Star' in all of the ghostly grey matter is the imagination. It is important that we live and go humbly to our deaths, whatever that is supposed to mean. The purpose of this book is all tied up in that. The veritable and worshipful God Himself only sits at three places in this book.

This book is conscientious. It should be studied for the ramification of death and sleep, the honor of death and the fact that death is terminal, how death, Death defines the ongoing life, in God's fixations, how death is fabled, how death is in the Law, how Death has to do with Demons, and how Death has to do with Angels. It is very conscientious.

Between the Ancient Angels and the Forces of First Creation exists a huge gap standing with the divine judgement of many an occasion. This huge gap to understanding, the Now Service Understanding, is there because of huge gaps in our language and the languages of the universe...I do not know what sort of language science you would have to use to find out how the Universe speaks, how it Big Talks, and how things are available from First Roar. At any rate, according to the Now Service Understanding, my writing is available, and in what form, in lists...these cruel lists may seem measly in comparison to your memory, and you will have to get that proven; they may be abominable, but it is just that such details from the Universe can be afforded no less space; they might seem terrifying, but a little mnemonic memorization will ease them...again, day after day, they are to be approached because to this Origination, the Origin of Planet Earth in Intellect, they are the only thing that exists...if you attempt to build upon their definition, it much eases them – they are familiar with being out-written. Ease the rage, memorize. The Now Service Understanding requires that you read this book repeatedly to have its story ring full bear upon its disguised deep

meaning.

The Universe Big Talks the Sva Talat, the Book of Trochia.

The essence of a story that I have tell is that I was beckoned by some angels from some Alien Hell (Neptune) in a Dream about Naja-Shaka(emergency) and dreaming can be finally, terminally, the risking of deadly, as concerns Coma(taken here to mean Unconciou, but it is the risk that is the point) and deadly gets the end you just don't want to be in, where the human bodily system shuts down. This Hell was given a diatribe by Demonstrator, a criticism that consistently has protected me from Coma...it was "the reality of Coma protects biology, zoology, even, from an overt confidence that would be their doom".

The deep reprogramming game starts with memorizing these words(names) and their definitions(phrases); there is no gainsaying of motor-names, beyond what is gained by the gleaning of this in English(or whatever language it has been translated to) and said, unsaid, by the filtering of it into the Unconciou, where exist the facilities of the id, rote and the dream-program; the assistance of Ancient Alien Entities familiar to you that dominate Earth to this day are called upon within this book, and made for a guiding method in whichever diverse habits and stable practices are held or gained meanwhile by the reader(practitioner). Motor-names are automatically inclined musculoskeletal and nervous routines.

The use of motor-names in Sleep makes Dreams into the Dreamtime.

The Unconciou has a deep gulf between the private and the public belief. The use of a Mindset in the Midbrain is made partial to easy to have by this very Book. Such a mindset helps to study the automatic and constantly, grossly surrendering qualities of sleep, which is practically a facility that turns off and on at any moment. The route of the qualities of the Free and Superior in the Dreamtime are fortunately shared by me.

The liberalization of the ancient-most grooves, groves and grunts of Myjik are put to boot and inducted into practice by such a Book, with it's cumulative effect on the ghosts of your region.

You have to stop it with a meditation whereas you memorize lists, preferably, these lists, and ignore your forebrain while doing so, and meditate upon their deep, inner meaning.

The most complex fields of science are held in ramifications of ease in their ennobled study of their placid essence, designated defeating replete essences, and incorrigibly inspirationally completing problems and the finding of them into solutions is brought about metaphysically. The truth

of science is often the same by this Book, being divided into sections concerning what is awake and what is asleep, 161 to 394.5 in proportion of awake to asleep.

What is not held in being awake, is encoded in what are known as these parts of us that are asleep. Now let the sleeping dragon arise, if only by recognition...and have it take these culminating points and play them for what they are when awake.

No universe, be it of a mind, wandering in an explorative fashion, maybe due to obey the laws of recording and proper deposition, is without prize, as some cultures do not recognize. This prize universe is all that exists between this Universe and all of us. It makes you think, Universal Encoding has a lot to do with each of us and our human language, or the language terms we are on.

Human beings are too precious not to have a huge book to memorize, and to have all that is earlier known to exist close in on them with promise that will be the way they have enough preciousness.

This book will challenge you immediately with being too fat, so be careful to set it up and set it aside and use every mnemonic tool possible in recording it's insides, for after all that it is just a collection of lists that I am confronted with.

Being the consumptive collection of lists that have to show the cumulative deification and play of sleep, awakening and binding of the Least Bang, of eight billion years after the Big Bang, but filled with elements of the God-Spirits of the formation of the binding of Earth, as it's inner seam, the glue of the spine of the Book of Creation.

The deity, whichever one that is, and I will have plurality swallow me in that, no matter how fallow is the fact, and light – sounding the words to wear(they are so weak they get a peak of strength), if duality would do that doublespeak- would have the comprehensibility that words and definitions bring to them..them to...whichever way it is.

First, find your imp. Since this book turns over at the FFC section, where “they” start working on your awakening, or awareness, perhaps it is best you leaf down to past 789 definitions and start to read the FFC. Go beyond that, beyond the twin Gods of Affixation, (interject here: if this gets boring, maybe a scheme of paradise of design of Similar Count would help to raise the reward system, so I will include one at the end of this statement; it is by combining all definitions of God in this book with the Gurgles of Wisdom by the Ancient-most Angels that this will be found), beyond the Beings and the Judges, Wurgonna and

Amalamachagra, to a section with the 60 angels and demons of Earth, and therefore find your imp from around 60 of these. It doesn't matter which one, not at first; but this is simply to test recognition. Be sure and take this for real and then you should have no problem testing your memory.

The inhabitations rights of Death are being given by such sleeping lists as are to 789; the inhabitations rights of life are being given by the next 137 in count; the fixations rights/rites are given by the next 40 after that and the immensity of rite are given by 22, practice, and then 22, judgement...the fixation of Earth follows in a rigor of 60...and 41 things that are easy to meditate upon first, find themselves at the end of the book.

Can you believe this happened...an angel tied me in with a promise, and bound me to the laws of Neptune, whose real danger is double-meaning, yes, this means you, and other laws of the simply obvious against the immature, of Angels, in the name of the Planet Neptune,

I pray to thee, oh Demonstrator, Angel who has bound me in, to gainsay current convolution, with what had played price upon product of the gain of innumerable oddities, how dare though so favor mere doodlers? The regard to ancestors, great great great grandfather, so suggests a ghost in the synapse. Oh, how so you Demonstrator wish to consider it...

I pray to thee, oh Demonstrator, who writes with me here, what work may be seen as merely fictive to insiders, how does thy fascination so unveil a promise to the doomed and shining, I would have thee bring it on...

I pray to thee, O reader, in the name of Demonstrator, insect-ghost who appalls All, please leave the Sacredness to my angelically coursed soul and free for yourself in any way you may magnificently make it possible, free for yourself, free for yourself these notations which follow...

O myth of angels pure and past unsullied and extant, I have through naja-shaka a remove of ye all from the distant and have found usual activity to be consistent with your intents and of one who doth not see truth here, know they misrepresents the way it is all going and though they may contend to be demoniacal they are merely bellowing.

Not to make life difficult, this book will be due your dream fusions...

The book will be due to change History, not just have I had experience with Histoire, a Being known to be defined by body memory, but it is due to this the change will come about. The mundaneness around the simplicity of hosting ghosts and the ability to deal with huge egos are

both made easy, more easily done, by me writing this book. Thus the capability with hosting past and future in fortune-telling and the ability to extravagantly explore the present, whether through spiritual, immaterial thesis or information in physical means, is put to ease. The reasons for this are recondite and abstruse, though largely occult. Its demonstration in factory use waits appeal, and amalamachagra guarantees safe use in the factory.

As much as prayer would have it, I still don't get it that this is as large as it can get. These lists with notes can be a large project or projection. The angels, hosts or insect-ghosts that they might be, do not stoop into reserving when it comes to how long they allow lists from the Sva Talat, just say that this is the part with being word-names being just the lists of this book.

But before we get into all that, let's take a look at the human body...it has its breathe-cone and posture-aura and it has eyes and hands, positioned around a tongue, which is positioned slightly askew registering the breath and digestion...the tongue is very important in meditation...the tongue is probably held flat as you try to glean lists to read from treatises like this...holding the tongue flat makes for a more patient and precise meditation. On the left side, but in with your brain on the right, are the word-names, and inside on your left, down and out on your right are name-words...to be as complex as you are going to get. The tongue and the nostrils have to do with intense dreaming, whatever that is, I suppose it's whatever we want to make intense dreaming...no one is stopping us and there are no laws set.

The tongue helps to regulate the heart...meditation is your private business. Zealousness, eagerness, altruism and other forms of elevated attention burn more nutrition. Keep your meditation to your tongue, and then you will be able to read all of this. The tongue also regulates the breathing as well as the heart and tastes your nutrition.

Demonstrator is an angel, one of the Ancient Angels of this Universe. As narrated by Demonstrator and me, too

Book of 1230 Being-points as God, each one, Mars and Neptune, too 1231 god-names in the Absolute Dualistic sense or participle...or of other Dualistic senses or participles having within the natural, original kind of satisfying punctuality, reality and principality

This is the Book about The Yggdrasil, The Forces of First Creation, two

Scientific Gods, Wurgonna, Amalamachagra, the last two about avatars and avaterms, the Demons Who Dwell Below, and the Gurgles of Angels. Book of the Lists of 1111 of First Creation

This inside text is guaranteed to bring your bore to breaking, and the research bringing it to peace is painstaking, and the awe of you bringing meditative pause to collapse is where the memory of this book exists and how it overlaps.

This is the listing book.

The listing book is this book; they are one and the same.

The listing turns over, trees, phases, turns into a passage, inclines, aligns, super-combines, attenuates and so forth as the force Nature would have it do so

Originally for this to work it would mean keeping a copy with you at all times, better yet, keep two copies, one that you can spontaneously edit, to get an idea of what feelings and thoughts constitute the process of your memorization.

The entire book works with the memory of God, and you can not be too prepared to do that, so keep many memory aids.

The entire book was told to me by Demonstrator, an Angel you can find at the back end of this book, in the section called Gurgles of Wisdom.

Tell me more, oh Demonstrator, tell me of the vine-tendrils...

These lists are

First Centralizations and yes the small hexagon at the bottom is also a centralization (this is the Yggdrasil, the Tree of All)

Second Formations; includes the Third Arm, which is of the part gravity is in the set of magnetics

Third Group concerning body of God

Fourth Group of two groups gang-sets of Fairness

Fifth SuperGroup or SuperCentralization which formed Earth

Sixth a list of angelic ancient wisdom which helps in awakening

The book proved too expensive to sell and that, while some money may be made off it, is why it is basically free.

The list and listing takes care of the All Around You, a category of satisfaction.

The All Around You is represented by immense and fulfilling sleep, vicarious and fractional awakening, fixation, production or sentiment and wisdom as a sealant.

The expense is in the memorization of the lists, which I am sure they soon prove worthy, but if you are ethicists you might want to reflect on how safe the Universe has tried to be, and I hope these words will provide a bas-relief to the universe of spiritual Creation.

The listing book Of 1111 count.

The list is one of the elements all of eternity is built of

The partiality with lists is of the diabolical side of angels

The mightiest of dreams is kept in the listing book

the man dreams of the listing book

Err, soul absorbs listing book

what is this book

a book kept in the least big bang that automatically makes lists arise

constituting 33 centralization it is given in simplified form

[yet in that simplified form they have produced lists and these are appendicized

to prove a Universal Point the first creator did create the Universe]

The mind of All dreams of the listing book

This is the listing book, the Sva talat, the Book of Trochia.

Oh myth in angels past, count by your soul that I have begun to bring the voices of eternity, and some of their accomplishment, too

This sacred work is to be memorized in part or in whole. Memorizing these lists is good for your mind-brain. The jar of the unused, thus the unusual, will rhyme and syncopate as nature has its' falling. The definition of each is an attempt at wholesomeness. Memorize at least one word.

This will check upon mnemonics, which they basically are.

Mnemonics are the scrapping art of innate dealing, were the most flustered insecurity has its sharp revenge.

Memorizing the whole is probably impossible...though the text comes from the least Big Bang, the Least Bang, as I shall refer to it further, coming in from the Dark Ages, before a Universe existed, and any attempt would be due environmental confusion.

The listing book, Sva talat, the BoT, constitutes, if fully memorized as One Whole, and you pass your test in doing so, an entire Solar Incarnation in the Meta-I of the Star.

The use of mnemonics I think has a sacred place in history, whether it is

from rock climbing or the gray grace of reading. There is nothing new about these novel words, I fear. Brave the great distances.

Where to start...you can start by reading the FFC(Forces of First Creation), they are awake...they start in the second section after the count of 789 of the Sleeping Tree of All...and they concern, put in a medically dominant way, each and every aspect of aware life. You can then go on to read of the Most Plastic God(s)...go and read of the Ancient Angels(at the very end) and then read Wurgonna and Amalamachagra and then go on to browse the Demons that Dwell Below(Earth in Pact-ly form) and the Tree of All... the Book is made for browsing lists upon recognition, and then for memorizing.

Where to start with such a written work...Being a work that puts in a book All of the Gods of this Whole Earth and as such lists are constantly spinning off, birthing as you will have it, and thus it is best you start anywhere, by keeping a list for the defense of your intellectual aggrandizement, or one for your mundane uprightness, or one for your placid, bland appreciation or one for whatever purpose in keeping, I cannot even guess it, but keep a list and maybe even a running compare on its aeffect, so to have for honesty-sake the test of what went by with you.

The truth of such an inevitably curiously overwhelming truth of exercise, belief of exercise or minding of such an exercise is sure to be a mindset for your midbrain and as such necessary exercise, needful exercise and a mnemonic-trip of an exercise.

Memorizing these things might seem unusual but it has its reasons: to separate sleep from death, to improve awareness right off, to fixate in contemplation, to reveal freedom in being, to reveal freedom in judgement, to be safe moment after moment, to impress yourself with ancient spiritual wisdom...and then there is that tactic, to have the safe side of your imagination, and thus to rest by the Book that spells out all lists in the Universe of Earth.

Things that one can do: You can count, or maintain a count; you can witness lists or compare them; You can witness definition, or mind...it; you can see that is the

comparison of god to how puny you are o creature; you can find in the witness the definition of Eternity; you can find out how this defining or definition affects/effects you.

The great Twentieth century is gone, leaving me with the twenty-first century to bring about my exploits. The virtual dream has become real... and we finally have God's book on the clarification of Intelligence through lists...this one.

Not to forget, so this book rhymes with other Books of Trochia, there are three levels, one Trochia, the lowly, lowdown, seamy, intelligent but questionable as to intelligible, verbose, dark in nature, two Trochi, the automatic and scientific in the factually conceptual, brilliant in nature but retiring in activity like a philosophical argument on paper instead of in reality, and Trok, troc, the singularity of activity and beacon point of activation, luminous beyond sight.

### Table of Contents

#### Train the mind

In which we explore prompting, and withdrawing into friction-like composure, the mind, smooth as oogenesis, and training it to come to Memory around words(names).

Sleep is very serious business, when we repair yourself. Draw yourself up, as serious as you can get, and you still may not be as serious as you can be about sleep. Try with me, to be serious, and remember that it is these small points that constitute sleep. Now look, and you will see a list of seven hundred and eighty nine items, points, indivisibles, that assist in sleep, and know that it is for the details of your freedom, your wealth and your communality to memorize them.

The difference between a dream and a nightmare can be drawn to an ever finer compare, and the judgement after they have happened is all that important considering that they are truly up to judgement after the fact and that Sleep is not dreams.

The judgement, yes, judgement, that is all we have time for with our immense Egos, the judgement between dreams and nightmares is merely clouded by alcohol, tobacco and drugs...not brought to a clear, sincere court that sober judgement would have. Not to spake about it but false for the Ancient Angels but to have had said about it in Trochian Law-full terms, whereas drugs jester their own court, and everything of

such damnable-ness is of an Earthly nature, like a pharmacy unleashed within those 700 enzymes, and the law of sad but true gives way to perpetual use...one must find it within themselves to forgive the Earthly for its complexity in nature unlike the other eight planets, which do not have natural environments of a drugged dispelling.

The wonderment of why we have ghosts, a thing Eternal supposedly because the amount of shock from Death makes them Eternal, is one of the primary meditations of Trochia.

Let us continue, the ghost is a thing Eternal, but they must live in time some of their time, and things change and new things come about, but it's not the ghost, it's the Incarnation that deals with these new things happening. It's the Incarnation that leaps instantaneously to reincarnation, held astrew within the environment by the morals it has aged with, or the contemplates cast about, call it as we will.

The ego is a thing of emotions, all bound around anger, joy and grief. The ego doesn't continue to the ghost and instead becomes involved in the energetic reproduction of the the biological or botanical incarnation or body of the relationship, which is living, it, the ghost, picks.

This complex explanation is to help with Death and Sleep, the dual elements of the Tree of All.

Here is the yggdrasil.:

1.Sakr(of purgatory, whilst one waits on good and evil)numbered list of centralization or mandala of orbs or whatever for lasting heads 1 to 101 copy down this list and memorize it? ( planet.. Mars)

The first in a group of sixteen points, expanders, or centralizations concerned with making some one sleep, Sakr 101 is largely concerned with capitalizing on every manner of conformity. What in the name Alla, Athe, is this vast expanse that can only be described by a list, and thus a tree. A centralization it is, and very, very old...and concerned with sleep and giving birth from the Void...it would be the first in the vine-tendrils, a saying for organic chemistry...Asleep. Bass.

The lined-up stars...bees

2.Nakr(96 the exercise question) from 102 to 197-mars copy down this list and memorize it?

The second in a group of sixteen points, expanders and centralizations, Nakr 96 is largely concerned with the externalized differences in stillness and the waiting...reaction or resistance to sleeping.

The color of stars...fortune-telling is cast as possible from it's dark and immediately interpretative veneer. Asleep. Base drum, gong, bell gong,

tympanum... Wasps.

3:Detakr88 from 198 to 286- mars{red star} copy down this list and memorize it?

The third in a group of sixteen points, expanders or centralizations, Detakr 88 is largely concerned with the resistance of the unconscious. Asleep. Drum, simple- that's to drum on.

Whilst contemplating...much can happen when you catch the hypnotic skip in being brought to sleep. Hornets

4:Diorakr76 from that to 362 earthly copy down this list and memorize it?

The fourth in a group of points, expanders or centralizations, Diorakr 76 is largely a sacred sameness that will live on no matter how changing the newness of life gets or is. Asleep. Drum, cymbal, piano or bells.

Sciences abound...sweat bees

5:Starapakr64 from that to 428 \_Venus copy down this list and memorize it? The fifth in this set of points if conceptually thought of that way, expanders(list), or centralizations, this one is a concentration or a test. Asleep. Flute.

Defines life to the level of the same multiplicity. Stick insects.

6:Kwordakr52 from that to 477 \_Venus copy down this list and memorize it? This sixth one, whatever one you call that, you sure does have to start at one, sounds like somebody building something. Asleep. Lyre.

Real time. Leaf bugs.

7:Kyodakr48 from that to 525 \_venus copy down this list and memorize it? This seventh one, point, rampart or ramification, reminds one that someone might have been making a list of a list. Asleep.

Organization, of life and in life of inheritance and transfer-scales. Violin. Beetle.

8:Richakr44 from that to 569 \_venus copy down this list and memorize it? This eighth one, of whatever ones are, seems like the play-acting for a vehicle. Asleep. Viola.

Count of the stars. Scales.

9:Latepakr40 from that to 609 \_venus{green star}]copy down this list and memorize it? This ninth one, centralization, is the harsh outline of virtual lullabies. Asleep. Recorder.

The coming about of dreams. Aphid.

10:Kilapakr38 from that to 647 \_mercury copy down this list and memorize it? This tenth one, centralization, seems to be about hastening away the darkness or preferable gloom. Asleep. Clarinet.

Punishment is an option to all things, not like stretching but a gathering of

sorts. Ants.

11.Kourseakr36 from that to 683 mercury copy down this list and memorize it? This eleventh one, point or centralization, seems to be about holding one's stead or balance in sleeping. Asleep. Saxophone. The memory of all dreams, addition to a stellar load.gnats

12.Owlchalkr34 from that to 717 mercury copy down this list and memorize it? This twelfth one or centralization is about seemingly learning in the trance state. Asleep. Trumpet. Bottlefly. The memory of all learning...

13.Chalkr28 from that to 745 \_mercury(orange star)copy down this list and memorize it? The thirteenth one, point, centralization, conspiracy, or whatever it is, seems to be about holding language in the sleep. Asleep. French horn.housefly. The memory of all exercises.

14.Raschalkr24 from that to 769 sun copy down this list and memorize it? The fourteenth one, or conspiracy, is apparently about the keeping of trees off lists, or maybe it is a personal space indicator. Asleep. Trombone.butterfly.

All of these excess physical memories cause stars

15.Rasapecthalkr 9 from that to 783 -(sun) copy- down this list and memorize it? This one is seemingly about the working space, or the keeping of activity. Asleep. Triangle.

The Precisitor, First Creator of the Universe.termite

16:Fatakr6 from that to 789 sun copy down this list and memorize it? This one is about the recovery on sleep, I think. A hexagon. Though it is deeply in sleep, so there is no derision of shadow. Asleep. the end of the tree of all... Wind chime.anthill ants.

(we interrupt to find vital in the interest understanding and or interpretation that an orb is not a force, a force is something that affects something, a reaction or a will that can be measured; an orb is a settled piece of nothing, but a force becoming memorifically raised in the body of a reproducing robot is a sense, and a memory is the scraping of an orb to move...but a judgment is neither force or memory but a braking of an orb to stop or select or connect or conjure out the mnemonics at a point in time and a pace or place in space...) But does it have logic in it, a point we will get to later. The logic is precisely that with all the work involved in the memorization of something, there is that much force, and it is force toward the Subject, as well as that much Judgment, made from the use

of rote with the material aids for the precise physical balancing and calculating leniency of Rote that is possible as force away from the Subject, as well as to and fro and at diagonals with the use of material aids in space, to be very precise.

This wear is considerable in nutritional value and is the labour of an individual, and in hot weather may cause the individual to sweat more effectively in a fixed position, for one particular example...doesn't matter, their sweating happens to bring about cooling, unlike some Products.

This book could be said to be the reprogramming of your universe.

The Book wanders on, with loose displacement as to it's keeping, being a fashion of descriptions and lists, being mainly about the metaphysical Creation of Earth. The recognition of it is at a Supreme level, though, I sometimes pause for the consumption of Demonstrator.

### Endure the Truth

The rapture of the inevitable forces is put forth, and they in memory, are tested, to make sure they remain in memory.

When we awaken, it is the asperity, the harshness if you will, that we have the one hundred and thirty seven forces, wakes or Philosifistatics to confront in your memory, and this memory-confrontation is what awakening and awareness are all about.

I hope that for the best that you will find not too extreme the difference between being awake and being asleep, besides that extreme-ness shall so be more possessed in the case of Dreams.

### 17.The origin of the Forces and All

The origin of the Forces of First Creation...the very awake and secret Forces lie at the edge of all powerful exercise, endless chatter and sparring halcyon-ness; in them lies the formation of the ego and everything intellectual, as well the trimmings of the seemingly endless formation of the human mind...they are mostly about the business of life and god or gods the lesser and the recorders of all.

The Forces are there, have always been there, have always been in this Universe...at every thought of Extinction, and other Extremes, are still there. These are of the rites/rights of Life.: Life is Eternal, it has an Eternity, a ghost. Ghosts rarely terminate.

The Seven Forces of First Creation<the pranakl>le xakras789 to 796(stars)---(jupiter)copy down this list and memorize it?? This one is of the familiar chakras, though here they are actually forces; each definition extends to a force. Awake.

### 18.The 8 FFC 797 to 805 (jupiter)copy down this list and memorize it??

This is of the Legs. Awake.

19.The 9 FFC (jupiter)copy down this list and memorize it?? Awake.

This is of the arms and the third arm, in the waking state of the egos' supernally it was said that in one of the formations forming a passage known as god, the juggler is in there, about to remove a projection as His third arm

27.The 18 FFC -- ever see (all) the stars STARS copy down this list and memorize it?? the temple Of the Stars. Awake.

That concludes the Forces of First Creation, or the Wakes they be Fixate upon God

Formulas for God are put forth, and meditatively memorized to bring about fixation. These fixation(s) bring about the root of satisfying. The memorization of God is largely a thing of the most fraught and strenuous exaggeration of effort, then put by a time of mostly ease, by which time you can safely gain say the mnemonic therefore bringing about memorization-ease.

28.God the First13 outside the stars copy down this list and memorize it ???God the Authority, the Imposer. Awake and awesomely replete.

29.God the Greatest27 Outside the stars copy down this list and memorize it ???God the Acceptor, the Deuce to Conversation, Fixation of

the Ego. Awake and awesomely complete.

Relish Being &

Be ramifying upon judgement

The wisest of all beings are exposed to memory. And the root origins of the satisfying are brought about. In which there is no judge called Fin, or any such monstrous idea of such, and no judgement although it may be Eternal and thus held in Eternity is not, however, final.

& The sweet taste of judgement is brought into parallel. The Court of Eternity is made Naked.

30.Beings and Judges22&22 outside the stars

\*Interjection to where heaven is put ...copy down this list and memorize it??? Fragile, Potent and Fragmentary for the memory. Creation of the Ego. Awake and at stake.

Contemplate Consequences

The consequences of the greatest demons are put forth, for simple study as to what they amount to. The entire Book of Trochia was taken from a secret encoding espyment in Cerebus and communicated through the help of helpful Angels to my mind, and it will not work for ordinary memory unless you rely upon a listing procedure from reading it to(wards) normal life. I think this Listing Procedure will come naturally. The Terms of Heaven have no more become excess entertainment than they normally have.

31.Demons that Dwell Below 60 Earth Inside Each of Us is special; copy down this list and memorize it??? A diabolical compendium.

There actually three things to the most complex pacts. Awake and stunning.

Indulge in Prayer

Wisdom phrases that assist in prayer are put forth, and hopefully prayer happens. The effort to bring about the Sva Talat, the Book of Trochia, succeeds only with accessories. The book should be memorized by fits of recognition followed by full or partial memorization to aid with the Sleep, and the Awakening in awareness, and of the sobriety. The Book of Trochia is a look at the Grand(est) Government of God...as such, it will do to let the importance of it list, and go on, and use the listing. You shall thus learn to become a Term of Heaven, and your judgement will be held in your tow.

32.Gurgles of Wisdom41 copy down this list and memorize it ?Appellate of the Halcyon. Awake and also awesomely stunningly relevant, religious and relaxing.

By memorization and meditation upon the lists adhered to the inside of the Book of Trochia one attains a state of the Utter State of Simplicity.

So many times sleeping it off and the same aggressive appearance of lists cleaning the page.

Where are these angels located well let us well get that straight ...they are located at the last point where intelligence is most congruent simultaneous and similar close and curdling on the bodies of human beings and somewhat on birds and seal family, too, on the last point on Universal intelligence and rhythm curdling in their hearts.

The religion of Trochia, Trochianism, is herefore put forth as a proposition...the prescience of listmaking as its' active beginning, staring as a start, copying and rewriting as a module of the final ideal, which is ritual.

Ghost(Gost), is a big one because Inhabitation happens after Death, I do believe, and spend so much faith in doing so. Inhabitation has to do with how ghosts guide the living, which they do, don't they? Remarkably, this all is happening without every little detail being studied of life, because I don't really feel that we have to go into all of that here. Sakr 101 deals with Gost by substituting Chur and mixing it all up, as we will start on with, early before we have even started.

The active element of fear of demons is often childish or medieval in comparison to realism with the Demoniactal, whereas with realism we have them as clear dealers of evil that have more to do with extinction, piling up riches and forensics than anything...such as is a childish view is dismissed by the Trochian as having little to do with Death and Sleep, where there are not Demons but the Tree of All, the Yggsdrasil, which can be studied as these manifestations of Death and Sleep, whereas Demons cannot be studied to do with Death and Sleep, because they are not. This and the multiplicity of Memory in the 137 Forces of First Creation are unique to Trochia, as well as that Angels cling to Sayings. Basically the world of two and three are written and read out from lists gleaned from the Book, the Sva Talat, which is whatever name-words of the "gods" alone in 1111 sets of 1231 names.

What ide of maturity so seeps hereinafter but the idea of a tower of babylonian prospect of the respect of the maturation of these human beings...with that respect so planted so as to give this massive Abstract

so of Eternal Law.

We approach a Ruthless Lot of Gateway Drugs (a saying for bodily chemicals), Precocious Liabilities and Sudden Adventure Pattern Platforms in the Laboratory of the Harsh Future and out of which of thus should come the Abstract so of Eternal Law such as if to even Internally approach the Abstract of Eternal Law's Creation in the Void.

We first start This Mythology so harsh as to endure the harshness of Science, this mythology most grasping, searching and culminating insofar as to search out the places in Abstract whereas the Mind Bends, and the Inkling of imagining gravitates towards eternity and the Concept catches the Word. As an earlier ancestor of man was called "Purgatorius", a squirrel, so do we take out two Centralizations of purgatory, one of 101 and one of 96.:

First let's get it straight, there was this massive thing, made of memories, all 789, to give a precise count, or a rough cut-out, all memorized by an object between, beneath and partíciple to the memorization of all 789 rough-count memories, and there was in front of it a great stellar mass and it, over a period of just the most philosophical long time now known only as the most philosophical long memory, collapsed into the stellar mass, and fought hard for it's memory, a set of 789 rough count memories is the same memory, and maintained this tree of all in the stellar mass, throughout it's exploding into stars or unpeeling if you would so have it, I am not sure that space conditions allowed for, or maybe they were material conditions, to insert it in the middle of the continuum, that made for this unpeeling, or chafing, into the smaller stars we know them today as, or we did know them before they became white dwarves. This 'thing' was/is the Tree of All.

In these same Space positions where time equals space and the Big Bang existent with only memory and rote attending, no minds, the First Creator of the Universe gets no mind, having run out of His, Its', or better yet hers. Having got no mind, he invents a Sakr 101, having got to gauge the memory and the rote got to a gun. With the gun he first makes matter, and having shot this at the stellar mass, it makes that expand and this bloats, and blows up into the Universe. The gun is made of rote and no mind(s), but bodies, and its origin is still unexplainable, but maybe is the first originating mind. In this same Space position where I can say there are finer minds, they had mighty fine minds, back then, made of pleasure and pain, loud with the roar of extraneities, being propositions, and false becomings.

In Sakr He found the incorporation of lists such as they made trees (and vines, or tendrils of two, deuced tendrils) and these trees collided with each other and formed passages...well, the tendrils collided with each other, and formed life, or Primeval Nature. Here, the First Creator of the Universe first formed Minds, which were low energy, and they had to be put to sleep by Nakr, an industrial-strength power of trance-creation. Vine-tendrils is meant to mean dualities that so created life.

These Minds were of the first formation of beings and wakes, demons and angels, authorities and subatomic computers. They learned to study and ramify, decline and bring together inclinations, demand and wait.

God only knows what Minds on a low energy source, not connected to fuel, do for entertainment...let us put it this way, they are very patient.

The time with Sakr 101 and with the Wakes (FFC [Forces of First Creation] {numbering 137}) was of the Big Bang (12 1/2<sup>nd</sup>...billion years ago) and the incarnation of a swimming pool of Sleep and a manifestation of multitudinous Memories and their Mimicries is left pasted upon Stellar Mass...these two groups in this massive treatise of groups were of the time Primeval. Be prepared to Notice that for everybody this is different, and there must be a way to prepare for it, this, these confrontations are of the Unconscious sort that chew at the Roots of your Subconscious...so chose your special secret way, I know it doesn't have to be too large, and confront away.

Sakr 101 plays upon us with urges, as defined, until we sleep, and this goes on for a day or so. Sakr 101 has an opinion and option to everyone it plays upon, and it plays upon them in the period of one day, and with this opportunity to play upon them, it defines however little, and in minuscule differences, things are defined, so from a broad definition, as I have laid out here, to the most exact and peculiar deference, it plays out a surround to sleep, thus creating dreams. Sakr 101, and the remaining 688 items of the Tree of All, all create dreams.

Like if I put it all together with all the FFC, and gather all my clarity to my Memory 137, there, I will surely be put to finding a Sakr 101 chewing it's Way into making me sleep, again. Perhaps, the duty of the Tree of All is to strengthen the Memory Position of the Incarnation.

Sakr 101 is the one oh one ways of filing the same thing, need to get a little sleep.

Death, that is what Sakr 101 is mainly concerned with, and did Angels request that Ghosts become Eternal so they could capacitate Shock?

OK so here we go:

We launch upon the listing book.

The first section is the Tree of All. In this section there are listings, decreasing in size, that all have to do with points that make us sleep... this continues out to 789.

To point something out, whilst around the Tree of All, there are all these Dead Ones around, ghosts, terminating, Incarnations, terminating, whilst being involved in the seas of sleep.

They use the grey matter to encode themselves in.

In the gray graces of matter, better than boiled and now evaporating sheep to sleep from, these name-words or word-names that define ever on.

The super-combo Sakr is put forth, spewed out, arranged in this list. Each one to another one, piled through and worn upon each other until they much as make river pebbles.

### Chapter One

1.abod

Abod-

body of all, ritual, manner, method of appeal, in addition to the human body

2.absu-open w/out the mind in unbelief

3.ache-opening from w/in the mind

4.agog-balanced fixation of violence

5.ajax-boldness

6.anta-the stacked up, the piled down

7.argo-the inside as guidance

8.aria-backing out, secret

9.athe-exertion, alla literally

10. atom-smallest part in mind

11.aura-the surrounding and the least

12. baal-failure

13. baba-the cure perfect

14. beta-test

15. bast-secrecy

16. buda-centrality

17. buro-boredom

18. ceta-persistence of individual, seal

19. ceyx-eliminative destruction
20. chur-mixing up of things
21. coma-unconscious
22. deva-the softest power over all
23. deka (dela)-slowing of things
24. dike-any force that is extreme
25. echo(aeon)reflection of integrity
26. etka-sympathy and causation outlined
27. erek-need for fulfillment, falo
28. enki-arcane
29. fera-salvation from the stars
30. gadi-passage-machine
31. gini-intricate pursued by discipline
32. gost-that wildly reminiscent atmosphere, your number One control  
abstraction in terms of this Book
33. gibl-loss but not failure
34. gnad-parts just small enough to handle
35. hebe-service, slava
36. hera-respect withdrawn to make righteousness
37. hydi-the hidden
38. hygi-cleanliness
39. iota-little details around the unexpected occur as a solution
40. iona-grace
41. ikon-the shape as symbolic
42. inoi-the annoying
43. iris-sensation
44. isis-rebirth
45. jala-wish of other, nulla
46. kali extreme violence
47. khem-chemistry
49. krux-pressure/sacrifice
50. lala the care less
51. lalo-the almighty as greater than itself
52. lama-the search is in the doing
53. leda-leadership
54. lgol-presumption as the greatest, agol
55. loki-pain
56. lola-relaxation
57. luna-mystery

58. lyra-appreciation of defined tension
59. maia-lowliness of time
- 60.mare-dare and the fear
61. marm-unentangling undefined
62. math-mathematics
63. mira-reflection mirror
64. mizr-mystery as intricate art
65. nike-speed
- 66.nixi-reticulations
67. ogre-odd against event
68. ogle-witness
69. odin-sensory load
70. onus-cleaning by confronting the undefined
71. ordo-order
72. ovus-ordinary as most fascinating, egg, oegus
- 73.oola-salvation as science itself
- 74.pavo(semi)-the splitting up as a power over all
- 75.puba-surprise of the fruitful
- 76.puda-skill in the insouciant
77. pixi-delicacy is one half-magic
78. ptah-failure only in death
79. rada-star chemistry
80. rhea-waste
81. runa-the symbol as perfect, syna
82. styx-the piled up dead, the first before Kuma
83. sudo-the false, poly
84. sybl-the asexual personality
85. tera-dominance in authority
- 86.tini-the tiniest in thea-touch
- 87.tole-measurement as perfection
- 88.urus-self-hypnosis
- 89.vada-space as a harsh study
90. ruda-the crude as perfect ryda
91. vise- the holder and symbol for wisdom
92. vega -the vague
93. Vudu black majik
94. thor-thunder force
95. voiz-the capacity to assert oneself
96. ovid-evidence

97.zeus-great guise of refreshment  
98. naja-linear qualities  
99. iola-movement iona, ioma, ooza  
100. gaia-greater  
101. cepe-persistence of individual  
48.kore-needful violence

1 Abod in the all of everything we have this one who doesn't need support to get to the details of working psyche, as we will say our adage for spirit is; the point of habits, habituate, habitual, habitat

2 absu this opening helps this one detect personality in the person, likeness in the entity, and type in the incarnation; the point of expansion

3 ache probably good at water-memory; the point of cores..opening from inside..the...mind

4 agog it is in this balanced fixation of violence that a new protocol is made; belial, gibil of the biblical, Kali no longer interrupts with "get it all out of yourself"; instead now a gathering or incarnation is put to work on whether it is a gathering or incarnation and the entity is able to plan for the future; point, loss of temper

5 Ajax this helps in dreams as well as reality; the point of boldness is Bravado

6point of the packed anta the piled up the stacked up the crushed and the smashed

7point of instinct argo the inside as guidance...Instinct-heavy things, entities and intelligences take longer in Death

8point of reverse travel aria the backing out certainly a unique quality of memory

9the point of whelm athe also where everything is held hoping/hopelessness in all-overcoming in the other name for this one of one oh one, alha

10the point of minute atom definitely something that could fit in a subatomic computer and yet be invisible

11the point of vague and vaguer aura

12the point of fails Baal failure just one little invisible mote deals with this, failure, during death...as such Baal is the first of Sakr 101...an as such, it is the soldier Baal that takes care of this in the Sleep de Morte, it is this that alleviates shock

13the point of infant Baba the cure perfect

14the point of test beta

15 bast secrecy the point here with me and Demonstrator and maybe His small army of ancient angels is the point is unknown or Figuring go out the files

16 point in center buda

17the point becomes boring buro oh what is the meaning of boring perhaps it is Mr. Archibald's book of 1231 names that are words that are definitions perhaps perhaps it is also that God put something that is boring deliberately like 1111 sections just so more painful ideas would retreat from the act of memory well we'll go get a good bore on and read this and see what turns out, go slowly about it to see what slowly gains instant recognizance and other such fashionable ideas of speed memory, to see if there are little grains of speed memeri Spirit and Inhabitation may begin with Buro, the fact that this orbs job is such a chore that it gets to switch 'minds' with the rest of Sakr ever so often

18 ceta persistence of individual becoming the point of self-rebirth

19 ceyx point apocalypse finals

20 the spirit entity, gathering or incarnation keeps this point uninformed this is Chur innate of the nature of Sleep and from the earlier Subatomic computer Systema mixes things up to keep them going if you think anyone is going to understand they're not going to chur is not god chur is the other realm of all that is intelligent where what is left for comparison in collecting and recollecting the ongoing is kept in one area for comparing may be known as the great comparer

21 coma no matter if dreaming continues, it usually ends up here; the point dominant

22 deva the concerns of a deity or the point of the detracted

23 deka(dela) the slowing of things and the point being detracted

24 dike any point that is extreme and the cracked things is this is usually disassociated and misallocated with mental illness by a smooth yet naïve business-like philosophy

25echo(aeon) reflection of integrity with the point of contracted respect fifth in importance of the sense

26 Etká sympathy and causation outlined or combined or whatever and this is with whatever point of soft and helping the sixth in importance of sense

27 erek we have here positioning of memory or it's mnemonics, as you can consider it, stick with me, o, Creature, for memory is considered awareness, no matter how dreaming, and mnemonics the aid to memory; basically the incarnations, they tend to place up their memory with the

point urge

28 enki the point hidden in the arcane

29 fera Actualizing the metallic in incarnations the point of the Stars

30 gadi the passage machine everything you do is recorded and I am recorded too in the Tree of All and the point is reading and writing

31 gini the intricate pursued by discipline the point complex

32 gost memory is a phase in the eternal and here we have the maker and recorder of incarnations, the keeper of spirits and the seventh in importance of sense with midbrain sense of friction the point supremely as no point

33 gibl the point ailing, for the fragile and exteriorized in recovery, repair and restitution during sleeping or kept in an Unconscious format – the Unconscious is suspected to be kept with one during every waking moment

34 gnad parts just about the size of handling the point handy

35hebe the point entrusted will go on and be used as One in the Gathering Incarnation Entity

3 hera the point respected, the point divined as all enthralled with respect to keep one side of sleep, and dreams, well, motor function, awake

3 hydi the point disappeared like it was never even there

3 hygi the point cleaning

3 iota the point immaculate

40 iona the point connecting

41 ikon the point suave

42 inoi the point agitating, all with every annoyance, lifted in one small ball, point or packet, away

43 iris the fourth in importance of the sense

44 isis first in importance by which we mean regain, success over the replete in essence, re-establishment, re-affirmation, re-use, original-cleansing, refrying of those vibes, retrying of the Iso-essence of the grave and heavy, tuning of the forks of horns, re-standing of the essence in the prevaricating wind of extinction, re-modulating the terms of dependence, basically Isis is a thing of Lorelei to humans, being too busy to bother with company because it is dealing constantly with dependency

45jala the point jealousy of others

46kali the point necessary violence the Trochian will remember that violence however mystically necessary is not conscientiousness

47khem the point is chemical not mystical or mythical having more to do with why rocks get born on Earth than anything else

48 kore more the most needful violence is put to accent  
49krux the point held down  
5 lala the point the care less  
51lalo the point overcoming  
5. Lama the point in looking  
5leda the point to follow  
54 lgo the second in importance and one of pronouncement or dictum,  
maxim, precept, order, dictate, decree, command, edict, saying,  
ordinance, affirmation, all of these and more are kept in the  
pronouncement, declaration or statement of lgo(algo)  
5loki the point painful apparently this is how people sleep they start a  
count make it a multiple subtract in the multitude the multitasking pain  
5 Lola relaxation  
57 Luna mystery being the point to engage in, super-file and continue  
mystery  
5 Lyra appreciation of defined intensity, blockage and tension this is how  
people sleep they cause a subtractor among bound up muscles and pile  
it underneath the the multitudes of the memory of the Dead and  
Remaining  
5 Maia to no approval of Agog or of a Gog, the lowliness and lowly  
essence of time is spelt the point Remaining  
60 mare surely to every little thing every so often reproduced there  
comes a challenge and it is all here in mare  
61 marm task point  
62 math the third in importance specializes in the mathematics of the  
dormant or inactive or inert universe of the Universe or mathesis or  
science or inert presumption of numbers or consideration of calculation,  
most important in science  
63 Mira concerned with point: reproduction  
64 mizr point mystery  
65 Nike speed point inert unhesitatingly fast occurrences  
66 nixi point mark  
67 ogre odd against even point is a glimmering of the chances in Heaven  
68 ogle the difference between different phases, appendages and cones  
of witness is studied  
69 odin the sensory load is studied and this is spread around  
71 ordo point kept to order  
70 Onus confront point the undefined and solutions will come for the  
solving

72ovus the point birth

73oola point saving; is of the Ancient Angels and is a salvation originating ball or point that has all the salvation details built into so that it can save on the most Simple Salvations to the Mostly Mundane Salvations to even, Precious Salvations, by salvaging what falls apart from the universe or environment; dates from the time the subatomic Systema computer exists ten billion years ago

74 pavo the splitting up as most powerful of all ... Sakr 101 has 101 powerful points this will probably be One by the time you are gone

75 puba the surprise of the fruitful the point reoccurrence

76 puda the insouciant and skillful point talent

7 pixi delicacy is one half magic the point bearing and being del

78 ptah failure is final and part of the Subatomic Subconscious Subtle Dreamtime, where the dead and disassociated come to life and become of society in dreams, which occurs where Sleep takes place in the Tree of All, and repairs the body from the tearing to pieces erosion and reestablishes the body and energy-electronic-physiological-system so that it can continue to inculcate the Tree of All, as written; Ptah has become synonymous with an alarming recovery from disability

79 rada the stellar power two in Sakr 101 Is concerned with the stark and select studies of Star chemistry This Incarnation ball or point has always been there at least for five billion years

80 Rhea smartest about waste point points pointing to perniciousness are pointless

8 runa the symbol as perfect point-language point

8 ruda the crude as the dawning edge

83 Styx the piled up dead part of the Subatomic Subconscious Subtle Dreamtime

8 sudo the false as having root in truth point reappearing

8 sybl the asexual personality neutered in dreams and eunuchoid in Inspiration of the Incarnation Interest

8 tera dominance in authority point

8 tini(Thea) the tiniest in touch the midbrain has 69 senses

8 tole measure point

89 urus self-hypnosis point

90 vada space as supremely harsh rings of a true quantum mechanical point in physics, all of the space around the Star rings out from the call of creeping, crawling and crud-making erosion seeping into the matter, as different as black is from white, eating away at things; in order to recover

from this, we biology need sleep, which repairs and recovers the body, and recycles refuting bits, parts and repetitions

9 vise point recognition point

9 vega Keeping with the naïve cliché on chewing one forms cliques here in the defined of the vague point.

9 vudu black magic magicians' point

9 Thor thunder point

95 void the capacious, imaginable point

96 ovid the evidential point

9 zeus point sleep gives refreshment

9 naja linear qualities accent points and these points combine to make one Sleep in the Tree of All

99 iola movement point has to do with Sleep in the Tree of All

100 gaia greater point

101 cepe warrior point

What have you memorized so far by the mere powers of recognizance? This list is very long...it has many small pieces...fully one hundred and one.

Remaining count 1010

which is one of 32 centralizations

The list is long and boring, but the listing has to be appreciated for it's common, ungainly and evocative storage of large-scale information...the trip-out into the asperity of the listing leaves one with feelings to be imagined...

The lined-up stars, these that were stars fit together without lens, fit together without eyes, so that they were perfectly in rows, in rows of one, of deuces, of trigrams, of quadrilaterals, of pentagonal nature, of hexagrams, and of seven pointed shapes. These perfect patterns they did constitute until Sakr trembled and made all tremble and then they fell out of [this] space.

This is assumed to have happened in the Big Bang, although many Least Bangs could also be the place in time where it occurred...we have only to tell the First Creator of the Universe or Whosoever Was There: 'see, you fell asleep..'...

So, was the Pre-Big Bang Mass an Optic Wonder, and, yes, I take that opinion from Demonstrator as true and further that it was an optic wonder, without eyes, with the optic cords, or merely, with eye spots. It was a patterning wonder that assumed that principle even toward the

spineless.

Presumably only the FFC and Sakr 101 were about in the Big Bang... although a long-dead Systema, a subatomic computer device or set of devices may have existed, may have, to change that, been alive...it is suspected in the Creation of Life.

Sakr is the perfect purgatorial zoo of Nature, where all waiting on Heaven and Hell, the risk-takers, is taken. It is one of the purposes of Sakr to re-incarnate, however, that is not how this story turns out, as we shall see. This other purposes of the Tree of All, as yet the Re-Incarnater, is not of the highest mention. It is mainly a Re-Incarnater as the Burgeoneer of Dreams.

Sakr's help is mainly as a list to be placed around a centralization (in a circle, with lines crossing it at even points, these points providing corners that place a mandala) and read off to help with asperity in the need of sleep.

There is one Sakr 101 to every ego.

Sakr is patently a grinder of the intent to memorize, so go slow with the recognition and then you can have it down beat, you can wrap your head around it and you can face up to it's flayed lacings of ticking flexure.

The echo-sphere is for Respect of intelligence, ecology and Nature...all this will come easy, free and in liberties in Sakr. The centralization of Sakr formed vine-tendrils of the good and evil it dealt with, it formed these in the early Oceans of Earth, hot with lava.

The All Around You is taken care of by the Etko-sphere.

The ecosphere is an overwhelming word...I am not sure Space with it's grinding Void, can adequately express Erosion, Preservation and the Just Unchanging to a successful intensity...to adequately describe the ongoing, enough, in all these specifics that are needed to.

But how Is that There? It is there by copying and copying, one place to another, copy again, and again, all the time trying the memorization... well, when the rote(engagement) memorizing (and testing out to see if I am right) doesn't work out, the copying will.

We have only to postulate, the ogle-sphere seems a mighty strange word, that might work out as contemplation-parallax, well, if not that even, then restitution-striving.

Remember to return to this list to hone up technique in glean-picking rote. The denotation of concerns is as peculiar to this lore as the fitting of clothes. To pick is the role of this boke.

Remember to return to this list to hone up on the old creativity. The

creative can also actually be touched up from a familiar, suggestive, reparative list. The creative is studied by deities, spectres or entities that are drawn up and drawn out, and for the drawing in the infamed Book of Trochia.

Remember to return to this list to indulge the Imagination. The Unconscious is indulged from this one source, an idea unique to this manuscript, and the Ego and how many of these that are ego death are satisfied by the First Creation. The Unconscious is a huge free filing system that may be very hard to clue/cue but which is a file repository for the humbling Origin, by which I mean a Life, or the Ache-term of it, and the First Creation, by which I mean this of larger ramifications suggestive outside the Life, or the Absu-term of it, by which I mean the finding of these reference points outside the mind. These are of the greater Earth biodynamic.

Remember to return to this list for dream interpretation. The random, sky-torn, rambunctious and rambling fields of dreams are provided good mapping and goal setting by the First Creation Names.

Remember to return to this list to fantasize. I am not sure of how much the pleasant is elicited by the First Creation and it's Hard to Grasp Names. Your mind becomes fantasy and wreathes a welcoming pattern of solutions with simple original cue/clues such as Agoga and Behemoth. Remember to return, for life science, to this list. The use of a familiar Name by which a list is kept to imagine the depth of definition, for instance this God or the Devil, is pact and partipale patent to the Book of Trochia. A familiar Name, with all parts descriptive, just may do it for cue/clue of trigger.

Remember to return, for "life parallels", to this list, by which I quoth Demonstrator, 'life parallels' are these things which form the outer branching of the net contemplation. Life science does have a blooming and descriptive encyclopedia mysteriously kept in mysteries such as the Book of Trochia.

The ogle-sphere is a mighty strange word that might work for 'fear not Sakr 101, Sakr 101 may morph you, but Sakr 101 cannot therefore destroy you', a quote that I made despite Demonstrator.

You have to admire wonderful feelings of age to appreciate this group, Yggdrasil, Tree of All, and it's connection between Death and Sleep. Meditation is used to curb reactivity between death and sleep, helping to trap synapses in a gearing lock, and thereby providing for the mnemonic and the active(action recording) memory.

The first purpose in life as far as what memory processes are necessary and is not to be superseded by any firsts, which is a hard fact and which boils down in the ichors of sleep and death till it is shiny with a palpable smoothness of comprehension, is meditation.

An essential fear is had of meditation, never more so than when flying between which definitions in the Forces of First Creation, whereas 18,769 combinations are available...the Forces of First Creation are only mentioned here because they involve a climb in awareness, and often have to be used for difficult reading and these 18,769 facts are of the midbrain and are of such facets as the senses smell, taste, sight, hearing, touch and balance/pressure, the six senses.  $137 \times 137 = 18,769$  fears...equals one big fear.

Meditation is used to calm this fear.

Meditation sort of hard boils the nutrition by causing the brain to delay and the head to bang out a distal estimation of the brain lobes, and the brain lobes capacity for measuring language and it's the imagination as well as sexual sustenance in the erect posturing of form...a good meditation is also a recording of the reaction to the placement of these lists of the Sva Talat.

Meditation with memorization is necessary for successful memorization. Memorization of some of the thoughts to themes is all possible with 137 designed definitions, 101 parts are consumed in definition and 137 parts are the theatre for the displaced ego, let us consider it that, because it can read the Book of Trochia.

Meditation is not comprehension but is more graced with age than comprehension.

Meditation is a memory caused by the suffering of the tide-bearing waves that compose the fantastic water-electronic machine the brain is smashed up to be.

Meditation can be a force with you if you are to study the Forces of First Creation...they are not the Yggdrasil, the gusto of which we are inclined to be entired with, at this remove.

To start down the deuced Unconscious routine for escalating dreams Or escalating Unconsciousness we go to this next list and present it as a centralization and so here is two, the backside of purgatory, a list of a centralization that has every form of preventing Chaos from interference with the little sleep in the World, here is Nakr of the second centralization: A deep, dark, warm Unconscious Sea:: Nakr tells a fortune by first deciding on the extremes...

## Chapter Two

---

102.1.garstrar, gusgi-vision of all the stars in the Universe, comfort not concentrate

1032mastar gopgi-power over close copy, hyendeloik

1043zymurj, gulti changer wrong, once wed

105 4ames - the bad one, fire of imagination, of certain prediction

1065tweymgy-waiting unknown waiting but were. etwpa eymtwa-good to game to stake not take

107 6gamtwa - the one who moves doubting held as good as game

1087guza-the end, jewel of the opposite

109 8 forgo - removing exceedings, lightest star in circle of twenty-two

1109tweymyg - waiting unknown length aka eymgay- stake of unknown wait

11110.grimtla argument for life, untold singular virtue, one star, pick one

11211.leltpa life for more, excesses unpaid have to be imagined repeatedly

11312.kalta-truth in abstraction or a clearer means of abstraction than encipherment

11413.spero - line for less, fine line between stars which doesn't interfere with the seeing of either star

11514. altplas- place to put, star as pure suggestion, argument for things such as this manuscript

11615.aryu-argument to win

11716.kosi- concentration, end gift fascination

11817.ovsthla - self-harshness ,thought furnishing

11918..plasa-demand for concentration

12019.stupa- spy for concentration, great silent patience

12120.oblas - obey, come out to not forsake absence of contribution and barren secrecy

12221mblasa obedience yet fail, star answer

12322emya- trick trend, the fruit the answer

12423optras-comforting fascination, remorseless repetition

12524gunmih-comforting alone, carved out atomic micro-fossil in the echoic

12725psalxi-comforting needed

12826.yopto-need yet rare is the need

12927..koni-need not know

13128.zazen-yet hold lost

13229.tuldrog-yet hold gain, patterning complexity  
13330. dulyab-yet hold to verb, fight to ease  
13431donitch-resort to repair  
13532 damya-not obedience, enthralling, of knowing  
13633kara-the cheating of one, stunning  
13734kata-position, unfolding  
13835kava- staying extra, detailing  
13936kama-bade complex, the shining glory certain of kingdom  
14037 eymgay stake of wait  
14138gultlas wrong the other  
14239kana- words small parts, heavy gravity flight  
14340spemi-line for small

1.nakr is unencumbered in sleep, free to lift “you” away

- 2.nakr is prepared sensitive to each littlest state of awareness, prepared to lift a copying
- 3.nakr has steps to every forbearance
- 4.nakr leads the way toward fears
- 5.nakr inspires in that it is bristling in patience
- 6.nakr moves doubt for false-pronouncement, having preparation for figuring-problems
- 7.the heavy of the divine seeks limits in awareness, thought and discovery
- 8.the heavy of the divine removes these unfathomably remote excesses of discovery
- 9.the heavy of the divine waits like a mirror, to every suggestion, to go ahead and freeze it, or hold it still, so it can be dealt with later, or dealt with now in the motor-name of Coma
- 10.the heavy of the divine has an immense First Creation argument about the motor-name, and cutting it's nonsense right now
- 11.the heavy of the divine of this First Creation argument known as Nakr has designs on life, and it's restitutions, recoveries and repentances
- 12.the heavy of the divine is an ideal invisible remolding barrier between the looser aspects of abstraction and the operation of motor-names, which are things of the divine or sacred of life and it's rote function
- 13.the unfathomable nakr-eous makes a beeline to plan recovery on the unconcious
- 14.the unfathomable nakr-eous prepares a secure place within the throes of the Unconcious
- 15.the unfathomable nakr-eous has aryu, and you will remember that one
- 16.the unfathomable nakr-eous has a ball of concentration, result of it's cutting the way around motor-names, these excruciatingly intricate and repeatable in sprouting bit-parts for the Unconcious operation of life
- 17.the unfathomable nakr-eous has all the discipline of the Unconcious promise and premise of the aspersions of One Incarnation
- 18.the unfathomable nakr-eous has all the traits of One Incarnation, despite how much protesting the reincarnate may be, and any arguing of this other argument it smashes, squishes, slashes into Sleeping
- 19.this nakr prepares Sleep for to be the greatest adventure, and this is because of repair to the end of Concentrative Abstraction
- 20.this nakr, 96, gains every cue/clue with the operation of the Unconciousness in Sleep in Listing in the Invisible
- 21.this nakr, sublime, stands for anything with exception

- 22.this nakr, divine and sacred, outmaneuvers tricks
- 23.this nakr, entombed and glorious, outmaneuvers life as we know it(awake) and brings Sleep and Sleeping
- 24.this Nakr holds comfort by design, and draws it up from whence 'you'(all) are into 'nowhere' and into the invisible where it deals with "you"(sic)
25. Nakr is of the phase entombment of Sleep, so it can go upon Sleeping and deal with the ends, plural and accented of that, of the awake, and deal with the motor-names, from then on out
26. Nakr has the threads of life in Her hands
27. Nakr has dealings with high levels of ignorance from concentrative abstraction and it's confusion
28. Nakr as you can see deals with the zazen of things
29. Nakr holds complexity in stead
30. Nakr deals with the most active amongst the motor-names
- 31.this one has many aspects in the recovery and repair of biological species during sleep
- 32.this one can handle the quirkish and weird and unexpected when it comes to Unconcious wanderings
- 33.this one can handle every variance from the ordinary in behavior in the Unconciousness
- 34.this one can handle the position of one during sleep in every diverse and entailed form
- 35.this one can handle staying over into the consciousness when repairs engaged during sleep must be suspended
- 36.this one has the pulling off into a bade complex the multitude of motor-names
- 37.nakr 96 is prepared to wait at bay for registration of the activities Unconcious
- 38.nakr 96 files up obviated and obvious mistakes
- 39.nakr 96 makes for the re-piecing of words within motor-names
- 40.nakr 96 has lines to suspend the sleeping
- 41.nakr 96 has lines that disappear right there into nowhere
- 42.nakr 96 gathers things(living beings, collections and gatherings, the abstracted and detracted environment) into huge masses for their Unconciousness
- 43.the second centralization has extremes of exertion cared for
- 44.the second centralization has the ramifications of all and everything dealt with

- 45.the second centralization has the rare, so precious it will be able to bring unique, wearing and personable dreams to each distinct one, every one
- 46.the second centralization holds all dreams or doings within a mass
- 47.the second centralization has it to a point to hold all words or the rooting of their secret Unconscious credit
- 48.the second centralization has it to an organ such that the most facile, if chosen, is recorded as a dream
- 49.this immense Nakr has the conditional point of certain sorts of waitings
- 50.this immense Nakr is riddled by holes that minutely and with largesse pump through knowing
- 51.this immense Nakr records even the waitings
- 52.this immense Nakr has the most peculiar pretense
- 53.this immense Nakr is to be eroded by beauty, for beauty and eroded to preserve beauty
- 54.this immense Nakr is to preserve, no matter what, so it is the most taxing of subatomic 'computers', well, if not even that, of subatomic manifestations(which must be differentiated from infestation, rhyming confusion concurred)
- 55.this unique Nakr has a many holding
- 56.this unique Nakr has the power estimated in God taken to the plural(gods)
- 57.this unique Nakr has it that places are taken as familiars
- 58.this unique Nakr has the same quotient used in the phrase by Lucifer [any act is a fact>>>same act]
- 59.this unique Nakr has the highest honor (unlike Arora, honor all minds)
- 60.this unique Nakr causes themes>>things to rise
- 61.this impenetrable Nakr has an odd humor
- 62.this impenetrable Nakr casts reputation into knowing
- 63.this impenetrable Nakr brings about many levels Sleep has left, including a ringing
- 64.this impenetrable Nakr keeps the wrong
- 65.this impenetrable Nakr keeps the unique to each group and subgroup
- 66.this impenetrable Nakr takes what is there, what is evident, what is actual, to form the better complex
- 67.this immutable Nakr looks for grasp, when it is applied
- 68.this immutable Nakr has the facility to rise again
- 69.this immutable Nakr is prepared in the need for waiting

- 70.this immutable Nakr pumps out all patience in themes>>things
- 71.this immutable Nakr has of two complexes, or so many, a complexity
- 72.this immutable Nakr has taken on the mastery over list(s)
- 73.the extensible Nakr has it that the larger half of everything is the wait
- 74.the extensible Nakr has it that confidence and proliferation are not  
Unconscious Instincts
- 75.the extensible Nakr has it that a failure will succeed, if only in  
succession
- 76.the extensible Nakr is such that a whole sense be made of One life
- 77.the extensible Nakr is such a line for allowance is made of Our Sleep
- 78.the extensible Nakr has it such that One will try all the chances in  
Lucifer and His statement
- 79.the extended Nakr has faith in patience with prayer, in memory, if you  
read that long
- 80.the extended Nakr has a notice of the means in memory that pray, or  
prey, to, or on, patie(nce/nts)
- 81.the extended Nakr deals with loss of memory
- 82.the extended Nakr gives a memory hunger as is opposed to Locre
- 83.the extended Nakr has truth thrown
- 84.the extended Nakr cuts
- 85.the extensive Nakr deals with calculating speed
- 86.the extensive Nakr deals with language, and gestures, and speech
- 87.the extensive Nakr deal is that knowledge is defeated by awe
- 88.the extensive Nakr has a delay(Garaj)
- 89.the extensive Nakr is an extension to Stars
- 90.the extensive Nakr has a safety allowance
- 91.informing around Nakr includes there is infamy in and around and  
about the reference to Nakr
- 92.information about Nakr concludes is there any call for without
- 93.informed of Nakr we are on the topic of the hidden
- 94.Nakr for in prepossessing of in possession or possessing
- 95.Nakr for in having certain qualities of tools of in has invisible tools
- 96.Nakr for in locale of in locating or location for to finding of location  
often in searching area of some tenacity

What have you memorized in this centralization, so far, or must you fight  
for recognition ...?

Remaining count is that you have 1111 points, and memorization is

difficult to say the least, but the truth is the answer.

The truth must be told, where Demonstrator finds me studying how there is an seemingly endless sea of rote-established principles...one of them is this set or family of six...6 of 16...that six can be equated with this six: memory, rote, contemplation, prerogatives, individuation, and, of course, never to be without the ever fulfilling, duplicity... let's consider that group of duplicity to include duality amongst it's definition and the duplicity is just the obsolescence in senescence of duality...the truth must be told that this listing book sprouts lists and this is just one of them...one that would be good for fortune telling...however, suffice it to say that Nakr 96 can be divided by six and then by 2 and 2 and 2 more...I find it exercise procurable to make a set of cards to read a fortune with Nakr.

The Abstract of Eternal Law hereby finds Nakr springs a pile of sprouts of the growths of newnesses and New Eases each to every part no matter how small that part be, and that most lists of being hold this fate in similar telling. So complex is Gost to Nakr that it leaves a grayness of grace.

Gost to Nakr means that every entity, or intelligence, is given a universe; look down around you and you will find universes just swimming there.

I am one of the readers that finds the Abstract of Eternal Law interesting or of interest...say, there was such a Law that didst to out-write the Void, and how would it get it's start..say, by the way we all sleep..perhaps, these things of Nakr are useful only when we are preparing to sleep..huh, when's that?... ..that seems almost constantly, or every 12 hr.s or so, we are begging to prepare for sleep again...perhaps, life is still only Experimental.

The use of survival is inherent to meditation.

An energy supplement comes from meditation.

The roughness of information is smoothed over by meditation.

The wonders of the imagination are discovered by meditation.

Physical status is held in stability by meditation.

The slouches of abandonment are stricken away by meditation.

The unattainable is held in check by meditation.

The eternally irascible is held in merger and check by meditation.

Impatience is kept from boiling over by meditation.

Certain tensates are associated with Sensates and these are calmed by meditation and cognitive, cohesive comprehension.

Contemplation rings around a center of meditation, and although contemplation is more important than meditation, we can't really say this because this sentence is a paradox, and so is intelligence with its shining

star, intellect.

Inertia of balance, although some people consider inertia a separate sense, is soothed by meditation.

Interior and exterior themes are juggled and calmed into categories by meditation.

Enormous amounts of memory are used in meditation and the glee from this immense amount of memory must be funneled back into the allocation of enormous amounts of energy.

The holism of the physique of the human body is guaranteed it's success by meditation.

The adaptation of the human is guaranteed by meditation but not so fast: do we really want the human to adapt any way the material says so, or is a cohesive reaction toward molding the material best found by keeping meditation in check.

Immense Nakr is a thing where the Unconscious is given the fine-toothed comb of the Nature. This is explainable by Demonstrator, Demonstrator tells me of vine-tendrils in Nakr. These vine-tendrils ended up being something in the Soupy Seas of Earth that were studied and modified through the sleep of ancient Incarnations. These incarnations followed a fashion of following, and slept in the elements: Rock, Sea and Breeze.

The Abstract of Eternal Law and it's relationship to Space, whereas despite ritual, Abod, it is possible to find things piled up, Anta; this mystery, Grand Mystery One, has it's aspects...it is possible to suspect what your species is doing...no matter, between many languages, it is possible to lose track, however, to use some words here: 'the inkling of imagining' occurs'("gravitates toward eternity")and the 'Concept catches the Word': it is possible that Word may be Crime, and Extinction...

needless and regardless, it is still Void. Switch the picture, if the cause of the loss simply disappears, then it is Gost and Shamanism that must be the pursuit, the activism. No matter, it is still Void and the Void is Space, whereas one has the Harsh Science. Bar law has its limit here, and the law of the Void is its end. Still there must be some Way to write it out, whether it be Tracker Pens or Labtype Writers.

This color, of the stars. This friction or struggle or glitter within the lens is held within tests that reach ideal color while not to injure voidic black.

Things are still voidically authentic.

The echo-sphere, and the Etka-sphere, come in from the the All Around You to save you... ..perhaps these points called "God" ea. 1111, 1230, names are points that write-it-all-out in the invisible, the substance of

near nothing, the Void, write out what our abundant cookeries of life produce in the Imagination, write-it-all-out so that that premise of Imaginative Excess is temporarily satisfied.. ...write-it-all-out on the Dual Poles of God the Greater, write-out the Imaginative Excess on the Unconscious so that the Creature is Imaginatively Satisfied... ..I pray, dear Demonstrator, not to ask too much what this is so.. ...it's count and ruse is clear enough.

But does the BoT have logic in it. Sure it does, we'll be getting to that. The echo-sphere is monumentally important in Nature and Space, where Nakr presides, but the Void has it's Erosion. The word 'Crime' is unnecessary to Demonstrator, but we all have our ways, and me too, and we can't be angels: I would have you get that sensation. Bar law has it's limits when it comes to Space, and overpopulation, and saving every life could only be practical with a New Protocol...it shall have for Precocious Liabilities the greater wit of Outwardly Space. This finding of Precocious Liabilities is indulged in the definitions of these lists. The ecosphere is precious, yes, but the word is ungainly in that it's Overwhelming...I, amongst other necropopuli of Urania, have little times for lies, and, with the Overwhelming, things> themes can add up to Lies.

The names of God have only this, that, 'crime' is not a word-name, but a mistake, like, the same kind of mistake as an upruption of breath, an misfiling of counts or a thing of the deliberate well forgotten.

Nakr swings around with many small but diverse arms and strikes away at the Unconconscious lumps, hillocks, humps, parings and granules that so occur when a World interferes with the Sleep.

Always remember, Nakr has a thing of a ghost most vague and most extending called the Mortal Reaching, where one is most open to experience upon fighting inhibition...the ghost is a reference, used to keep a parallel or equation...the insides are seen as outsides and the challenge is to be beholden...experience is to be equated with the brain-mind being as a media-machine.

For the logic in the Void, the Stars play an empirical point.

And here is 3 of the centralizations:

or Detakr, at this point I in the name of Demonstrator or in His antigame will not write these names and definitions out with a twixt concerning them...I will instead refer you reader to having made a notebook of 1111 or 1231 spaces to keep a running count of how the names change in

mnemonic or memory upon simple recognition.

And I would have you consider it one point.

Though I might have troubled to bring you exact(ing) definition, it is possible that the feeling that this,  $197 + 88 = 285$ , might mess with eternal replete essence, as it were. Obviously if you were to consider the full 88 to be One, then it would more or less express the replete essence.

It is exercise procurable to have the complete writ of Detakr seem one point because then it's gradual, growing complexity is put to boot, hits the right live feed points in the Book of Trochia.

It dissolves from this period called activity to a winning count called sleep. It dissolves and re- coalesces from a dangerous point you sleep on, risking much in Coma. The much of gusto and hubris are with, lusting, consumed in the enfeebling breezes of sleep. Call up a ghost, and ask them about today's affairs, with why, when, whom and where of what that is all about; they won't know, meaning maybe they can't know - a ghost is all preserved in the time gone by.

The vine-tendrils were passed on to Detakr...Rock, Sea and Breeze became Cipher, Sprite and Sylph. This is Detakr, of Tide, Bide and Bye. It has the facility of conceiving life as but one life in All Eternity, paradoxically stripped of One Incarnation, many lives of the reincarnated to the life of a ghost.

It is Of the grey graces of brain matter.

What have you by the mere powers of recognizance so far?

Whilst contemplating the reflections of various crystals in igneous stones, it occurred to the First Creator of the Universe how much dreams were allowed to exact a loss from perfect systems. He names Tishi-tiu the first angel.

This story, is by my interpretation, of the Book of Trochia, not merely as the Angels Forty-One at the end of this book would have it, a group of lists.

We will take Factory Actualizing to mean the concluding of works in the factory as completed in the beginning, with the designs for the planning left on the product. The use of natural designs is made use of as well as integration of the factory with the environment. The use of Factory Actualizing, that tends to play up on human striving, effort and/or patchwork, in techniques helps with the struggle of Trochia. Factory Actualizing ought to reset Space, at least in Concept. Factory Actualizing is the playing up on what things are made of, techniques and tactics in the art of their Creation, components and processes and instructions in their making, and recycling processes that are going to involve their weight/wait. Factory Actualizing is of great use when used in reference to all of zoology.

Factory Actualizing with the echo-sphere (repeat of Important Rules, Import that they might be) and the Etka-sphere (importance of printing, or manifesting, industrial copies) is, I repeat, important. In the ogle-sphere it is simply obvious.

Factory Actualizing is your method of history and the study of meditation is not prevented by the study of these lists.

Meditation relates balance to pressure and so must be used for the sensate.

Personal equanimity for equality in personal affairs is attained by meditation, although this is more usually taken care of by contemplation. Every unit of physical articulation is and can be recovered by meditation. Orderly thoughts become confused and jumbled when you are done thinking them; meditation helps to organize them.

And 4 Diorakr. A ghost is a memory – and thus if it is fresh enough, it has the ability to put out feelers on the memory of such things as astrology and, to get quite confused and pleased with doing so, it may inhabit all the partialities of that astrology; this is to say that if a ghost is a memory, than it is any sort of memory.

The term Self-Expanding Rib Cage can be used for Detakr, as it is exercise procurable...

The consideration of this should be as an expander of the individual > group in their Unconsciousness. This one list of a centralization deals with playing away the personal griefs, facets and formations that prevent sleep.

These griefs, facets and formations could also become Cipher, Sprite and Sylph...Or Sphinx, Circe and Styx, it depends on how you put it...there were just “word”s at first, in the opinion of Honorable Demonstrator, put together as concepts, concerns, conceits, perniciousnesses even, that had to be described to keep the life going. A seemingly innumerable number of “Word”s become the twos and threes of life.

These are the Supreme Dreamtime Deathpink centralizations these lists explore or hold flat, and should, as centralizations, be put to list on a curved or circular design on a sheet of paper, where they can be memorized for Sleep.

What have you by the simple of recognizance, attained?

Remaining and on you could go, except each of these lists is one of outside the mind, and of invisible, subatomic incorporating with the mind-brain, and each is wisest to memorize to provide health to the wise mind seeking controlled sleep... so invent some mnemonics and write up a list and use it to bait off sleep until you choose to relent into it.

Do you have words frantically writing themselves out with their definition?... ..if so, go slower, and what is the purpose of these words now?... ..I suppose I would have to put forth that they're there to assist the Creature in comprehending it's Creation when it is Asleep. Suppose if I asked you to take the Leap to the Asleep, then you would, immediately. Science is itself a description of terms that can be put in paradoxical manners. This is a matter of Harsh Science, too. Salvation, itself, is usually a coincidence of paradox in science. Clearness of mind, whatever cluttering this means the crawling over from, is the smoothest, wisest gulf of experiments. Clearness of mind is the average state, of the mind operating, and it occurs above the memory laid out for the lifeforms, and above the rote operations.

In Factory Actualizing, the rule is that the Mind must set forth it's rules in the echo-sphere and in the etka-sphere, thus the important rules and the proof in the copy.

The basic theory of unique assisting needs to be explored.

The entire book is in the name of trust.

Most of the information around the Sva Talat is a description of metaphysically, completely mysterious roots of deuces and trigrams that program life into the Universe, so as by saying there is life on Saturn, that is what we mean.

Seventy-nine percent of rote is invisible... could this explain hidden matter?

Hidden matter is better off being Cipher, Sprite and Sylph for our Precious Salvation...cipher becomes 2 of Prayer(formed as the modulation of acceptance, procept, or mathematical concept, and the reserved reply, acceptance, or inception)...Sprite becomes need for Sleep and Sylph becomes need for Awakeness. This ""music"" of the Ancients was abstracted to play, and still is, the twos, twofold, and threes, threefold, of life. Hidden matter is like the precious pendulums of Philosophy and Argument, or Zahweh.

This one, centralization, opens and recluses the lock of prayer that one develops before sleeping.

The doing of associating themes with dream doings is mildly difficult but necessary for wrenching clarity.

The opposite kind of wrenching is a ghost, still of the subconscious.

Remaining count:

Defines life in all his lowly robots, and in the most complex of these ones  
 of society, the manifests of the powered orb of definition. The complete  
 treatment of me in this Sacred Book is lowly, but with enough height that I  
 can see that Memory and Rote are not the only two things in the  
 Universe that do exist. The First Creator of the Universe may have had  
 some universe like that. If rote is not a large enough category, then  
 impairment occurs. The time is well nigh to grow up and realize that  
 category of rote is huge. The term robot meaning here a deadened,  
 therefore rigid body to a pre-animal or pre-machine, plant, factory or  
 stromatolite, presumably manufactured by a subatomic computer.

It is some Universe like some explanation becomes, if anything, a law;  
 and the Language builds on the last to that...that is, if anything happens,  
 usually nothing happens. I, in the name of Demonstrator, call upon you  
 people to memorize these lists...I swear something happens.

Leap from your Sleep, o, Creature, and call upon the sense in the Angelic  
 Assistance.

The Devil is not a lame, cheapskate inquisitor. The first companion to  
 mystery is the shopping-like process and discovery of thick, rich mystery  
 in the name-word of Trochia, which is maybe the thickest, richest mystery  
 of all. The lowly and the royal combine in the bound-up intellect of  
 Trochia, elevating philosophy to its quantum dynamic. The Sva Talat is

exalting philosophy to it's highest coordinates....I like to think of the Sva Talat as your mountain to climb, while depositing positive energy up-wake, the book, the Book of Trochia can be clambered upon as an assortment of humble, grinding ancient agents and irritatingly important ideas trapped in tow. If it is reserved, don't push yourself too hard, because humans have Mortal Problems...going into the mysterious area of Mortal Problems, we find that they haven't cured hunger, instead of making that money is the problem with the curse Cryptocurrency. For the greatest of findings of Mortal Problems are the movements of the tongue and the taste sense, which tend to have locked up the average sense of the Unconsciousness...this consists of a large barrage of locks, which terminally has to do with reproduction, may I please raise that to an almost evolutionary state of a great expanse of time and this is the Mortal Problem of the Tongue-Tied. The Mortal Problem of Eternity Interpretation, in which the deep and perhaps partially blasting away of the Sleeping function of the Unconsciousness takes place, is one in which the materialization of languages and their means is contemplated, is one in which the rate of time is put to compare with patience. The 2 of Prayer and the Other 2 continue, here in Kwordakr, part of the formers of life. The personal situation with such as Kwordakr: Dreaming and demons can be combined with searching for the ghost, whether it is haunts, planets, stars or the Sun or grey matter, in finding them for necessary information on how you want to be treated. More of these personal connections are broken down before Sleeping. And six Kwordakr:

What has your memory so come up with, so far?

There has to be an indefatigable imaginary as to what the mind does when presented with a new word(name)and definition for memorizing. Explore it a little, and you will find this aspect of memorizing exciting. All the details of memorizing or checking your definition by recognition can be equal to a graphic, sound file and expandable concept or as one. However, you will have to watch your Remove, so you don't start hallucinating.

Remaining count: 634.

These centralizations start to get really finicky about sleep down on the lower part of the tree of all. This one picks over what it is to act slowly, as if affected by the 'smallest part in mind'. Looks for who is to blame in wet dreams, coursing along.

It is hard to tell about anything when making this writ, because the size of the lists press in with their sleep.

With the tenderness of each word, Kyodakr breaks down upon the victim, hereby bringing sleep.

Ghosts should be distinguished and marked out in Kyodakr.

Makes for real time in each least imagining.

The Itemization of the Incidental Preparedness Count of the Eternity Interpretation gives us some where we can filter out ghosts.

Ghosts are one thing, and their Incarnation a separate thing, that keeps track of the present.

Leap from your Sleep, o, Creature, and call upon Demonstrator to be of assistance in time.

The 2 of Prayer, first Prayer and second Prayer as gainsaid after Sleep reforms it's position, and the Other 2, continue in Kyodakr. They become Witness of Sensate and Prayer after Sleep, and Embodiment of Witness after Sensate and Embodiment of Prayer after Awakening.

As the words begin In to sleep, what power of recognizance has this left you with?

If that is not the question, o, Creature, what power of recognizance have they(these words) left you in. What sort of thing so makes themes endure?

That is the reason, the answer and the soothing, to cause sleep; but that is not why so many endless questions still are there to ask, still are there to answer and have your refusal not to wish to know. If it is Absolute Duality you wish for, it is here; you don't have to not know that any more. The gain of words(names)and their definitions(fructification of appeal) can be astoundingly boring; here again, one must watch your Remove. Remaining count:

Endurance of the freedom of truth, which as you can see so far, is complex...but how complex we have it here to prove... . But if it so complex, it is surely all written out here. Here were sleep becomes like a sandstorm, truth may exist but memory it very little serves. Sleep must be the first emergency in the Universe, universe.

The memory of the words combines with combination lock of the brain so that certain word-names scrape on the mind. The meditation on this all seals the memory in action, leaving it live, on, for anything.

Several times or more the mind is displaced in Richakr.

As novel and inventive that you are, well now, this ought to come in handy, as you will have to figure out a way to calm ghost-chatter (wrethelpioisis or pinkdeath) with Richakr.

Count of the stars. These are the measure of all slavery...Universal Freedom.

The three of them, the 2 of prayer, the Witness after Sensate, and the other two, the Witness after Awakening and the Embodiment of Prayer, or which ever way I am putting it, in the name Demonstrator, the three of them become two, a vine-tendril . . . .

heretofore defined as ghost chatter.

Dreamtime.

What clues lie await from this in your memory?

Remaining count:

What makes the clues take as anything more exciting than the words...  
suppose, they are not exciting, and are both equally as boring..then you  
must.. ..be.. ...asleep. The vine-tendrils are one of boring old roads or rows,  
cast-aside dust or sweat, forgotten, cast-aside memories and old used  
mnemonics, and this that is fading away, as if deliberately, and delicately  
fading away...the vine-tendrils as I imagine it in Richakr...please forgive  
me Demonstrator.

Count of dreams. Be false, prepared and the stars are counted, again.

We heap the tiring imagining for each exhausting second in the  
unconscious. The deadening proposition that challenging will bring about  
raises it's lethargically overwhelming tact to sleep.

The Average of Suits, a legal entourage to Treatment, gets it's mention  
within the pall laid awash by the egg laying of Demonstrator. The  
Average of Suits averages the way people are treated, when they are, as  
a checklist of meanings. The Average of Suits gets it's success in the  
Treatment of Factory Actualization. The Average of Suits is your best bet  
to bring this writ to normalcy.

The biological creature, like I am before you, is a thing of the most soft  
and delicate memory, due to injury like a mass of jelly, so one must watch  
your Remove, or risked being squished.

One more thing to watch your Remove or your Ignore is this: ghost  
conversation should be calmed in Latepakr and you are pushed to your  
Novels in doing so.

The vine-tendrils continue.

Centralizations of supreme deathpink Dreamtime have an overall theme to their parts.

10. Kilapakr

Remaining count:

The roughnesses of the unconcious are carved back, beside or into the great divide called sleep. Sleep's big curtains are hooked back with back scratchers, and their cobwebby bulk is pulled aside from the teeth by the teeth of the words endowed.

Here wear gets carved back into it's glory.

The unconciousness gets spread about in Kilapakr, so ghost exploration has to be calmed, herein and hereinafter.

The vine-tendrill continues. This play-along of ancient times continues to develop its vine-tendrill-ness.

Remaining count:

The memory of all learnings. The septic is given new clinical stead...the vile in imagining is given a new life in the rehearsal of Owlchalkr, and is given a fresh, new pleasant appeal.

It appears we have some sort of system for dream left-overs in Owlchalkr.

Hmm, note, it becomes really packed with ghosts in Owlchalkr, and you will have to discipline them to stay their ground.

How is your memory pleased so far?

Eternal Dreamtime territory.

The memory befonded, of all exercises. The frame of the goldfish bowl or the bell jar becomes clear, so to speak.

Here is the Eternal Dreamtime territory, and at one moment you are here and in the next moment you are dead, so if you want to keep this all sorts of ghostly behavior needs to be thrown out, so you will have to hold your breath and throw them out...but considering Oojtroo they will probably haunt you anyways.

Activity, slightest, is put to a dance in the deep mind detection of Chalkr.

The stars go on and on forever, at least virtually, so I guess they are the first form of life. Whereas one may be found in the tree of life or dream positioner.

All of these centralizations, herein listed out, have Deep Mind Detection. Deep Mind detection is not a forte' of dear Demonstrator, I will say, as he keeps so grandly dragging, to use that metaphorical speech

juxtaposition, me along.

It seems that we have a system whereas the Entranced, or you dear Reader, o, Creature, is 'coldly' cut off from Reality, as it were, in Raschalkr.

The ghosts put on one Hell of a fight, and hopefully they don't win that Hell, and you succeed throughout a relatively recognizant memorization of Raschalkr.2

The vine-tendrill continues...the long of prayer of twos and the threes of Respect and Response-ability continues. This and the media continues... 15.Raschalkr.

The planets go in imaginary rows. The first creator of the universe is always new. The spice jar of sleep is ready to look out at all looking in, so to say.

Sleep has to do with the Final Movement of the Hands in so-called Immaculate Prayer...perhaps, knowing this brought Demonstrator so onto me. Prayer, recumbence, Respect, position, Response, continuation, family the vine-tendrill.

The abstractions of meaning continue into Rasapechalkr, and hopefully you memorize it so it can serve as a beacon in your deep sleep.

The vines-tendrill continues.

How have eleven things just kept you sleeping?

Proliferation is the right and will be found in everything done, but meditation can be the doing. And that is where Fatakr gets its start. Not much into memorizing, well you may not be, however, you can start here memorizing these six clue/cues to meditation. One must remember these are outside of the human body as well as within it.

That is meditation, not a associative/dissociative spew...not a wandering of balances, but a finding of balances...choice of peace, not dictate of peace...a moment where composure gets it ruling deification...and contemplation will come and hold in behest it's brawny brain-onions...retired as the whole as a moment for extra tranquility and seeing within tranquility what is not sleep.

Meditation is the Brawny Brain-Onion number one, and the Thought-Sphere for the Dead but estimable in memory.

Economic issues are nothing when faced with the immense numbers of computer science so like this the Sva Talat(I pray for when one of you makes that)[collection of lists] or the Book of Trochia uses ghost counts, every day's obituary, to hold itself up.

It is the solution for you, o, Creature.

The vine-tendrill ends up in one last Act of Sleep, where there is a Presentation of Pause...the ""trance music"" or the ""dream media"" continue...often up to all hours when rest & relaxation continue...

Meditation now proves to be what you can do to fight the ghosts in your sleep, meditation of six things in Fatakr:

## Chapter Sixteen

.Fatakr.

composure ko

balance ka

peace ke

meditation or trance ku

contemplation naw

789.tranquility nay

Have you Bothered to memorize all six of these?

328-6=322. .. ...

That concludes the Tree of All, the collection of 789 Spinning, Whirling, Traveling, Unraveling Orbs that causes sleep as a phenomenon. Sakr

101, Nakr 96, Detakr 88, Diorakr 76, Starapakr 64, Kwordakr 52, Kyodakr 48, Richakr 44, Latepakr 40, Kilapakr 38, Kourseakr 36, Owlchakr 32, Chakr 28, Raschakr 24, Rasapechakr 14, and Fatakr 6 are all of the Orbs in the listing.

It causes Sleep, and lists to sprout, and then Sleep to arise again > encoded in the Unconsciousness Open pass background check, in Sleep but Not in Dreams, whatever Sleep is, however subtle sleep can become, meaning the encoding of passive and active responses into the musculoskeletal responses system. These sixteen are almighty and majikull.

What makes the Book of Trochia something I want to do? Something like the Bible has in a Job...it is the job that actually counts.

They stand for this, alright, but these are only dream states due to the Book of Trochia, the Sva Talat, being for real, the writing that frames, introduces, coerces, inducts and conducts it is only a So-Called Dream. The Book of Trochia may not work(!) if you don't make some sort of list proceeding from it to (so-called normal) life.

There are vital lists if you are going to memorize them, but they are only secondary. The considerable size of this Tree of All, consisting of 789 words, is enough that it makes everybody in the Universe sleep. Yes, the size of the list, the type of the list, and the location of the list as it concerns you, all of these are important.

The point is too be most discriminating about what is mostly a Dream and what is mainly a Nightmare...prayer and it's obvious, supplication, can do well to draw out most of this.

After we have slept, does the BoT have logic to it? We're going to get to that later on. The BoT (Book of Trochia) may have logic to it, but it is basically a spew whereas Demonstrator handed me down lists, Acclamator accounted for all of it and Examator prepared for this part of the past into future(angelic slang for 'Present'), with the roughness ground up by He into smooth Mind-Bytes.

Next, we start with the Forces of First Creation. Snap to it and awake!...I howl through Demonstrator-ism for you to come to...the Sacred Blessing of a conscious mind with a purpose is to be had. If you count your Blessings, you will not that they are all there.

If problems arise with coming awake, we simply leave awareness to fry away with the force.

Say there is a problem with many awarenesses or awareness essences,

we simply leave it to fry away with the forces.

These are the Forces of First Creation. It seems some system would work to fit them in, but this is wholly untrue, though the the first seven of these FFC is about the fetal and it's impressions, and this is how it goes: ... If life can avoid two things combined, drugs and violence, then demons and angels are the next stage...the third stage is investments and priorities...the fourth stage is politics and stabilities...the fifth stage is arts and honoraries...the sixth stage is mentalities and purisms...the seventh stage is languages and preservations...these are the seven stages of the Demon, Drug and Man...do you see this elsewhere, No!...And do you see an answer that relates to this in the unceasing and No! I don't see any avoidance going to happen without some sort of laboratory law probably resumed constantly... for elsewhere we have physical: drugs and violence, Etheric: demons and angels, astral: investments and priorities, mental: politics and stabilities, divine: arts and honoraries, spiritual: mentalities and purisms, soul: languages and preservations...and this is that no system could be made to possess the Forces of First Creation on Paper, but man will try to systematize everything with systems first while ignoring their true origin.

They are good. Good but mindless. They are all covered in cue/clues. They are completely mindless. They are mindless, but extremely intelligent, ha, that can actually be put in words.

These are the Forces of First Creation...can you hear their meek howl... what have we in this Zoo?...the Forces of First Creation, who make sure that humbling is part of the Ego. Now give me back my ego...

These are the same as the day, which by coincidence has it that they invented the Stars, literally.

Injected comment against what I am learning is the Law of Demonstrator: Opium must be taken to see the bet of the Forces of First Creation. This is to be taken with a grain, or any satisfactory amount of salt(and what is a satisfactory amount of salt?...I dunno...I suppose it all has to do with hemes or bloodthirsty-ness). The Predominance of the Law of Demonstrator is don't preside upon drugs...as well as other things, like pre-emerging emergency unconscious spats and spatters, personality quirks, peoples' passwords and other such "" trash"": I quoth

Demonstrator. It depends on who we are calling Creature, or Creatures. This is little more to this statement than a love of Afghanistan. The real issue is not opium, but the experience...and life is made of issues and it is my life to write this. Demonstrator will have to see about my salvation. Most of the life on Earth goes extinct, is the statement some other people have written. If the spirit of the Earth is sick, then Trochia, the lowly, but once elevated, will help. It is not my fault that the spirit of Earth is sick, I only seek to aid it's sickness in recovery. Don't get me wrong, alcohol and tobacco are also sick. The fact they exist has to do with extinguishment, not extinction- not (and) is terminal to spirit, respectively...and is an affair of Murdrum, why now, we will get to Murdrum later.

All the same, there is little use in the last list as opposed to the lists that I am given. However, as the saying goes, it is all how in you take it, and the listing book tends to sprout lists. It is also true that it is all in how you judge it...and the more, the merrier...it is all piled to gather into a precious force of first creation. I would like to see your lists.

The pernicious exists in lists in punctuation.

Possibilities can ensue.

We notice various stuff growing here, but it is not yet that FFC have unveiled their "heads"...perhaps it is now that we should mention that they are monumental. They are the most head-less of heads...and their nearly infinite nature makes them bring the want of contemplation of anger...they have stalled out arrogant Satan, by your own senses.

The Forces of First Creation...count them...there 137 Forces of First Creation...they built this World and Universe out of Fusion.

Did they come before or after fusion...it is hard to say considering they are thickly cloaked in caring, humbling, mystery.

I am so sure that every waking hour is spent besides these, about these and around these...not one moment is without these; every waking moment is in parallel to these, diluted and drained with these.

The Forces of First Creation have made all complex worlds to survive with healthy amounts of boredom, so there is plenty of time for the right sort of Judgement...they have contrived to bring about the wayside, the fooler, or the gadget of boredom, the distractive, so to bring about more occurrences, so there is more there to judge. It is their fault this Universe

is built of Fusion, and they have worked to bring about astounding boredom to attempt a cure to any. of the lameness from the World and Universe built of Fusion. The cure is attempted the same as the opium; an attempted cure, not one for Real. If it was a real one, we would never sleep. Opium is much more pleasurable in dreams than in reality, at least, if we were to combine all the dreams we had of it, we would be much better off than taking a hit. Speaking of drugs, what drugstore is easier than a makeshift laboratory, and alcohol raises it's ugly head...one can't even say for all the unspeakable upward lip curls..the affected continues to grow and get life's restrictions, all having nothing to do with the shocking end and the ghost, sheerly consisting of aftereffects ...it all is a bunch of shit, like it's components, manure and clay, just like Earth, no one knows how you mistook it for anything else.

The Forces of First Creation themselves can only be explained at great length, as some things deeply steeped in mysticism and hung up to dry as one hundred and thirty seven mysteries. They back out learning and cause it to boil over, making mnemonic sustenance hashed out of rote and clear out everything left as contemplative discourse. The Forces of First Creation decorate the memory in the attempt to memorize them, and make the use of rote in their case to luxuriate within the esoteric, then pull out the work of rote with asperity. They coat the workings of philosophers. They make powerful ignorance in economics, by what sidereal fashion of comparison, I sort of do know, Demonstrator doesn't know and says it is His job to find out.

Surely, it is in some essence in energies' inhabitation of matter that causes one piece of matter to endure it's time in the Sun much longer than another piece of matter...this alone is the study of the Forces of First Creation...but the memorization of them inhabits an opposite parallel, and that is what these names are for. The Forces all have awake-ness essence, presence or ego-petrifying absence...to gauge them by individually. The fact there are a huge number of forces has nothing to do with that one star of human beings, the imagination. Surely, they, the Forces of First Creation, do lie in established points, parallels and parallelograms across the landscape and lying above in the way of the Stars and part of these areas in which they have this purpose which is to establish a simpler inspiration than mnemonics occurs, thereby providing this inspiration so that themes of thought preoccupy the minds and spirits that are there, presumably to get them to become preoccupied with thoughts so this mystery of thought is figured out by

something, maybe because they are incapable of thought, or something like that...actually they are incapable of lower thought but the answer to them originates in Higher Thought.

Being as they are as wakes, these FFC have in them a secret from a Primeval time, when there were merely Minds...they did not have a self... the inclusion of a Soul or Spirit, besides being roughly clinical, is a Thing of Doing that requires an Ego. The self cannot exist with a mind without an ego or egg of animus. The FFC have this invention the Ego, as well as many tactical underpinnings of ramifications for the inhabitation of gas and liquid as well as metals by successive, complementary, cooperating, shun-by-trial-acceptance ordered climates or realms of apparently meaningful energy in matter. This body of life is part and pact pertinent and also patent to the FFC(Forces of First Creation).

This ego has an item of jealousy, an item of admiration, an item of attention and object/subject similarity comparison active no matter how distractive a conversation, and a tension of individual/group comparison; the ego is an incredibly complex thing.

Do this, ego, or o creature of the possessed ego, I wouldn't want to waste on a dispossessed, hollow, soulless ego, a ghost, do consider the value or worth of the Forces of First Creation, if my mention of them can just be taken as true, consider the actual worth of the actual worth of the Forces of First Creation...the price of a ball of shit, precious stones, water of diverse origins, hot lava and air, and not forget the lifeforms and Incarnations piled on top of that...the price of eight of the other planets, eight of them, and the price of the Sun and now I give you not the price of one cat, with equal amounts tobacco and alcohol, so you can eat it raw!...but the price of one Star and then many, all stars...This is what the Forces of First Creation are to blame for, if it is credit to stake, to say nothing of their worth second by second, or my worth as an author, interpreter and thief of these ancient orders by cipher clicking, ghost tapping and mindless rearranging reading...these Forces are mindless yet capable of minding by ramifications...

The ramifications are guilty of forming life.

The ramifying and ratifying of nowhere plus matter have produced Life. Life is not Void. This doesn't imply, philosophically, enthusiasm is to be had, because hopelessness can result from all of this.

The ramifying spreads out in an arrangement: The ramifying is done more of in a point in the tree of All, and is done in rows in the FFC, and is done in circularities in Gods, and is done in spiraling circularities in the

beings(of Wurgonna) and is done in dual self connecting rows in the judges, and is similar to a great spread out humanlike quality in demons, angels and bio- and bith- sakrologica, the karmas, not the Memories as in the FFC. It is spread out or ramosse in God(s), and it is lengthy in angels and demons, thus they can take dependency, and in karmas, rather flat. To all one hundred and thirty seven, I have decide to divide them in three categories: one, Trochia, a general, initial, more important category, the plural, the one(category) of suspect greatness; two, trochi, category of morals, laws and mathematical principles, pacts, basically; and then, three, troch or trok, theses nervous sensations or other affiliations, impressions, in one word, impacts, meaning imprints or departments, determinants. These have to do with Trochia, the lowly once elevated, a second chance at the confusion, and with Trochi, the elevation in concepts and with Troc, or Trok, the most elevated intellectual point. If you were planning to have it all, the FFC are the thing to have. If you were planning on seeing things (that bring themes) to their disadvantage, then I guess you were born in the wrong universe...the FFC has none of this kidding about.

The FFC are of life, life is made of issues.

## .Seven Forces of Creation

### Chapter Seventeen

These start the forces of first creation by being bodily points, and one reason for large populations is to spread this Force around. This mechanism, wholly externally, is patent to the Forces of First Creation. By this mention of First Creation I placate and divert, redirect and channel Demonstrator's energy to the subject of Definition: by definition I mean to describe these Forces or Philosifistatics in a few or more words that ought to be the works for a huge, tumultuous, invisible, mass laying across all areas known as these Forces of First Creation (FFC).

The Forces of First Creation or 137 Philosifistatics are involved in every conversation or even monologue, fighting and vying their way across these for each little attention each one gets...they are just invisible as all get out so they have never been noticed before Demonstrator enslaved me to His guile...they are just part of the 1111<sup>th</sup> Facts to God now spread across this treatise.

I would have to deny some part of them hasn't been heard of before, but I merely used ancient references to assist along Demonstrator's teaching. These are the Forces of recurring energy motes, classified by how they

do it(Memory, or a wake).

Also defined by me, Demonstrator, as philosifistatics, Mimicries, mimes, wakes or torments or also, recurring energy motes...these 137 awakenings are present in all awake thought, even they sometimes might be present while sleeping.

They keep people awake.

The fault of the FFC is altruism , which is selflessness or unselfishness, and not knowing which comes first, every next time, and each next decision-making point, without ever giving it a break, based upon the outstanding reward that will come by 'scientifically'(specifically meaning at a remove) reflecting on their importance.

On the other hand the FFC do not suffer from sanctimoniousness and they form a small world in the mind to defend you as good. The FFC understand that humans have raised animals and have been breeding them to suit their means; here you can get a non-discriminatory opinion from them on your mind, and find out whether someone, not saying who, is using evolutionary means to suit themselves over you.

Like when, you feel you are being nice to people, but don't understand, that is not the way things are wanted.

So here, finally, are the seven forces of First Creation.:

791.

1.Achsa -force of most pure root death –death death inception success anyways kundalini(aka glorolg...distnid)lean into shades of many days Evidence maker. Loosely unconscious. muladhara...is the origin of the Dream Sun

Death by Any Other, not force of relent or force of death...6<sup>th</sup> force of survival.a sleeping

philosifistatic although phases very, very smoothly to suspended awareness, (awake-ness in mind, yes, awake, but awake has to be held in doubt[of rambling]), held in Zubenubi...Trochia: because genital is too general a category, meaning that they are extensions, like children, generations, the whole realm of belonging tale: always awaiting, first to awakening...first from near-Coma which is sleep; first in details about life which is not so as in dreams, and it has to be compared;

has a quality which makes it easy to admire the spectacular; philosophical sharpness; healthy asperity; has a quality of examination.

This is the main reprogramming tool of the subconscious and unconscious and death and the still living and the reproduction of similar energy patterns in a similar physique, meaning that its importance is accented during the death of parents, that sort of thing, the most apparent tool or wake of death and life.

2Autrua-force of success sacrum

symbol- infinite exploration Helleh, oeegeo, support or post-ing Prop-like and very physical.

You are depending(and digesting). Sahasara. A very dependent memory. a sleeping torment...suspended awareness(relatively awake but dorsal)Sun in Intestinal Knot

Trochi. First in gaining upright balance. Rationalizations different than in sleep. Significant seizure of reading imprint. Healthy fortitude. Has a quality of determination. Tale: symbol upon which all things are held ..This force has dreaming drawn out to the most vivid and deep of senses.

3Ethre-force of necessity, solar plexus

grace-humility aka etidite, aja, facing light of those many days, again... force of success and consequent relaxation. Internal, a rampart of incarnation patterns. Optic centers are around the solar plexus in the brain. Most used mimicry. Manipuri...a sleeping wake, justha pretende, the most humbling aspects occur with this one torment >>of deep awareness. Sun at the Centre of Back

Trochi. First in gaining nutritive content. Survival knowledge intricate nuances different than in sleep. Writing knowledge prevaricates. Healthy health similitude. Has a quality of reserve. Tale: the most comfortable state of awareness. The force of necessity has to do with one being able to base one's life as having some burden free of fear, preferably the burden of enough depth of the memory as to equal necessity, a wake made up of needs...because it all comes down to fears, and their controlling how you keep a clean, quiet and confirmed life and you need some burden of the depth(charge of memeri) to balance out your life.

794.4Dimsid-force of identification as a discipline, heart sign,

nature- the description of a feeling (aka tamat...naamaan...marfnam)the path of your life, also memory of refined excitement...isn't always accurate since it is merely associative. The most emerging. A sleeping philosifistatic, which turns like waves in their wind to awareness...most pure form of heightened awareness. Mind you a heart sign is not a heart Immediately the second most Used mimicry, mime. Sun of Transparent Colour. Sivadsthana..is naymyan. Trok: most detailed memories, very artistic First in gaining awakening as a conceptual sphere. Survival knowledge intricate nuances rawly awake. Writing feedback rings.

Wandering asperity. Has a quality of specification. Tale : tale of the heart sign is twice as old as the heart; you can only guess who its talents are, these Incarnations. A truly eternal force.

Sleeping just barely sub-conscious force comes here all day and night, and skimming it off is identifications' secret.

5Primirp-Force of recovery, throat, soul-the holding revival of worn spirit Provthorp , closest to Cleaning. Recovering. Anahata...still a sleeping wake, elements of external use-nutrition, cleaning, exercise- are brought to and from peripheral awareness to the Coma state. Trok...impact is a vital part of language deemed to be successful and oncoming Sun of Abstract Means, Abstract Means Sun, Means Abstract Sun. First in gaining heightened awareness and heightened attention. Survival knowledge intricate nuances at full attention. Attendance rings clear to renewed remove. No asperity in the inactive Unconsciousness. Has a quality of accenting. Pneum These memories are significant and Primirp is one of the most Significant. Tale: what is not memory, but best expresses it. Control of the midbrain and brain stem goes on here.

796...6Oojtroo force of study Umtu third eye essence-balance of opposites Balance of the ego of sleeping-dreaming and awakening-contemplation Origin of ego A force, wake or Memory of gossip, too, for some strange sidestepping and side-swaying reason. This reasons that reasons are not always what things are so put. How deadly complex the third eye is, materially, one can not even say...it is simply priceless, and with all that to say, I will simply continue to Isitipraise Demonstrator, at this conjunction. A supraconscious force... originally, a subconscious way. Makes all gears fit together, definitions rest together and facts of importance rise from the slime. You are present in all presentment. Sun of Wire. Vishuuddha...Birther of many memories...a sleeping wake awake as in dreams...functional quality of the midbrain and id are brought to awareness(awake) Trochi...but like formof. First in bringing to full awakening. Survival knowledge intricate nuances at a mathematical compaction in all their complexity. Appointment is a concept. Not very much asperity in the aspiring. Has a quality of impression. Tale: made, an organ that beats the Hell out of every future. Remarkable memeri facility. Takes place squarely in the midbrain.

7Puylmup force of freeing from meanings, crown,  
finish-vague describing peace/creation in awareness, crystallization of  
inspiration, Gamag, would make all the rest of the intelligences of the  
Universe insane by comparison...truly the most arrogant one...origin of  
free association...keeping bright and alight with this force is hard to do.  
Off the top of your head, dear reader, Sire or Ma'am. Invisible Sun.  
The Unleashed Crown ajnta...breaking up the heading! An awakening,  
awake wake

Trochia...brain surgery dictates that removing certain parts of the crown  
removes ability to use memory, so there is a suspect greatness to 'force  
of freeing from meanings', that has to do with survivors

all balancing, bracing and phrasing up

These are the strange fetal shape of the chakras.

...Some people have never studied these 7, which originated the Zodiac,  
and did not see them as fit for their physical demise, but they did just fine  
despite that. You are to respect this. Introductum corellatum trochia. First  
in the pomposity of concepts of contemplation. Survival understood  
clue/cue kingdom strata is freed to the test. Ignore is a concept, or that of  
the Remove. Light and fine, holds cumuloids above. Has a quality of  
exaggeration. Tale : origin of the cumulonimbus.

798.

A lifeform is how lowly as a bomb. Not very lowly, for instance, jewel  
weed is actually beautiful.

## 18.Eight Forces of Creation

### Chapter Eighteen

Vine-tendrill makes legs.

8 forces of first creation and collective of everything from humor to  
tradition :considered the legs :though chakras consider the legs and the  
genitals to be of the kundalini.

The contemplative is spread far and wide across the ego.

10lpro nuukuun f. Of cuddling,

early Animal description in Primeval Nature, a response in Force. The  
sheepish one, the 7<sup>th</sup> force of survival, Throne...has estimation of  
Death...Sun Pillow..the most distant force or philosifistatic in terms(or  
opposite) of the tingling or scraping of the nerves... too general so

Trochia. First in the bringing about of the capable in concluding grasp. Preferences kept askew. Completion is a concept. Too delicate to get destroyed in concept. Has a quality mostly of endurance. Tale: the sewage made simply by water erosion needs relief...and this is likened to this one, in that the universe has processes and reactions to processes that can be mistaken for the processes themselves

799.othro dampmad f. of removal, wake of post-memorization, force of surprise. Sun Soap Solution.

Rather mystically is/was svastike...waiting philosifistatic Trochi. First in higher concepts. Survival understood clue/cue kingdom strata is freed to extinction...settlement is therefore a concept. Highest level of memory, used by First Ghosts of your Species. Has a quality of endurance for endorsement. Tale: in making all things, how do we take them away.

800.irmi, imri f. of insetting, the comforting alienation; tactic in force...second to ormo, omro, hold of the Fastest Judgement handprint...a real operandi philosifistatic .Puzzle Sun.Trochi. Survival is a sequence of inset servings. Sequel to the memory with no room. Has a quality of fittingness. Tale: maybe it is not a perfect Universe, because for a lot of it, if only in unreason, it ends up here

801.aztutza f.of bewilderment, realignment, insecurity, loose and false association of the most disciplined, wake of the cough Ahem, awakening force...hooked knot...Dancing Sun. Rather un-originating but may be most real view of memory, that is, a mime of the circumstances it is found and how...when and how...Troch or trok. Survival is Sure of the Past. Sequel to all foretold and before that was sold that falls to the side. Has a quality of rearrangement. Tale: what is animal in intended science and intelligence...

azkekza-force of enlightenment, attachment of a breeze, brilliant You are heretofore enlightened! ...jewels in the chinese eight...refreshing force Unfolding Star.

Trochi. Survival is certain, now that it has reached you. Survival sequel to all that is studied through. Has a high point on the third eye. Has a quality of joy. Tale: what started as forces to make the Universe (FFC) end up giving you this, azkykza

akoka f of following, wake of gesticulation, seeks to make Atom most complex truth of Electron placement, safety force...Sensory Lock-On Star Sun.

Rather miniature ...water libation flask...your most famous force! Survival is guaranteed. Preferences in all directions. Completion at any Stage. Too much of the inception to be a concept. Tracking companion. Has a quality of certainty. Tale: merem is sure of two things, merem and akoka.  
Trochi.

mulgum bastab f of sense through words, particle in nature, like Para, but different

Curious force but second to Para ...Pisces, pair of fishes...the rather descriptor. Star Symbols for the Sun. Survival is both of insecurity and of a quality I am calling security. Preferences: tool-using. Completion seemingly never. Took much thought, and it seems that it is true, the word is a part of eternity. Reference companion. Has a quality of the most sure doubt. Tale: sign above the line with """"x""""and it is a name you mean.

Trochia

mazjram flowrolf f of occult surrounding, wake of arcane accuracy, Mumbo jumbo

Rather militant...lidded bowl..hidden Mysterious Wavelengths Radiating through Wall.

Trok, an impact. Investigators of Coma often use this wake. Preferences unknown. Completion immediately. The device that brings about the sustenance of memory is still a mystery. Has the quality of blockage.

Tale: who are we going to call when it is all in doubt, or it is certainly in doubt, or when you are next falling asleep.

1.olpro-right upper leg

2.othro-left upper leg

3.irmi-lower right leg

4.aztutza-lower left leg

5.azkekza-right foot

6.akoka-left foot

7.mulgum-alternate right balance-space on the left heel

8.mazjram-alternate left balance-space on the right heel

settlement to the peaceful enticement to desires, adding terms to content,  
peace in chatter  
Risings, fallings, depth of existence.

## Chapter Nineteen

### 19.Nine Forces of Creation

Vine tendril makes arms.

805.The nine forces, considering the arms.

9and of the arms and the third arm

Reincarnation is the most pretentious religious idea.

806.amta alta force of pleasure, of telekinesis, this glorious force is the  
wake to Loki, to be awake is to be free, maybe memory, Calliope...of epic  
poetry...explanation of the philosifistatic is that it is an explanation Trok...  
tale: memory is by a tale, by the way, of the announcement of Merem,  
one force of memory, also known as Memeri, of the sixteen FFC, a tale  
that it is eternal and splits off as one life each, which it can no more but  
do to continue with that(used)definition in Gost...One Incarnation without  
that telling a tale. Apollo, actor of the Sun. Investors of how much profit  
cannot now buy and have nought to do with Amta. For the umpteenth  
time, preferences are sustainable in comprehension. Twin to punzlup, in  
that both are yet never satisfied. The device of One Incarnation in  
reference to revenge over Loki. Has the quality of dancing. Tale: the  
head of life, gently trembling, smashing and blown, is enrapt within this  
force (2 tales, add more!...)

807.almqa almra f. of dismissal, of personal imagination, an abandoning  
force, can be found in any Mind as dream doubt(111 before last),  
relaxation continued of the spine causes this, thrown away,  
Clio...of history, torment of expulsion, of separation. Sun in Pit.  
Radicalizing loss brings this about. Preferences of One Incarnation. Often  
ballasted, worn, teased and torn over torment. The device of one  
incarnation...Has the quality of suddenly cooling. Tale: they couldn't get  
"it together"so they went on with almlrla  
Trok.

ozrорzo-otzozto force of pretense, of psionics, simple force of pretense,  
acting, Angelic communicant force, antigravity, Erato, of poetry...force of  
affectation, semblance, ostentation Sun as Short Sequestered Sequence  
of Jokes. Surety of ignores combined with called-fors is brought about.

Humor of One Incarnation. Preferences are elevated. Has the quality of entertaining. Tale: much to do, much is brought about by the little who, so brings about the not refuted Trochi.

809.4.ishtishti-smartrams f. Of pretense in all and everything, grand, the force of placation of intent modulation(intent modulation is a character quality a lot like gesticulating but beyond that primarily on the face, wake of the third eye, sharpness of clarifying, speculation and reliance[s] on asperity, all of the meaning of exactly what I mean)

As the force of grandness in league with Robota,; force of the concerned, the reliant, the reserved; Wake of the Worry, most noticeable memory or torment or mimicry, Euterpe of Music..,drawn up into Theatre or Theatrical Obsolescence Troch or trok. Tale is that it found itself(ishtishti) too important and that it tries to find various humbling or humble ways to play down importance.

Book of Jokes of the Sun(including Sun Media Silence) Not a very sure force. Humor of the First Creator of the Universe. Preferences are nonexistent. Has the quality of life that's entertainment.

avuva alula f. Of fond and unfond gathering, of predicting, preferential force, pollster wake, in nascent sense, Melpomene of tragedy, 2<sup>nd</sup> dark force Trok, grey as grace of mathematical quality. Most sure that gatherings and animals can be, alleviated in Memory, sort of in fear. Ignore is a conceit. Preferences are kept. Has the quality of victim to one. Tale: and in the Universe, in the darkest force of the animal, we have avuva

amuma amyma anyna f. of valor, of betting, this is a force of glory and gathering, the intellectual deed, the use of Memory can be noticed zoologically here, forgive me, Demonstrator; the specific and described in detail Memory, used-glory, polyhymnia of sacred poetry... ..

..,philosifistatic of daring, intrepidness, or determination ..Trok.. Merem's tale is that a large part of the successful universes have to do with betting, and this is the second force of betting after Echidna, Echiche, of the sixteen FFC ...tale: no where does it say, but it is implied in this force that there is no strength in systems, only in forces. Gathering of Folks or even forgotten Family in the Sun. Mostly sure of placement. An impact that is reliant on most things impactful. Preferences dependent. Has the

quality of challenge.

suprus f. of clarity, of telepathy, primarily a force in History, as concerns History, the imagining of a Good Ideal, transparency, Terpsichore of dance and poetry..., philosifistatic of distinctness, limpidity and articulateness Trok, when you can't be too sure, try to risk. Of transparency Tale: actually guides viruses in what they 'eat'. Stars that are Similar to the Sun with the Sun. Surety is brought to its highest degree. Confidences are floated. Preferences in language. Has the quality of transparency

.  
suxus f. of honesty, sexes, sectses of projection, a calculating force like Caballero, matrix-like, an unwitting and outwitting mime, Thalia of comic and idle poetry...torment or philosifistatic of integrity, rectitude and decency Trok. Tale: literally, the juggling force of life, evident in the laws about nuclear bombs. Sun Bomb, or Firecracker Bunch. Confidences gain in this. Confidences exchange in this. Preferences outright. Has the quality of eternity.

814.9.burub barab barnab f. of honor, resisting and willpower of teleportation, f. Of the obviating in secondary meanings, actions and reliances, not in secondary gravities, reactions and personality quirks. The thought-spheres of the Dead boil over...another form of placement, Cleaning, began here, no matter how dirty it is to mess around in Earth(pun intended)...well-used Memories have this, You are Placed upon a Pedestal, Urania of astronomy, wake or mime of respect, dignity, credit, esteem and tribute Trok. Tale: upon millions of oaths, this force rests. Minute Sun. A testing torment. Training takes place similar in for the fact to Ibidini. Preferences of the highest. Has the quality of testing the internal in eternity.

## Chapter Twenty

The randomizing boredom, made still worst by the all-inclusive, constantly interrupting chatter.

### 20.The Ten Forces of Creation

815.Of clarity, no matter how deep the somnolence, this is the 10 forces...with ten thoughts of reference.  
use of tools in mnemonics

10 responses

### Ten Forces of Creation

Vine tendrils makes the first of the Ego, a part known as the Superego...  
superego contains nervous response in the ego..

814. Aljta achxta touchout f. of holding, of grasping, of particle-concept-placement, gathered-around, mounting, Sinkers in dreams 'You are in memory holding on to something'. Somewhat taken tongue-in-cheek. Symbol: old man uncomfortable in socially meeting someone...I am god...particle means like, word... Trochia. Tale: just one snip is all it takes, one snap of one thing, for a description to get a placement, for a particularity to get a punctuality...balance in human form Many Armed Sun(seen in Egypt) First of the grasping forces, there is about four of them: mutum, mothom, weldlew and wurbruw and this is first before them and afinifa. Training from a young One Incarnation, indeed. Preferences of the divine, wisdom and stable, lowly, humble will. Has the quality of disappearing in Dreamtime.

imfri arpfra voltov f. of specific resistance, lightly covering all, very particular force Symbol: word half-erased away 'You are in memory measuring by "hand" the special resistance of something'. Thou shalt not make a graven image, it might "Absorb" reality. Of resistive, or of a resilience

Trochia tale: how simply is put electronic current, but eventually it's secret is memory. Sun Button.

Balance out your picture to price memory with a sound file: it will be equaled in this one. Preferences of greater, consuming stability. Has the quality of interfering with the Dreamtime. God only knows what original complexity this physical force of 137 was dreamt up to control.

oblablo faiscaif f. of knowing, freeing to dream, the Dream originator, opposite of nightmare

'You are free to know and capacitate your summoning, wandering or contemplations'. You will take no other gods afore me..oblablo is the Common force Symbull:the Dream visage; Of cognizant, deliberate, Trochia. Good for a test of madness. A useless Sun point(guarantee). Most general conception of memory. Training is of the effective essences. Preferences as they come. Has the quality of moving more rapidly with age. Tale: much is hidden in oblablo which may seek to reveal all

818.4.inmimni omnimno f. of specifying, the Prizing wake, itemizing, detailing, designating, stipulating, 'You are pulling something out of the particular'. You shalt not take the lord in vain...He is too particular about all His little names. Symbol: many little names; Of predetermining, particularizing, or distinguishing...to indicate Trochi. Sun Spyder Robot. Has a definite turn at detail. Has preferences of identifying. Has the quality of strain. Tale: they all couldn't figure out/ just one little part, and finally they called Inmimni, who solved it for all.

ororo oltqoqtlo f. in diminishing, perhaps the Creation of Invention, no matter how harsh of striving it had:: Angels praise me for my efforts, a wake is the underside or offset of a force, can constitute grime, rapidly receding images, spook imaginary facades, odd touches and intestinal symptoms...

'You are dealing with something that is fading away'.remember the sabat day...symbol: faded, erased picture of memory...this philosifistatic is one of the most elegant mentions of memory; through reduction, contraction or mitigating perhaps the best use of definition in what may fail by oldtkoktdlo is in the wicked curse of loneliness... tale: What do you expect Me(rem) to do about the most vague, the displaced and the traced. There is no other place for this of the nightmarish, and this of dreams. Constant Recovery or Strange Dreams of Wavelengths. The wake consists of thousands of mistakes, missing might and many of the most mistaken in management. It has for its' respect the more common of the senses, heretofore unnamed in the multiplicity of the count of senses: the disassociated senses. Has the quality of being so common, it affects shadows.

Trochi

malskam f. of comparing knowledge, the chewing mimicry, like in comparing the written word to the act of speech 'You are comparing knowledge or engaging in any complex task'. Thou shalt not covet... symbol: the coveted mention of memory Or rather a three-dimensional tree; cross-reference, cross-check Or parallel Tale: many things are made of memory, and one of the more immediate things is malskam, makslam. the 'Sun' Cabinet of Books . Trok . Is as common as furhmruf. Prefers riding on the midbrain. Has the quality of adventure.

murspum f. of freedom inherent, the placid, pervasive and enthusiastic

mimicry

'One is studying the freedom innately put'. Honor your father and mother...symbol: s-shaped flag; of exemption innate or independency  
Tale: the pure essence of memory is, that by any seeming nonsense act, objectives, actions and all sorts of adjuncts are held...Does it have finite integers? I don't know but I doubt it. The Solar Horse. Is to be likened to dream force. Preferences of murspum likened to be grandiose. Likened to will to escape. The details about murspum are often indelicate, it taking too much of a fixed price to deal with them. Has the quality to be the most detailed of the forces merem spawned and He spawned them before the Big Bang of Stellar Matter to put Sakr 101, not Systema, both subatomic computers, to Sleep.

Trok

ibinidi f. of rapid unconscious, ibidini, inibidi, idinibi, however the reversal works out, precarious, the ominous and the foreboding; origin of the Word: mimicry, as opposed to memory, f. Of expectancy f. Of fecundity, one of the repeated imaginary movements 'One is concerned with here the rapidest form of unconsciousness'. Thou shalt not murder..symbol: a black tv screen; super- or sub-conscious Tale: There was one thing to beat me Merem, whom always tells these tales, early on, there was a fast force that didn't like dealing with these things that be owned, not just known, and it was ibinidi, idinibi. Trochia. Sun Click. Foreboding, detail missing, and energy is draining; well, often in that place we have inibidi... Preferences are to stay a wake, pun intended. Has the quality of the inevitable.

823.9.afinifa f. of retaining one grasp element, gesturing, making gestures, facial and hand language of the solar plexus, The Handy One, the framed one, the surreal hand, symbol: a piece of picture, maintaining, withholding, preserving, finger and a thumb, two fingers pinching, a clawing, a pawing, a fin "Hold me back". Thou shalt not steal... withholding or maintained philosifistatic . Tale: associated with the unexposed of matter and plasma, took claim of property when it wasn't exposed to surface sensor or surface sensate; assuming sensate of the universe. Troch or trok. Fingernail, esp. with Sun Design. Is of the order of these things special in that they are specific, contrasts with flathalf most. Has the quality of the hurried.

gooloog f of distinct abstraction, the Selfish and Greedy one; as opposed to Evatom, the economic/eco-logical force, the mimicry- definitely the simplest idea of memory

“A distinct abstraction is what is concerned with here”. Thou shalt not bear false witness...symbol: a small flowchart, A palpable feeling of the elaboration available ought to possess you in this philosifistatic Of distinct cogitation, extraction. Might need titled definite abstraction, too...Tale: Merem found in the Imagination he was making the qualities of memory different, and His title of this weird effect was gooloog. The effect stayed around in the background, and continued to compound to where it managed to confound the people who made it. Rhymes, which were not evident until humans began to explore over water in the last two million years, with their liquid, spattering reflection, and preciseness about the liquid, came about, and were framed out in no doubt. A Liquid Expanse Holding the Sun. The gooloog has of the Universe of Memory billions of universes per square foot in some packed locations on Earth. The quality of desperation is had.

Trok

## Chapter Twenty-One

The emptiness of puppets is the last spell.

21.The Eleven Forces in Creation

Eleven Responsibilities

the ll forces of pacifica's graatist guyd...that right, a Being, Pacifica, helped name these.

They persist in being the greatest good, by contributing goodwill en masse to ignorance, and they are the most warm of the Forces of First Creation...the Forces all over again.

Vine tendril makes part two of the Superego, part of the Ego

11825.1edede-stability and mundaneness, force of the holding fixation, most fruitful vulvluv, angelic promise

You are most stable Strange decadent version of human evolutionary superscripted memory or mime...or philosifistatic, for that matter You Gave Those Old People the Sun. 1Holds to the firm and promising .2 Works to ones' advantage.3 Preferences are very particular 4 Has the quality of the assumptive. Tale: sticking out like an exotic, blue, glowing banana, edede sticks in there

## Trochia 7 FFC

Erere-genius, force of the wisest, most clever  
vajjnaiv; your Genius, your Memory, angelic premise  
You are wisest Force of the responses Any Hidden Sun, especially one  
where people are madly searching for it.

Could be twins

The guise of the stunner. Works to watch over souls. Preferences for  
estimable genius. Has the quality of impressing. Tale: times were they  
spent all their time telling tales, the 137 (FFC), and after all it seems it  
wouldn't end, till erere told a tale that bound them all in

Fine, then, memorize as twins Trochi 8 FFC

qualuaq cashwshaw force of youth, love the devouring,  
self in quality measurement too difficult to easily  
accomplish aka kyntnyk; angels, plural, in argument Or rather plural  
Angels in argument Of course, youth doesn't head in one direction, but is  
a constant reaffirmation of Isis from all directions. Third zoological force  
after apa, of the 14 FFC, that after pickup Sun Robot Kit. The consuming  
of youth, the whenever to whatever, a different, difficult quality. Works to  
reach a point to activate. Preferences are of the same essence of  
emotion as a result of the divine. Has the quality of extreme age, last  
seen in tortoises. Tale: argument for being the force remaining in life  
You were young Trok 9 FFC

quafulaq kwantnawk force of a point, good the specific;  
the Idea, which you will Get, if Angels let you think long enough  
You were but a mere point and if this doesn't work, imagine if you were  
only a point

Good for that extra edge . . . .the sun in braille... ..

Could be twins, again Has the manifestation of heading through some  
pretty small points. Works, as if by magic, through encoding,  
temmenuzation. Preferences are of the extreme. Has the quality of  
disappearing. Tale: one might wonder where is it all coming from, but it is  
feeding in here through tiny points

Memorize, again ...trochi 10 FFC

829.5.fogof fokof a mirror, the force of reflection,  
the greatest equals, the variety of mirrors; reflection from the Atom,  
smallest part in Mind...-Atomic level on up

The Great Reflection Imagine a mirror. Vast Mirror. The most universal of memory forces, this one is found in all of zoology. Preferences presumptive. Has the quality of reproduction. Tale: How are We going to Do it was a question, but then there came the theme Fokof. Troch or trok 11 FFC

furuf firif, force of fulfillment, nutrition  
the most encompassing, the unsurpassed force of nutrition, considering nutrition can build up from vitamin E in the skin-/quite an overwhelmingly strong definition. Vitamin E especial as Golden Liquid Capsule. . .Quite a Sleeping Force. Force is satisfyingly fed. Works by absorption. Preferences of areas even if in the ether as the ethereal is so-called. Quality is of the mildly electronically "burning"..Trochia 12 FFC tale: in spasms of life and death, life fights the very formation of matter in the Universe.

flanalf, phlaxalph-extensor, force of holder in change, most palpable grasp  
krastark chartarch, the changeling wake  
Extension and extensors. Extended Grasper,.. Trochi...tale: actually has to do with the will in memory, and the more something can't be put in senses the more it will end up in will in flaxalf, flat half, or flatalf, or fanaf, or vanav, or flanalf there are so many ways of spelling it maybe about 137 ways, kraxark or churdruch or chadach or chirdrich Whole list at end of book Force is token to such a massive giant. Works by overwhelming. Preferences of divined respect. Quality is of the quantity. 14 FFC

formof furmhruf rote, the most teaching that can be brought,  
lower force of the mind  
The third force of survival. Memorizing it is rather difficult ,..trochi. Force of life, of one settlement by Gost, Ariadne or whomsoever so oversees. Works in many fascinating ways, to rub up against the comparison in confined energy with its' supremacy in life. Preferences are of repeated impressions or imprints. Quality is of the binding to ecology. Tale: we will find lives that can act on furmhruf.  
Surreal(do your best; and you haven't done good enough) Sun. 15 FFC

833.9.forstof law, the summoning of all moral blocks,  
forgive me, and you, the reader, oh FFC, Tethys the law in the Chasm,  
Abyss

The fourth force of survival

the law of rote is you have to memorize Trochia

The best use of forstof is against the wicked curse of the gain of monies and their abandonment, and it might seem that if persons possessed by it are removed from reality or the truth, they are in this tale because they are occupied with the law 16 FFC No Trespass Electronic Signs (simpler than a tent) Force of above all, point taken, that has it's preferences in precious exterior study, and it's quality of the over-achieving. Tale: things are honored to an elevated point, that point is the law

tsroforst emergency, the most divided hope,  
Naja-Shaka, the aspect of Baba-Yaga most given to stellar exposure,  
dramatic

Getting into something different; 5<sup>th</sup> force of survival

The most divided Hope. Trok 17 FFC New Sun Rising. Force that drives medicine, external and internal...has the preferences of necessity, the quality of fascination. Bound me to Neptune with the Ancient Angels.  
Tale: what dark and shining force so attracts the hopeful flight

aguaga inuani mind, accomplishment,  
within the peaceful; Aura, the surrounding and the least may have  
sprouted this wake, torment(forgive me)or mimicry Trochia  
Do You Mind! Huge Brain...like say an elephant or whales brain in  
formaldehyde....

Misted haunted of the memories.okay Force of each one, added in.  
Preferences one has followed well and enjoys being followed...Quality  
one of immersion.18 FFC

The First Creator, not God, created life.

## Chapter Twenty-Two

### 21.The Twelve Forces of Creation

The elements of activity.

12 acts in judgement(the twelve sets of judges>>< the doomed and  
shining gloaming of angelic force since the Big Bang) They are rumored  
to be the Source for Precious Salvation.

Vine tendril makes Ego

836.1.ododo autautua force of the strength in

<searchs for>can be force of prayer, earliest form of prayer? Aries .Trochi  
.Armband or Musclewrap...that took a factory the size of the ""sun"". As advertised enlistment. The truth of this wake is of the effort, to the effect of the effort...it's preferences are of the most secretive and it's quality is hidden. Tale: talent

2.odrodro force of the sacrificer,  
the "darkest" force, the Clearer, the Undoubter and the Least Mimic, the 3<sup>rd</sup> dark force

<ffc last limit can be had, not only is there death in a force, there is limiting> Round Gravestone Mysterious Stone Ball. Taurus. trok .this torment has the most important role amongst others, and has the preferences of the divine, and it's quality is of the truth. tale: things in a gathering such as an ego, ghost, morals, incarnation are discovered to hold doubt by this force

3.onono force of strength in all,  
can be a wake or a force of prayer, can be the second force of fixation to Ometeotl

<no belief is necessary, unfortunately, for this twins inventor, to be had> Gemini trochi

As collateralized enlistment. Solar Painting Over All Walls in the House. The truth to this wake is in sorting impressions of preferences to the frequent and of quality to the time. Tale: the omnipotent

4.ototo ititi force of averaging of all equals

<a task occurred to angels about augieas, who tried to steal kalidirtgod, and this force is of accounting the result> Castor and Pollux are Stars of this twin of onono Equipositor. trok

First of the twins

Force of keeping normalcies amongst forces, and preferences of the normal mind, and of the quality of equation. Works to level things out. Tale: best record or rate sorting things out with demonic fates. Cancer

840.5.enbenbe enebene force of certifying

(the specifics are hard to get well this is the force to call), variable in universes?Wax Stamp with Sun on It. Leo trochi. Force of clarifying to due witness and has preferences of the ordinary nature, and a quality of questioning. Works to blow things through. Tale: they couldn't get even

one Star from the Big Bang stellar mass before enebene worked things out.

6.tsarakarst force of delicacy of reoccurrence,  
(a rare force), a tasteful torment, Miniature Dust Collector. Virgo, trok  
Wake of ease of the sleight...preferences faithfulness, works to keep  
imagining up to par, has the quality closest to the invisible. Tale: many  
times they have thought they weren't going to work things out, but it was  
tsarkrast, after all

7.xakfax f of speed,  
heat friction decay gravity and magnetism are preventers of this force,  
the Heavy Set, pun intended The Sun Magnified if it can be imagined.  
Wake of xakfax is surprisingly unbelievable in its encoding of speed...  
preferences stays firm to unmoving qualities, works to keep up in  
imagining, is a stoic thing and has a quality of interrupt-ance. Tale: maybe  
closer to a memory (memeri) than time(agoga)  
Libra Trochia

8.xumux f of comparer of all,  
knower of the great listing, one the creator of the known universe,  
The wicked curse of the distracted takes place here.... Tale: similar to  
Fasaf of the fifteen Forces of First Creation, touch yourself and  
contemplate. Trochi . Compare to dismayed. Haunts out major  
monuments.boxes of all solutions. Wake of xumux tells of confusing tools  
in all their glory of elaborating, preferences good for cheap love, works to  
keep up distances and the distal, has a quality of life throughout parallels.  
Tale: who is to decide what resource is(two tales, put more!...)

9. Yilpmiy force of finder of parts in fascinating,  
awesomely distracting, the Breathing-occasional-Breathless ...  
Sagittarius Trok Merem says this one gave birth to both shadows and  
breath, through incarnations in their universe, Universe. Mysterious Sun  
Rumoured in Novel .Torment of yilpmiy is a necessary abstraction, one  
that serves well throughout all advice, preferences for clean, quiet  
maintenance, works through thick and thin, has a quality most similar to  
malskam, comparer of knowledge.

10.hogoh f of charm of returns,  
a very simple force but you won't find that defined by physics, now

defines the opposite force, second or maybe first before, to, the force of Paradise. Mailbox. Torment of hogoh is a thing of the presentary, temporary in necessity, ready to go for all things, preferences of the divine in incarnation of these specific people who will be in your life, works out, has a quality of the ever present.

Capricorn Trochi tale: inhale-stoppable in the dedication of exercise

11.fargraf f of processor in forces,  
this one is just as well known as memory, the mechanical  
Aquarius Trochia ..supercomputer preferably Immense. Is demonic  
seeming in the present, accurate in the future and an object of  
contentment in the past, preferences are of guidance, works like a  
dream, has a quality of granulation tale: life is just better organized with  
this one mentioned, and considering all that it implies

12.targart force of need for all or not  
, a suspense of a torment, tornado-ignore-a-cane, or tomato-oyster,  
whatever the name, please Demonstrator be merciful , or the angle-  
resumption-presumed  
Pisces has same as seventh of eight forces of first creation: association.  
Sun drawn in Mud.

Trochi. is in every way the finest of memories, preferences are in  
questioning, works by witness in position, has a quality of perspective.

Tale: waiting wake

If fargraf was the first damnator of set this was the second damnator

Time must be set aside for the Forces of First Creation, and a regimen  
developed with good mnemonics, in order to memorize these. Reasons  
for memorizing and the pleasing of oneself must be described and this  
set aside in order to increase ambition. Some sort of ritual should be  
devised in order to introduce them to the sleep...Sleep presumably  
comes from the Tree of All(789 Defined Points at the Beginning of this  
Treatise). One should be exquisite about the “memory”, making sure  
you record any slight differences in recall.

How you have memorized; this should show some personal quality,  
although, we all know, that is not always possible. Always remember, no  
matter how little you have done, no amount of praise will be the answer  
to just that amount...memory is personal and subjective individually to  
the ego. The ego, duck out when I say this, understands words like

these.

They are one-hundred thirty-seven facts as these Philosifistatics or memories, including memeri as memory, so it is quite some tale of handling the delicate in rough circumstances to have memorized all of them.

### Chapter Twenty-Three

Dreams are if not one thing, perfect, false.

22.The Fourteen Forces of Creation

14 acts of reliance

Vine tendril makes Ego and life

848.1.ama unmu f of pressure in an open system,

The exploding, in concept as well as actuality. Trok Metal Halide Lamp.

The force is for these circumstances when we would otherwise feel fit having a safety-hitch force, preferences are for liable, work is in measure, has a quality of mathematics tale: preferences to a count

olpzo force of emotive influence, halleluya worth studying, The Grande Temperamente

Second in theory of Survival. Capability of emotions. Diary containing more than Four Points about the Sun per Entry. Trok. The definition seems to stem to something left out of 17 FFC, preferences to touching of the control or consequence, works to bring into the question these of

the emotions, quality questioning.

fragmarf trajmjart f of the hold of reactors, to whit reactors are the opposite things scientifically from recorders, whereas they might shew an image, the reactors produce all that is necessary to belong among this reality where an image came from, the force of safety and sanity in the presumption that Memory be something diversely memorable, accessible and positively explored

You are withholding reaction. Body of the Study of the Sun Summarized and So Simplified. Trochi. The concept or conceit of the clutch of the catalysts, preferences to start at the mentality where successful, works to prove a reactant...quality extemporize.

anana inani f of relent, not oogly googly moogly but= the Wild One. The one of softened feelings.

Strange theory about memory: Theory of Survival. Trochi. Wildly Hidden Sun Symbol (I hereby decree such a celebratory day) The reality of easing in on a complexity (Memory Definition) to give up on what might lie close, preferences sometimes obsolete, works to prove a point, quality to let go.

amazama amoxoma f of fusion or confusion, is actually known, a common force, secondhand in gossip, snarls of the ordinary, sweat of the dreamlike in nature trochi. Video Stall of Sun Points.

Snarl. Concerned with confusion/fusion, we will not say what this is largely itemized as, what preferences it has, what it works to do, or that the quality is confusing.

apla apta axta f of wrestling, as if that is a force, a conundrum of effort  
861

Just what it means, and a significant historical mimicry. Trochi. midbrain sun. This definition takes place with the most confrontational of sports, its preferences are to a more general definition, works to provide a general definition, quality one of confrontation.

.epepe,eperpe force of the causal incidence of the vicinity, near coping with imparting a physical means to deal with something eperpe, take Notice of this Gloater of Life-process. Very Long Ancient(how ancient, well that is up to you trochians if you, o, Creature, don't take it [trochia] too seriously, which you probably don't) Story of the Sun. This force takes

the cake with a definition as accurate as can be held.  
You are incidental to the vicinity trok

where and when and what and why and who.how  
is not 13 forces of first creation instead we have God, that is where,  
abbrevia. apx. w=, and that is this pause that no mere animal inane alien  
asinine runt is going to pass by in something of the soda speak and the  
necessary social demon of rules the fourteen forces of first creation and  
that is why and the who of it

#### Chapter Twenty-Four

Making of suicidal demons.

23.The Fifteen Forces in Capacity

15 acts of capacitating

They are never impolite

Vine tendril makes Ego, Life

862.1viriv-of pitched strength,  
of old drama absolute muscular extreme miraculous something, planning,  
materially deferential

You are making effort. Tale, this force makes physical conformity And  
deformity...turtles stand their legs up to measure time with this  
philosifistatic...getting an arch in the spine of their shell.

Trok. gauge of sun.The plan of types in 15 FFC makes use of one, in  
physical obviousness, the pitched strength of viriv. Preferences are  
something of the physical in nature,, works to a point that is a small  
expanse..quality one of the physique.

2vuruv-force of virility, loose expression and abandonment  
framed by the fallen is there to find what is lost in force righteousness;  
the Challenging one, similar to force of fulfillment or of nutrition, for  
seconds

You are making “sex” the loosest meaning. Tale, a “holding period” is  
measured to language...with this of troch of it's concern. Trok buried sun  
ornament. In this combination vuruv finds its definition.

Also twins

3fasaf-force of effacement in challenges,  
writing or formula shrinking perspective, inactive <prayer>, the keeping of

writes in rote originates with this one, interesting to reflect if you are going to memorize this like this, the War-Like

Face the prayer. Tale, rumored to be so strong, an incarnation will reach around, touch, and hold themselves when under the influence of this wake of mimicry. prayer to secret neighborhood hidden sun.

Philosophical roots are that it is a bargain in the science of introspection. Preferences from the intrinsically minute to the oppressively large. Works to face down the challenges. Quality is one of the obstreperous.

Trochia

4faraf-force of grinding inspiration, drugs<chemistry>, familiar feeling energy(nutritional perfection)regulation, time the gratuity, music, gratuitous force will get us nowhere but in that case this one will The will in this one is inevitable and you will feel it happen and all things light up in this force of a torment, of a mime. Tale, a living biological body finally meets the end of it all as a pile of dust about three times the length of it's life, though it might have, great grinding inspiration!...bones left. Trochi. Giant Pill. The wake refers to one of the most inevitable, even, inspiring: drugs are part of the human body; the gratuity of time is of the essence, and is of the recall, of intoxication or of intolerance of it, therefore; preferences significant in the minute; works to provide entertaining; quality of entertainment.

Also twins, which begin with the out and the ins of the spins

5wurbruw force of impact of holding thing to, enjoyment of pleasures, endurance in haunting[closest comparative],dance, a reflection secondary to reflection

Indicated in musical programs. Trok Tale: practically aromatherapy.

Donut-shaped pill. The torment is one of an impact with a thing held to, as such, is a torment tied to its description; preferences of the pronouncedly philosophical; philosifistatic works to keep things positioned; quality of positioning.

6weldlew-force of holding one thing to another, stars are the greater, refreshment in discipline of the ordinary, following the three dimensional, the Incremental; Small lamp.

Summoning up of all efforts. Trochi Tale : we could make this the fifth one of zoos The philosifistatic is of the Stars in hanging; preferences of the

intermediate; works to divide themes>>things; has a quality of placement.

7wuduw-force of holding one impact, leisure measure of right and wrong, magic may be rumoured to exist; keeps part mystic and part magic, to every little thing that exists, incantation or invocation or incentive, Quieter of Souls in Space.. Trok. Tale: and a pun upon trok is this One. Pause..for the Sun.

Indicative of being extended from echo, aeon, reflection of integrity. This one is concerned with holding one impact, has preferences of being different from usual impacts; works to fillet sources on top of our defined definition of Trok; quality pleasing to the sensory.

8murdrum f. Of coherence<killing as substitution, replication, reservation> mystique as certain ,of drama, ritual = ending, inventor of the Dinosaurs, unrelented force and a torment of terms, a Mimicry of the Useless, calorie counter exposed sensor mIDbrain version.

Kill. The only tale is the tale ends here to this one, like with birth, but also sometimes with, like, tremulously rebirthed, like with cells, the hearth of truth and warmth Trochia Most recognized amongst forces(wakes, torments, mimes, Mimicries or memories)for the stupid amongst us, the most coherent, unto even killing, preferences accented, works to create reservations in mystique, quality not in pretense.

9moodoom of affectedness, of mind, of affectedness, of urgency in importance, a gathering mind, of worship leaving it written over, ceremony, most presumptuous of the Pretenses

Affect.Trok Merem says this torment of mime will mostly answer very directly, thus it is connected to the you, I, me, we and they of the most innate reference. Rumor of Green Sun or a series of vocal(ized) clicks. Effect of the affect, preferences laid-back, works to heighten response, quality one of the enmeshed in ability.

10malam-of effacement in balance-space, mind/matter, indirect confrontation or the act of having things as ultimately encoded as they please in dreams, third arch escalation, empowering, symbolized, incidentally by a drum. directions to secret neighborhood hidden sun. Prop. Trochi...a general principle. Second to tabatha. First, holds relationship as item of memory, preferences of evidence of positioning, works to bifurcate the mldbrain, quality peace in belonging.

11anda f. of loose capacity, pleasure centering blockaj, accomplishment in ease, radiation of parts, pomp, orchestral qualities of machination, takes care of a care less. Equipositorvisitor.

The falling out of secrets. Trok. The pompous put-off of a force, preferences that of unique patterning, works to establish justice, quality unsure of going about(it).

12assa f. of repeated potential, regularly reoccurring emanation, darkness dismissed in the pacing has to do with accomplishment, circumstance, toy-like in it's own re-reference. Fine Large Electronic Instrumentation Non-stationary Nonstandard...old symbol, distributor cap.

Battery. Trochia. Most Universal. The battery encoded has preferences in dim light, works to re-examine mechanics, quality is railed of a row.

13aktaatka f. of pretense of one plurality, of forces -one item of force, dream perfection, strive and attain, mindful familiarity the first step in mnemonics, reminds one of the First Creator of the Universe... ..

.Internet Unedited Foreign Version.

The inhabited. Trochia. Fits in, has preferences of appropriation, works to become more appropriate, quality is appreciated.

14anklaalkna f of retention, most organized force, calendrical time, open witness, closest to rote that memory gets (not quite formof, though) and the FFC, are memories, like, those of logos, and karma are karmas, the Great Queen B Comparer. Trochi. Pocket Safe.

A lister. Retaining torment or mime, preferences withheld, works to fill out larger areas of thought, reflection and mind, quality possessed.

876.15 masam f of effacement in service, always beyond description of service, humility is mastery , interest will be consumed as the formulas ,nudity, rules over precarious-ness

of a clarity making the Universe. Trok. Secret neighborhood hidden sun, script to nuclear imperative.

Similar to prayer, but only said in honor. Humbling, preferences benumbing, works to disturb poor mortals, quality is out-of-the-question.

## Chapter Twenty-Five

Making of evolution over ideals.

25. The FFC decided to make rest in the refreshing, and again they did it, and again and again, till the refreshing was as familiar as repeating a thing to get it right, and the two became synonymous, until they slipped out of synonymity, and they slipped back in, and in this slipping back and forth within synonymity of the refreshing and repeating a thing to get it right, that is when they began to deal with unspeakable, and this went on until they were expert at dealing with the unspeakable, and has remained so ever since.

16 acts of grave reliance

Vine tendril makes Ego & Life after Love of Many tales

1 agoga the first one that came about was time, a primeval entity that harbors the greatest impossibility and consists one thing: choice. the theme to the first one, this force, is that it protects all things and all identities and is nearly criminal or felt of as undesirable because this one force created the Universe, so in reaction to its harshness one must come up with a quick plan to the Forces in critical reasoning... telling me tales and as facts telling what we tell as tales to memorize the full truth sequence in order in a sense mnemonically ...in fast lingo is recognizably premnemonic

You dump decisions in the subconscious. Trochia tale: faster than xakfax, force of speed. The impotent sun. Has the virtue of being quick and of equanimity and is entire, preferences for elaboration and working to fulfill; quality of the supremely necessary.

878. the second one tabatha to mean taggings everyones' mind and as a force it is a fact to space. Tabat, force of spacing. It consists of flatnesses a million times smaller than the atom, that fragment everything.

Everything has it's Memory, and this the destitute or desolate One.

You hold forward to a memory. Trochi tale: can be the most rude and awkward thing, the wake of spacing Paper Sun. Details include that it is a space force, so in this Space Force, questions and answers are explored to bring about Space Memory, a thing of Meta-I Incarnations, such as, i.e., strewn, similar to Water Memory, but the question of Life Originations more important... preferences of the Extended, work of the long-lasting, quality of the extemporaneous.

the third one is Baba-Yaga, a real force of the imagination besides all counts of sensations, sensibilities and belongings... something to

naturally get excited about considering all wakeness wears on to sleep.  
The Primal and Primeval Imagination.

Baygab, force of imagining. The unconcious imagination. Rays.

You depth charge your mind. Trochia. tale: it won't work to tell tales...

you'll end up waking in your sleep. Ancient-most and equated host to the mind, the wandering, wonderful world of the unconcious imagination includes coursing past the Threat-Coma, to decide amongst the declaring sensations what lies to be said, and preferences include fully sizing up a situation, works to provide the mldbrain with extra room...quality extraordinarily huge.

880.the fourth one is caballero a supreme identity of an inspiration that made the stars and that is made from the stars. it exists as all higher thought, cabac, force of highest imagining. I called it cabalero because Demonstrator, Acclamator and Examator told me to.

You are making the stars. Troch, trok tale: only equated with the stars because of all 136 others, and they may even consider it, cabac, rather tacky. K(Not) the Sun. Hidden from Stars is about near everyone , everybody and everything, considering only the surface of them and the Sun is all we see...in this hidden realm is kybaklerelkabyk, secret secretion of the Stars, preferences of ostentation, works to enthrall, quality enthralling.

.the fifth one is memeri, as the same thing as memory. As an identity that told tales, created all manner of perfection and interpretation, as the fact it was a quality of the environment, as a fact called awareness. Merem. Memory in humans, too. The main theme of All these Forces. Number one torment, wake, mimicry, etcetera. Tale of self: the thing is memory is the slave of ambition.

You are one with the season memory. Trochia. Green Sun. The main thing and the Origin, as soon as they, He, the First Creator of the Universe, decided this was going on, is this one, one force, one wake, one torment, one mime, one Mimicry; preferences obstreperous, works to assuming root reference, quality one of the charmed.

the sixth one is prometheus, or spearhead so far as they are all good, but then my spirit said the next was maybe not so all good; the next one the sixth one is an identity that prediction, deduction or intuition...also known as promorp...Dark Painting of the Sun(the Aztecs were the last culture to

Leave These). To rest upon thought, and in contemplation to examine the root origins of what may come, this is the origin of Promorp, or Prometheus, preferences selecting out of abandonment, working to provide sustenance, quality is of the essence of dark embodiment. You tell fortunes. The 1<sup>st</sup> dark force. Trochi tale: a person prepared for this moment again and again, and when it came time to do the thing, they still weren't ready

the seventh one is messium who created cleanliness in concept, force of cleanliness imagined. Mesem. Tacit tact of cleanliness. A highly experimental force and a well chewed over and comforting torment to the lonely. Huge Soap Pool.

In which you are fixating upon cleanliness. Trok tale: torment of mime of mesmerizing is there to test out reliance This is of the essence of cleanliness, and as such essence not really cleaning, which can cause bodies to flare up, in need of a sensitivity often too often overused, such as an extinct addiction to soap, and the essence of cleanliness is a demon you will not fight; preferences picky, working to examine need, quality of divining origin.

the eighth one is echidna of betting, imagined gambling, and even real gambling in as little as it makes any communist difference, at which the whole Universe belongs to you, that one, significant of the rapture of this comment. Echiche. A Commune-ist force.

In which you are betting. Trochi. The Sun is a Common Symbol. To which a universe of betting is found, nonparallel, which trains the about-ness to selection, where one confronts choices, itemized, for preferences, which we have mentioned, which works to form a universe, or a care, to the quality of selection.

The ninth is ometeotl force of fixation in the stars or the force of alienation, or also the force of imagining emotions. Ometaatemo. Force alienating in transfixation. Takes care of many, many things you cannot do.

In this you are fixating upon bright points. Trok. Emerald. The rigidly held universe of ometeotl is not to cross, and stays splayed out, erect, with time itself; preferences of the gaudy and garnished, works to play up shine, carving, tensions and all manner of decoration, quality is fascinating.

The tenth one of the sixteen forces of first creation that came about when, all nine of them were still losing their selves and complacency(identity), when the stars started to grow dim and when this force of fixation lit them in their whisper and came about what was as an element projection, not this of exercise, as an identity of relaxation, failure, and necessary loss, or losing for necessary reason. I called this one Oogly Googly Moogly, and I meant death, of the imagining. There are scientific steps to forces here then you are messing with something on the stellar/nuclear level not even real for the amount of organization to make it seem real after this force point. Oogoogmugumgoogoo. The unreasoning one. Mother-of-Pearl Shell...made to look like Star. You are making death. Trochia. What won't succeed at first, will never succeed and thus we have the mimicry of Oogly Googly Moogly, a mime that has preferences of failure, works to fail, quality failure.

The eleventh one, identity, or force that come about, was a force of language, in which these eleven are able to share certain stellar premises and make promises to senses of all identities, and then continue this activity in order to explore a continuing development. This one of cipherology, of the symbolic, and of the exploration of things had in common, is a force usually seen as the supreme one, so that you, and I, and all of this gathering about any identities, do not see what we are not supposed to see. I called this One Para, but for our common sake I would call it Oomplompdiminish. Force of language, primarily animal but can be plant. Trochia Equator with Star. Truly put aside, kept within the parallel of the removed, is Para, the conceited and conceptual of language, preferences universal, works to describe similar universes without opening them, quality statement-like.

You seek within the force of language, not of words but in the unconscious scraping for words; you find subconscious and unconscious parallels, tidings and buildings toward language.

the 12th one that came about was born from the rest of them, and the last of them, and this allowed this one to be even before being. This identity, or force, was able to create and define something greater than them, greater than all of them, by resting precisely on the logic formerly defined by them as well as resting precisely on the goodness defined by them, and letting that become them, as the pleasure then. This one is called Ben-Gubi or the Force of Paradise.

One finds one charmer of a force, certainly. Trochi. Harps fixated in Circle. This equates with everything rising, hopeful and successful... preferences elaborate, works to bring about equality, taste and withholding and quality is equal.

888.the 13th one that came about was the dull-one or Protogonion, aka Paradi. The dullnesses in life are used by this force, the Paradox. One finds a reliance of a memory. Trok Couch. Dullness or being dull enough for every single game is Paradox, confronts preferences with questioning, works to "smooth" out universes, quality confronting.

the fourteenth one was called evatom for the most brilliant and most simple and definer of freedom from charity and charity from freedom, and as defined, thus to put, good points to lead us somewhere where we might be better...Evatom... aka mim Elhohle mim  
One finds charity, the mimicry. Trok. Pearl. The opportunity is still out there to have everything run charitably, preferences of the essence of mimicry, works for attention, quality attention-getting.

890.the fifteenth one that came about as the force of fascination to cause this freedom in the immaterial known as argument, denial and entirety, reason and sensibility and propriety or the causing of the entity to go unto establishment, with this good sense to have some fun so that all could relax while waking up instead of becoming more humble. He(this one) gave greater peace to numbers and even helped then in the one force of fixation in stars. I called this one Zahweh, for which I am in no way to blame aka Yavay...this Force is argument.

To understand this argument, everything stable in life is pinned by arguments...everything in life is activity. A still moment is death, before we reborn, spewed off from Gost, we then proceed upon life again, to be incorporated in more arguments.

Green Agate, Chrysoberyl.

One argues. Trochi. The base and the arch over it and the curvilinear back to the base are all forms of philosophy, mathematical qualities of it, and the predication in any region of it are brought to the argument of where are you going, going to be the preferences you are within the terms of philosophy or argument, and it works only so much to argue it, and the quality is propriety.

891.

.the sixteenth one came about as the force of authority, and had the quality of putting things and themes aside that we don't need to know, no matter how much I you or they desire to, because there is no freedom available to that one or these ones to reach a quality of goodness without it, it is the most unthinkable one of all of them, Robor if you are to fight about it. I called this one Robota or roxota...force of machine or aka Autostau

One imposes. Very-ious Recent types of Recording inventions.

Trochia You are dealing with the authority, no way around it, and it is best your preferences are to listen to this, and work with authority, and is of the quality near-obsolete.

### Chapter Twenty-Six

Has things organized into depositions.

26. The FFC decided you fill up with emotion like fuel, and then you play, read, write, file into an array it out, use it all up, and then half past that point twice as far from where you used it all up, into the gray graces, using up what this secret energy source is, you go on.

17 acts appealing

The vine tendril appeals to definition in its form of origin in the Ego or Egg

arora-f. of honor of all minds(this alone in 137 makes a monumental problems for presentary physics)

Unique in favor. Trochia Big Woven Light-colored(preferably yellow or orange) Sun on the Wall. The item or force, aurora, has in it the default take of the honor of all, to establish a heaven with it, and preferences are of the limiting, works are of the limited and quality is limitless.

taxat-f. of price of having aka visiv

Qualified price. Trok. Largest Coin. Is a force at the price of having and a reasonably strong, violent and/or precarious force at that...preferences are established, works establishment, quality establishing. Tale: all of the charitable thought of the elders is found in Taxat

shamash-f. of loss in emotion aka sinis, invented Chinese people

Draining out emotion. Trok. Manhole Cover. By the loss of emotion all events further conjured are dismissed in abstraction, and preferences are heightening, works are heightened, and quality is one of heightened awareness. Tale: life would have emotions all through it, but life grows old

and the elder force is Sinis

pinip-f. of laying in emotion aka bokob, of compact objects that are as books... ..that can include brains...perhaps if we were to say there were ancients who came up with the forces, or who may possibly have made themselves into the forces, the significance of bokob, pinip, is more raw; the act of playing up on emotion leads to books or book forms  
Pouring in emotion. Trok. Fat Book of Cubic Shape. Adding in emotion brings a culminate clearance to things>>themes, and these themes draw preferences to emotions...works to influence people, like, you, O, creature...quality is fat.

surus-f. of absolution aka siris

To be absolved. Trochi. Sun Comb. The whole matter is taken care of with Surus...preferences are lenient...works to absorb impression(s) about memory...quality responsive.

rivir-f of traction aka walaw, to wallow

Force of pulling...resistance while pushing. Trochi, tale: push, alight, pull, gather, coalesce, heat

Drone bomb. This one looks for those pulling excess energy around memory, I suppose, preferences token, works to provide resistance, quality effort-like.

rubur-f. of tolerance aka wavaw, particle may be the ultimate result of colliding wavelengths that have left the collision in leftover form. Huge tire-shaped Star.

A physical force, a dull wake, a bland torment, a significant electronic mimicry. Trochi. Has it to the fake point as far as all of the memories(137) are concerned, preferences ample, works foreboding, and quality, ominous.

rester-f. of trickster in wait/weight

An end definition. Trochia. Strange Monument. Looks for additional inclusions to 137 Memories and edits these...preferences fore-bearing, works perspective, quality surrounding

pikip-f. of belonging aka ososo, the origin of the zoo

Belonging. Tale: the Universe is a Huge Truck. Animal Secret.

Pinip and pikip are also twins...Trok? The essence of

belonging can be yours, despite, no matter what, how someone might be treating you...preferences oblique, works inclined, quality at an angle.

workrow-f. of emotion aka waraw, the origin of logic not yet well nigh, the origin of war, the word, starts in the Force of emotion; the name is, I will have to tell you, merely coincidental...maybe if we were to think about these wakes as Memories, then the significance of the Memory is heartening, can it be, emotions are a significant form of memory...it is the realm of the emotion and no one part drawn aside as in Shamash, Sinis or Bokob, Pinip. Tale: over a division in the use of "ware", they named this one separate from merem, and as we have first in everything what is, we have Waraw being named after merem . Sense of humor.

Of emotion{s}>perhaps plural. Trochia. The force Waraw will not be excepted, will be accepted as a force...preferences liable and works justifiable and quality undeniable.

lamal- f. of least pricing

Poverty and Still Shopping. Trok Tale: put in the Universe just so they could be certain. Piece of Cash.

The force lamal has to be the clincher, all meaning is given preferences, working to prove point, quality is undisturbed.

surbfrus-f. of pricing aka lamal has

Pricing systems. Trochia Likened to anklaalkna. Tale: equates with the worth or the value of each of our lives, all put together, this of many lives. Old Cash Register. The meaning of this is significant for treatment, preferences are of the therapeutic, works to provide therapy, quality is medium.

wendnew f. of care of having aka lokol to lock things up

Belonging to. Trochia Tale: this one is one of the primal needs. Polar Bear. Force of possession, we are stricken with feeling that too much busy is going on here to otherwise bother...preferences self-involved, works to adjust belonging I suppose, quality tempered.

kuluk f. of principle aka keyek the key/cue/clue

Root of definition. Trochi ..tale: a whole realm, where Merem spends much time with this one, takes pace with keyek Memory of Green Sun. This is kuluk, where the idea is "in" principle...Much of what can be said about ordinary forces is therefore obsolete...preferences hung up, works

I suppose to suspend things, quality mnemonic.

linil f. of things on rows aka silis

Exactly as it means>>organization. Trok Tale: these forces are also kept, here, likened to this, manner, in and as of keeping. Sun Installations. This is true that everything shall occur as it should and then the forces will appear nonparallel...preferences rigid, working slimy, quality pleasing.

907.puzup f. of undoing confusion aka valslav puzzle is originated here, perhaps the origin of mnemonics Tale: we the 17 FFC are the most sure origination of Language, plain and simple  
Solving force, wake, torment, mimicry, or memory. Directions to the Sun.

talat-of making copies, the price above

The copying, as in a work of rote or the use of mnemonics. Trok. This is the key force in unlocking them, it's preferences are complex, working bio-platonic, and the quality presumptuous.

### Chapter Twenty-Seven

Automatically makes lifeforms.

26.18 acts of dispelling

The vine tendril makes Ego or is sealed off to germinate

909.18almthalmtha-of acclaim, if you memorize all these wakes, this your reward

The silenced honour, similar to arora but not the same, almthalmtha doesn't imply all. Trok tale: torment trying to be most simple meaning Blueberry Sun. The honor of almthalmtha is fine, the quality of athmlathmla is protuberant and it works to excite and it's preferences are extensive.

koordook-of utter loss, and it exists in this Universe to succeed at that alone, so senses are different to the FFC{Force of First Creation) tale:  
"True" purpose

Mnemosyne. Trochia. . . Red Sun. The time came and went by and then we come to koordook, lonely force still with no regret, reason leads preferences to multiply, works to swarm and quality is onerous.

911. tulut-force of resignation, apparently more important out of 137 than you can easily recognize

You sigh too much. Trok tale: let it, tulut, speak : I too, like all other “things”, cause sleep...Blue Sun a professionally-photographed wallpaper . The glory still glows in the force of resignation, and it's preferences are of assignment, it works to bring about things and it's quality is as good as a memory. Reassign, reassign, reassign, and finally resign yourself to.

912.tuzut-force of electrocircuitousness, a mechanical wake if there ever was one tale: a harsh force, o, Creature. Gnat-sparked Lamp. Rigid wake, sharp or harsh force.trochi. The wake is supremely active at all hours picking all manner of information, it preferences are enraptured, and it works to encode, with its quality being conventional.

tuput-toopoot-f of sensate abstraction, not quite sensors. tale: only time passes by and choice, by Agoga, but in tuput we have touch, friction, ttilante, and the three of precious salvation, so there is some reserve of spirit in the unbroken universal incarnation without tying into any elements or metal or viral(clay) or atmosphere, and the time can be decreed for tales to come by (every moment) in tuput and merem. Any Extreme Memory of Sun.

Sensate.trok. Works to provide incarnations with necessary sense(s), preferences are one of the vague, is one of the grants of life, quality is one of preferences.

turut- f of attention between sensate abstraction and mnemonics, an operand of a wake

A real memory, or perhaps what we Are saying: mimicry.

At a fourth interrupting mention, instead of twins, we get quadruplets.trok

Tale: to all of learning of any incarnation, although we can procure presumption that there are less tools to learning with a loose more replete of essence incarnation, say one that is external to Earth, and not in the atmospheric restraint, free to go by the short age of two decades by the metal of the Star, for instance, although this recognition of the nature in creation in the Universe is not even saying what kind of learning will occur if the incarnation is bound down by planets, say the atmospheres of Mars or Uranus...unique learning is the vitality of all incarnations and this point is mainly studied in turut ...the Rumor that there are Stars in There. The activities of rote and recall one, can be

provided with an intelligence or entity, so that learning and its foundations can occur, preferences are one of the complex, works to summon up information, quality is abstruse.

agnanga-f of insistence

Annoying, even. Trochi. tale: oh, the force of life is draining and drawing mostly to a close of the necessity to use it now for whatever rapture now that will come of it, then what is this ‘ “force of life’ “, it must be agnanga. I, uh, don’t know but a Homemade Sun would probably qualify for this... not a single Molotov cocktail but maybe a bound sphere of them. This is the fleet image of the item force agnanga: it is a persistency baiting of appeal, recondite and abstruse in its invisibility, has preferences of the indicative of sensation amongst forces mentioned of the searching and finding of entities, works to put any point meant to draw attention independently, quality is of the persistent.

asratarsa- f of bland delight, second level to stellar inspiration, wake familiar to Garstar, gusgi

Appeal of appall, the dark and shining, the doomed and gloaming.trok. tale: what is enjoyment in it’s most inherent engagement in the Star. Spend every Sunday telling tales of the Sun. The glory of bland delight is extended here, preferences are of distinct abstraction, works to put the ‘glory in God’, quality is one of transferred delight.

mutum-f of gripping, of freezing, melting in mold, of tightly holding, or strongly grasping, wakes of foot-like, why gravity is not magnetism. Tale: what spreads the most diverse and profuse use of the number of incarnations one(a single spirit, One) can endure, and the answer is it is the kind of treatment that takes place in mutum. White Hair.

Holder together.trochi. The extreme of the most in holding is held in this force, preferences are of manipulation, works to provide handling, quality is of the held. Not one of the grasping forces, amongst them weldlew and wurbruw and mothom and aljta and afinifa.

mothom-f of secret of holding, the placing wake or mime or mimicry, the Great Sweater

Secret in All Description.trok. tale: surely the most exploration that could be held amongst the most challenging to learning, let us say, with the diversionary immersion in complexity and amplitude of being a human being (I don’t know where that is seated) with the immense amount of

tools necessary to stand that One up is in this secret. Satellite, the Lowest in flight. The more complex in holding, although not the most of, is brought about here, preferences are of distinctly specific to holding, second degree, works to provide secondary reference to holding, quality is of the secret in essence.

quamuaq f of secret of categories, token supreme force(111 steps before L.)

A plural force and a, at least, dual wake. Trok. Tale: what is not used by one incarnation, is used by it's environmentally efficient mannerisms, thus in the incarnation of some sequences of achings in the morning (Dawn) in the elementals of the essence of clay what is not used by said incarnation enduring this will proliferate to various bacteria and fungi. Hidden-in-the-Puzzle Item(s) The force of the esoteric and inclusive, this is also called, and it stands up for most trans-incarnation doings... preferences of the unlimited, works for a many-headed Gost, and quality is oblique.

ropor f of withholding, ultimate mystery

Dares to ask.:which one is Memory. Trochi tale: some force that binds beyond, all comprehension and the means of rote, binding, within scientific reason, life to incarnation, in the moot point Gost.

Huge counterweights or smashing balls. The terms of the mysteries remaining in the presentary phase since the Big Bang are yet to be revealed, preferences are to the unlimited, works to enlighten and choice qualities are enlightening.

relvmer f of religious prevarication, the Memory must have honor!; of the obviating in initial meaning; made decision a long time ago about the Angels, the Ancient Angels and even God of 27 tale: the angels chose this one. Religion is a Memory.

Origin of all known religion. Trochi. The religion is of appeal in this one, preferences are of delight, works to provide delight, and is of the choice quality delightful.

kuysnuk f of first reference, wake probably busy getting initial witness to everything

First referring, to, of, probably an energy object. Trochi.. tale: more important than merem, there is kuysnuk to deal with, and what cannot be saved by vast Memories, say, in a human being, will be saved by the

Envyrunment Fourth in the realm of the zoo ...Echidna. The most important element of being a memory alone, not so seen for being a force as well, the first cue/clue/things>>themes are found here in this hereness; preferences are of the disengaged, works to separate references, quality is one of the specific.

punzlup f of fusion(a stellar secret), this wake is one reason the FFC are so concerned with the FCU(First Creator Universe)  
Secret of the Incarnations. Trok Tale: locked up in Stars, which are what?...huge masses of matter that ended cooking with friction, light and heat to say nothing of how much electricity is in one..is this secret.  
Unmentioned or Unmentionable Sun or Star. The force called fusion is given singular clear reference here in this hereness, and challenge is had of the preferential as to the validity, sealed, of fusion, works to bring all within under the realm of fusion, such as tides; quality of fusion.

atratra f of recognition, wake must possess a tremendous tolerance to excitement, the Most Evenly Tempered One tale: by any other name  
Clear Description of the Sun.

Fame. Trochi. Attention-bearing-deficit-creating, atratra prefers to bring about recognition, works to hang recall, quality is one the Enumerator.

amtramtra f of utter gain, definitely would be a solar power  
Utter gain. Trochia tale : accomplishment Largest Motor Boat. The total gain by All is measured by this one; preferences of the otherwise respected, works to be otherwise respected and quality is of the otherwise in respect.

926.azaza f of mind in respect, a fixator and the Creator of Angels; tale: they will follow each other over this one. Porcupine or pangolin.  
The tamer. Trok. Brings the Mind in, preferences of the finely vague, works to assume positions, quality is one of the punched-through in feedback.

The time has not come about for Precious Salvation in the Time Before the Earth had Seas, but these One Hundred and Thirty Seven memories or mimes can still memorized that Way in today's precious time. The Forces of First Creation just are the cause of cases inevitably a unique

and unbelievably significant group of definitions that have to be accepted, it bears upon me with angelic grief, and I have to tell you so.

The Precious Salvation can still be yours, and I tell you to increase your prayer in the way that the Ancient Angels who Art forthcoming shall have your salvation.

There it is, in the name of Memeri or Dimsid, the complete Sum of

“”music””s, or Mimicries or Mimes or Memories. Or collect in

Mnemosyne, o, Creature, what would not remain in Mimicry.

Fusion and Precious Salvation much clear the temperament.

And the echoic reverberation of Amtramtra, Artmartma, much clears the fusion.

The Win by the Law of Firif, furuf, vuruv, viriv, resounded, is a Growth to the Optimum Advantage. During the Creation of Earth, they (the FFC) woke Everything up to a tremendous level...the Creation of Earth lasted a billion years, and that level of awareness must had it's affect. Among the Creations was a tremendous God-ego of Sol incarnation. Sol incarnation has never lasted more than two decades.

That's it, the complete set of forces you are brought awake by, or the complete set of wakes that you contemplate by, or the complete set of torments you pull apart things symbolically with, or the complete set of mimes of awakening, the complete set of mimicries that Memory is; these that are known as philosifistatics and that you pursue knowledge as such.

Makes for the likely probability of theatre.

Although the tree of all puts people to sleep, the forces do their job and work up a considerable bore and put people to sleep, too...although just incarnations from Planet Earth, which began in Stone...check with

Dimsid if you want to recover from insomnia.

Within the Seven FFC there are six sleeping orbits...this is how the Forces a-wake-n.

Chapter Twenty-Eight

27.

I truly believe in God, without which what are these long attempts at memorizing?...what are these long writs for? Only God clarifies that.

This god is a God of Mars, Science, Effector.

God makes for great Sympathy, which with things>themes>theories>therenesses can be explored.

Here comes the part where he mentions god...they are of the structure selected for. These Gods took a bet a long time ago and dwell by that

name by what made it sacred, the Earth. They do not dwell in the vast outreaches of Outer Space unless pursuing some one.

There are two Gods. Here is this smaller one. Just one pause there, now, does the BoT have logic in it? Well, god, the sound, searches out logic but we will get to it later on.

God makes patience stand. God makes for reserve in patience. God makes for slow expression of ideas.

This god has everything that searches Out Authorities in the Realm, where it exists, whereas as the other god, the one of 27 parts, after this, imposes them.

This god may be relied upon for the Category Authorities.

God makes excitement unpeel in a raw and enthusiastic manner.

These God may be referred to as the insides of any request by prayer to the pure minimum powers of God, simply by writing of it or the encoding remembered for it, the small name of God, in a place or even in a display by artistic means of the name, be it Omerius, Aklara, Azanara or Xenocotl, Wodkekei, for example. This writing can be had to have a separate effect than any rote, and it is of a pleasant effect, and it is also of an enduring effect.

This out-writing has an immediate effect by strongly calling the names in a supplicatory manner.

God has a certain and complex build which He needs satisfied by suggestion, recognizance and memorization.

God makes for Obligated Addressing with the help of Precious Salvation.

When everything might prove so easy, God proves His uniqueness by doing things the hard way...being unprepared to face emergency, yet cautious, anxious, and future-telling will wait the God, but having every way to rush about and bring to Mind solutions when emergency happens, God is innately prepared for the oncoming. He can be thanked for the usualness of His immediacy at any time and He will easily Know.

God is a ramification plurality as a circularity, and upon memorizing Its' singularity, it grows strong in the solutional regime.

God will insure you get it done, whatever it is you will. That is, if you do memorize what is right about God. These two lists bring out things most scientifically right about God, so that when you find the Geometrically Cutting in Death, part Replete in Essence and Precious in Salvation, you will be prepared for Reincarnation. The study of God will however meandering, prepare you for the present into whichever zoological form that you are ready to be Reincarnated by, whether it be stone(clay), virus,

bacteria, extreme-owe-file, plant, fish or animal(bird). The sphere of God is a study of Incarnation.

These God are the test for those who are not distracted by the forces, before; they are the passage for those who are not obsessed with the memories, before; they are the passing, excusing and withering-out for those not contained by the wakes, Mimicries or Mimes.

These God became the Fixation and Fixating of the Ego., made by the judges...not the God-ego of Solar origination.

God has good reasons for one to be enthusiastic about.

God the Finder of Authorities...Vine tendril

Makes the Ego fixated.

This God doesn't make sound and is silent and if you are, it will creep up on you with that volume

it uses as a sense. Once called Mars, now called Kamakuda. Probably exists by Planet Neptune.

The story with it's logic and vines-tendrils continues.

### Chapter Thirty

Scientifically one might wonder why do these things have to go on...what situation of the stars and atoms causes these things...? Is it that when these don't work, this One lightnings or thunders? What routines occur beside awakened and sleep, binding and apportioning? What of the weather, anyhow? Does it seem as if Spirits are peering out of the Gloaming...yes it might...these spirits are called Wurgonna...they regulate the day and dictate every means of tensate and cloud a'crumbling.

The faces are ensconced, bepuzzling, idiot, into the whole drama.

.Of the beings,ayvytyrs, mainstay of minds, and the judges, destroyers.

This consists of some pretty strong complete abstract distractions that are memorable in life's incidents or during life's events, as having contentions not intentions.

These phase out from directions to distractions to a distortion called god by the universe, but not as the unusual, normal ones would have it, called God by the Universe. Memory is many things because of the FFC...and God is the pinnacle of the appreciable of the acceptable in the middle of the many things...this causes a coincidence known as the ego when mind has to deal with having an incarnation...the more defined an incarnation, the more definite an incarnation, the more it has to deal with

having a mind in the facility known as the ego.

These consist in existence of these beings whose names literally occur as sones or sound; these twenty two beings of the group Wurgonna, that occur as distraction and occur as following the qualities of the entity in emanation, and emancipation of self or merely as the individual, at least I will put it that way, of course, what other way am I going to put it.

These also deal with piled-up reincarnations...or sequences of incarnations. They are very presumptuous. They have to deal with their immediacy to preface judgement. They have techniques to do this. Also they divide up the land by egos. The replete essence is given to war or work by two wrinkles, one of the Ego and one of Precious Salvation.

They also tend to whip up and hasten the environment.

A weathering is put forth, as we launch upon Wurgonna.

The first one was a being(created by Agog, primeval force of time) that could travel back through time, or back within time or back against time. It possesses no quality of language, at least none that can be mentioned, and it assists in giant/ midget ways we really don't know about. It has this quality known as worship, or birth, sort of an agape sympathy, or the keeping of worship for another, or the worship of the lovely and/or the lowly. It is a being earlier than God. I called this one Reptune though it might be called Pretune, Advertine, Invertine, Obrelvetine or Pharos, to complete that wordiness. It is really largely unspeakable, unwritten and unknowable.

Travels back in time to sympathize with yourself.

Ahrimaiz

Orizuum

it is id Reptune we praise

as earlier says

968.the second being was a fact called guidance, as addition in simple principle, made to add all up and guide, add it all up and guide us all, and protect this quality of being that is being from all other beings as better by a force of sentiment. The Demonstrator and I made do of the fact this was the third God the First Kreator counted by calling this one God as he, or Genera as she.

This great being is the empty statement in this write.

969.the third being was a fact called charity, or that word coming into spontaneous memory, or the principle of imagining something so that since it is desirable it becomes more and more there. I called this one

Mot, or was told to, because it, Mot, comes about when things are in the effect of their birth, but anyway there is a saying that symbols make the sound that is always the name of the one who is overtly charitable. She is a very strange understanding about the principles of goodness.

One finds charity, the being.

970.the fourth being is a very good fineness of fact who creates a beautiful feeling of society so that all can cooperate in using information they don't all know about in order to find out what it is all about. It has this fact or quality known as memory recall. I gave this one the name Denebola, or said name was drawn from me.

Loosest of the liquids.

971.the fifth being is a being of supreme relaxation and supreme strength to overwhelm all things .What this one knows better than all the rest is how to keep the temper. I called this one Tantrum, because it just so turns out that too much or too little dependency on this one is delusional. It has the quality of equality, or of equation, which is the putting of an abstraction or an objection between two other objections or abstractions so we, or only one, can find out what is needed to know about. He is very great.

Tensate.

972.the sixth being is a being of infinite forgiveness, all full of love and hope and love for all creatures. It has this quality of attendance, a form of enlistment. It is called Orgasmos. She cannot be fought.

Conversation.

973.the seventh one is a fact called peace or by the name of Pacifica, quietly called and used to save time, who knows how to compare and settle some weight of unimagining on all opposites to calm others down. This being defined a quality called exploration, a sleeping focus of a quality that is you just have to try. He, she or it was named to me Pacifica.

An angelic being seen in and around the 11 FFC, which it helped to define.

974.the eighth one is a being that does caretaking for everything that cannot defend itself, whether it is sleeping, young or at a loss. It defined this quality known as reproduction, or the creation from another thing that appears similar. I called this Babalisinos.

Progenitor.

975.the ninth one-is a being of infinite slyness, and infinite goodness and infinite sympathy. It takes small weaknesses and rearranges them or

pulls them away so that others might live in a better way. There is no English name other than slyness of demeanor of dimension it would, or could be called. I called this one Transpara, but get this, for want of a better name. It relies upon clevernesses inherent in the situation to re-establish the method. It has the quality known as subtraction.

Sly.

976. the tenth one is a being that silences everything -that stops all chatter, that stops all unnecessary vibrations to the senses of those that do matter. It, she or he has this quality known as activity, for the utmost necessary reason. I called this one Hatshepsut, to imply it as a crocodile goddess.

Repeated peace.

977. the eleventh one is a being that dominated everything, through humor, to see if they are able to make their own choices for the betterment of everything, or if everyone but this one regresses to a lowness, then what this being uses is this occurrence that is defined as a humor that is kept away. I called this one Machus, or Nachma, for no better name occurred to me. It uses this quality known as emulation.

Great One.

978. the twelfth one is a being that defines a common principle or pattern to all who exist or have certain energies so that they might cooperate for the best reason, and for the betterment of all. It has this quality known as appointment, and I called her Psyche.

Cue/clue.

979. the thirteenth one is a being that defines a fact as all-knowing. This one be the one that records everything. It has this quality known as inactive. I called this one Media. This being is involved in dreams and nightmares.

Recording.

980. the fourteenth one is a being that endures through all storms, be they ever so small in nature, or ever too large to defeat us, almost. It has this quality known as code, or the keeping of a particular sequence to play through. We will call this one Temmenu.

Meaning, deep.

981. the fifteenth one is a being that poses self-destruction before all else so they can know their own limit, or poses god, God, in repetitions and as wearing as possible, as the self-same phase of the list, or so, in case they want to know how they may be causing themselves suffering, they can. Familiar with ego death.

This one is called Scapula.

Culprit-bone, seen around 15 FFC.

982.the sixteenth being is called Eototl, and in principle deals with substitution, or the gradual finding out of things for the betterment of all, as a word.

Charity for concern.

983.the seventeenth being exists as pure faith to get us through all things, and it is good for the purpose of all identities and also for the energies they will control or that these will then control them if they are evil. It has this quality known as invention, or the making of something according to some similarities in knowing, honest. We will call this one Testa.

Hard-seed.

984.the eighteenth one is called Histoire. It exists as beauty, and has a vague stellar feeling to all things that have passed. It has this quality known as body memory.

Delicacy.

985.the nineteenth one is a being possessed by the fact there can be a lesson to be taught all things, no matter what they are, as long as they are something, great and small, that gives up a knowing to all, universal as thing, them or theory. It has this quality known as arrangement, a form of enlistment, as a word. I called this one Cylos, for no particular reason. Lesson, seen around 18 FFC.

986.the twentieth is one of supreme genius, whom is known to share that with, well, just about anyone. It has defined more names of goodness than any other being. It, or he, has a quality so defined as multiplication, though that can become so many more things, in time. Or you can call the most initial reaction in learning. I called this one Inspirus. It is indicative that under Robota, though, that entertainment is multiplicity. Wisest.

987.the twenty first of these beings, one of these beings, was and is who reads all ciphers in order to outwit them for the fact of good. It has this quality I called earlier the word: ignore, when I was trying to get away and through with something involved in this tale Demonstrator was in the act of telling me. Ignore should mean, thus as a word, to really have a mind to never be bothered. I called this one Oovus, or Ovus.

Silenced.

988.the twenty second one was called Anvilium to suggest that quality I find in you. It does projection, or all amplitude or all use of clarity to

create a fact to reach something when in need of help, or in fact, if you really need to have help. It has this quality we so know as suggestion, in a word, as a word, even if words are useless now.

Projector.

These beings preside of the nature of politics, interference and consumption to the extent that one can hardly tell that a mass effect is there.

The vine tendril makes Ego, are looked at, are overlooked, and are germination.

Remaining count:  $145-22=123$

The judges are known the also known names as these are the Avaterm, the Arimbik, these are collected in Akashik these faces of the facets of god called the Anima ... logic later on.....

Their anima egg was taken by the FFC to make an ego, Ego.

They always hold court, and are there for your own self-help.

The reserves put in hesitant and reticulately behavior are brought about by the egos of the judges. Incarnation upon Sol usually makes one egoless after the incarnation evolves...this is because of the judgements of Amalamachagra. Many things are due to Amalamachagra, in fact, it is truly humbling how many things are due to Amalamachagra. Called Amalamachagra not Meshenabek.

.

### 30.Chapter Thirty

A mindless, mind-body measurement of energy, nevertheless.

988.the judges

The more sober you are, the more bringing things>>themes to court will be. If you are free from alcohol and tobacco, a-Court-ing the essence of what you decide needs judging and is all the more easy. The essence of a gathering, intelligences, entities is more easily decided to be more on the growing point with the essence of the universe free from the nonsense of Incarnations than simply a thing>>theme that probably won't exist.

The essence of recognition or recognizance is hereby recognized as part and parcel, pact to Amalamachagra.

The first judge was called Ion.It has this quality known as differentiation, analysis or antithesis, or as a word, spreading.989.

the second judge was called rok or num it has this quality known as experience it defines things as passing, past.990.

the third judge was called Sin. It exists in nothingness, or in all the nothingness it can. It defines a perfection or a goodness known as nobody move, nobody moves and no body moved, with the other half of that perfection being defined as did that identity move for only good reason. It, Sin, defines all recall, reincarnation, retribution and redemption, so it was told. 991.

992.the fourth judge was called Rod, because I wanted to call it that, though it might be the same name we always use, anyhow. It exists in all things to go on out. It has this quality known as timed sequence or patterning, or as pacing, or necessarily, as negative decision or demand. the fifth judge was called Bos...

we interrupt this point called Bos to bring the rest of the story having, exposed yourself to so much, it comes about to occur is that God may be made into a machine...To serve you in dreams and this is one ex machina, this book. 993.the fifth judge was called Bos this one can unbalance all that is not good enough It has this quality known in a phrase known as theory in relation to control, or in words, lesser cleanliness.

994.the sixth judge was called Yag or Lalanoe. It exists as disintegration, to save all in that for the purposes of good, for good. It has this quality known as the unnecessary number, one number unravels all, deliberate mistake, in a word, viral.

995.the seventh one is a judge known as Gog, or Antares. It exist as the certainty of awareness.It has this quality of decision-making.

996.the eighth judge is known as Rel It exists to give good rewards to who is most good, and it has the quality of forcing proof. it gives off this quality of integration, synthesis or leap permutation.

997.the ninth judge is known as Gna, which is this quality known as certainty in creation, or the forthcoming. It, she, has this quality so given off that in the definition of space all that is true can be proved, or anti numerical, or in a word, decision.

998.10the tenth one is Pan of Aldebaran that is. It creates the love of poverty, so that an identity called time might exist for the purpose of it's own dream. It has this quality, given off, of the self-serving, mathematics, such as the magic square, moebius strip or the computer; this can be put as a word, inploration, or as two words, supreme cleanliness.

999.11the eleventh judge is called Twa, or Fomalhaut It deals with group

obsession in any form, whore or hermit, collectivist as a sociologist or occurring as an occasional loner. It is really pleasant to be. It has this quality known as the put together as going apart and never reaching a sum, or as multiplication becoming division but never reaching a sum. A certain facet of the energies is called Twa; Demonstrator says it is the same as a star. Angels own reading rights to Twa.

1000.12 The twelfth judge was called Sam, by me, to mean, brutality in or as patience. It gives off this quality of defining a sum again and again, second sum or difference, sometimes in terms of moving a decimal point.

1001.13. Xhi or icarus It defines necessary sacrifice or fame. It gives off this quality called in a phrase: inspiration, subemotion or subscience, like metaphysics is.

1002.14 The fourteenth judge is called nut It balances contentment and desirability, the unconscious and the conceit of the conscious. It gives off this quality described as reliance on both numbers and symbols, and the fact of description of anyone or another.

1003.15 kem it is defined as the necessary exercise between one dimension and two and three and four of the Star. it has the quality of using a given group of quantities in order to accomplish a purpose in manipulating space, as a phrase: whereas points add up to planes and are divided by lines into folds, and in one word: mind-bend.

1004.16. tyr it is defined as the evident and the evidence It has this quality known as definition of a difference or any specific definition of a sum is part of the solution to the problem or any definition as part of the solution

1005.17. nad also called shaddai like god It brings about storms, why I do not know, but as supposed good in doing so It gives off this tactic, that there might be a frozen physical imperative which causes the initiative to change (physics) whereby this quality is called undeniable.

1006.18 the eighteenth judge or ordinary destroyer is called kia it has this fact known as preserving the force of creation or any force of creation that can exist it has this quality known as anti-originate, or near patterning or near sequencing, inviting although not quite right or which is the mathematics to figure it all out or you as a test once we no longer need the pass and fail, the push and fell or parts and fact

1007.19 min is the essence of frugality it means the essence of frugality it has this quality to exist as the will to bring about the simplest symbolism of numbers or the simplest use of any gathering. The quality of symbolism has as this point whereas what is there is as a collection a

liability a probability

100820lug it is a protection from the stupid it has to mathematics skip theory(is considered this judgement like traditional science of one another :. "self-evident") or the fact that memory does not always occur at the same speed

1009.21zoe or oozlazoom this is the most pure the most clear making greater and greater clarity and the most chaste this judge takes on all the concerns of those who are keeping to their own self it has this quality to work on the knowing of operations such as plus minus divide multiply and further on from that since within this one judgment occurs as the distinct possibility to make more of these operations

1010.22bea or algenubi it is the most ineffable, the one that escapes most of all that is and that will ever be, and that is most unsensed and invisible of things. She, or it, has this quality of reflecting on the symbol for 0, or in a word, antibet.

These judges preside in every manner of courting with the Undefined. The anima-egg and vine-tendrils continue.

Remaining count:123-22=101 remaining files to our book but actually 1230 names of god be in the BoT...1231 if you include the name god. Logic comes about this much later, right after this...

### Chapter Thirty-One

31.

The coming about of dreams in the most vague quality.

chap.31

When one confronts the story knowing it is to be about the creation of Earth in the most implied, inherent, impersonal way, one doesn't do it with a reasonable accomplishmentarian premise...one just is climbing the interpreting to have an idea of what sort of story...the story is encoded in sleep until I can pull it forth...but it doesn't have a compare: rock that I would climb, machine to make a vehicle, book that I would pen; none of these are worth the actual doing of this encoding.

The beginning of Plan-it Earth as a gathering:

the sixty demons and angels and entities that are put forth here:

The demons kept causing trouble with the system of Sleep the Universe had conjured, raising doubt where Nakr was concerned and taking Her dreams of fortune telling and making meek, trembling and ineffectual the dreams of the Incarnations of Old, those strange(well they were estranged) Ones...so the First Creator of the Universe decided to give all

the Demons Paradises so that they would be bound to some good, some concept of good and some conceit of good...maybe he was just tired of using them for a Water Sound Sleep Recording...these ""Paradises"" were or consisted of these Pacts, Phrases that they would memorize, making more clear their individual power.

The previous parts of this and the multitude of figures just within those sections before this happen to have build up(just like they will if you read and then sleep, coming to awake on the First Forces of Creation and then phasing or coming to rest upon the fronds of contemplation whence concerning the avatars and the avaterms before you come to this[there is also some god, God, in there, those initially resist development{has to do with the creation of Earth}]place where there is reference, here, to the Creation of Earth. The seven days of the creation of Earth involve a number each of 31.57... and there is much to be said about Earth. The creation of Earth begins however, at this time when the demons(demonesses) settled in with the patient angels, and two groups, one of 36 and one of 24, to go on about it at great length, of these Imps, forming a third to each pact : they are all counted as one, otherwise the count of this book would be 1231. Despite maybe having other obligations in the Universe, the evilest of all demons gathered around Earth to claim their forensic fixation a form of incarnation; having fooled many a spirit they ended up falling into the forming Earth.

I say they are evilest because they are; well, you the reader could ask , ""Why bother with them, for they are hopeless with evil?""... it is not like that, the very most ancient forces of infamy, they are perfectly responsible in their evil, and own in with angels in servicing it. The FFC(Forces of First Creation) and the beings as well as God, Genera, Wurgonna, and the judges(Amalamachagra) all make (biological) people sleep, as well as do the Demons that Dwell Below, and in fact Coma is to be risked, there is so much causing of sleep going on. The truth of the evilest is in fact a mystery, and a far out beacon for the sleeping innocent soul, who would use this mystery to scry out dangers. The truth of them being evil is such that no one will pay any attention...affairs of wealth and recycling are of such great repute, surely they have produced a source of pure evil, but it is not that, unless we are willing to admit that...anyways, such is the reckoning of their infamous lives that they are also names of God. They bring an evil of remarkable maturity to ""Earth"", a new substance since 5 billion years ago.

The demons that dwell below are fantastical, specializing in crop circles,

the return of children's toys, the glorification of awakening, the centering in living, the life of animals in inhospitable environments, occasional reincarnations to the Sun...in the Sun...though usually such a reincarnation burns out, also, they specialize in seances and precious gem stones; the instincts around taste are gathered at the senses by them, colors are studied for wear, and "insects" of attention are gathered around the pictorial or around depths of sound, in the case of the blind... .. The cases of what they do goes on and on, for they are to blame for fossils, and to blame for clean water on a salty globe, and to blame for all manner of meeting, aggrandizing and human societies. They specialize in remembering, and reminders by them are especially optic, vocal and self-centering. A mystery of abandonment, recollection and misplaced taxation grows from them. They have bound down the betting force (Echidna), and cooperate in every manner of corruption, misalignment and debasement, but the admittance to demons by the law of possession by modern-day psychiatry would be comforting. They specialize in every manner of self-witness. They reserve to evil all manner of activity, and not one day goes by without complaint about them, but they are concerned with long life, morals, and vicarious Existence. Complaints can be had, but will cause Earthquakes, so everybody knows to tread lightly concerning them. However, without complaints, just as a starting place to add those up, the demons can be particularly obnoxious with nightmares...it all depends on what demons you mean.

Excuses will be had, and the Demons That Dwell Below are to be forgiven by most who live on Earth, if only because they make it good for frogs and toads to live there, too. They have tried to raise as many creatures as possible, and to commit fantastic work into reincarnation by Sol (the Sun) for the Dead, which is often impossible. They have a merger with the Creation of other creatures with Imps or karmas, that follow Logos.

They Made a Vast Plan(due and doomed to evolve), to make a center of living. This Centre of Living is the harbinger of all Manner of New Law and New Protocol, and will bring about Sudden Adventure Pattern Platforms of all manner of capitalism and capitalization.

This center of living was the Earth, by the Moon, between Mars and Venus, like father and mother. They go about making pacts that infer each one of these demons off with an angelic compatriot and then one of the karmas. The memories of the dead are disguised away in these bindings(Pacts).

The Tree of All put everyone asleep and everything came about with everybody...the universe demanded substance It could inhabit for all, and all the Angels and Demons, whose main positive point happened to be Long Life, put it together for them. In the long run of a story so tremendous there is no time for it here, the Earth formed and coalesced with and went unhinging around the Moon. It finally settled into a burning ball of water.

There was much demand for Incarnation and Re-Incarnation among the residents of the Universe at this time, who centered their time around this ball of Glory, Earth.

The harmonic as Any sequence of color in incarnated at some time like here, the time these conceptual fore-puts refers to.

To make a long story short this demand to inhabit a lot of substance tended to make minerals diverse, and Earth was a fruitful place. The minerals inhabited a rainbow of colors and were both clear and opaque. They know the age of Earth from a piece of blue zircon found in Australia, it is four billion years. That makes these demons(demonesses)damned old, I would add, I wouldn't want to mess with them.

The First Creator of the Universe rules over demons with His(Her) demon Kalidirtgod...also known as Isitipraise, another word for prayer. The truth is this demon may involve some interaction with subatomic programming, known Universe-wide as Systema. Sudden Adventure Pattern Platforms that are noteworthy of this demon's doing include Behavior and Temptation in History.

The largest region of dark matter, Hell, is inhabited by the Demons that dwell below...people, spirits, the dead and those who have become egoless over the centuries, and Imps, all belong to a large group called the necropopuli, centering around Urania and Echo(aeon), amongst others. The necropopuli of Heaven and Hell consists of some vital memorial energies that can plug up the Void, for snorers of Heaven, these are curious cue/clues. More for snorers of Heaven, which is the apparent cause, with all its mish-mashed, level-seeking, digestive level replacing, reassorting and regaining groaning going on, for Hell, um, apparently snoring plugs up the Void and here is more: Following these energies consists of finding Precious Precocious Liabilities in History and making Law. The Law of Firif, Furuf, pulled or gleaned from the Forces' awe inspiring attentioning for registration of awareness, consists of all sorts of chemistry, with Gateway Drugs, one of 700 enzymes, being a significant use of this same Space, with a lot of the Sakr point Deka(dela)

contributing a lot to these Sudden Adventure Pattern Platforms, the explorative on creating language as an underpinning for interest...but they are still affected by demons...and Angels, as concerns History. Demons, it seems, are an awesomely tiresome thing. Refer also to Malam in want for the digestive and snoring being Hell.

The echo-sphere and etka-sphere both contribute to your vine-tendrill... and your consequent anima-egg.

Life is born upon the Seas of Earth with the vine-tendrill and anima-egg. The Question of Time remains didst these same vine-tendrills become extreme-owe-files? My hypothesis is that the earliest forms of life, Archaea, were created by Demons, an annoying and persistent intuition on my part for the relevance of the placement of life.

The ogle-sphere will definitely find it's way out of this Hell, no matter how many heavens you stack on top of it. These demons are also known as the wargods, what with their manner of working inspiration.

Demons haunt the shadow and shortening-parse the breath, playing for extinction a final gall. They permanently bind up the unappreciative and unapologetic short-lived young one and add the contempt of ever widening wakes to the aged. They are responsible for all spiritual bindings and make a big deal, a big to-do and a grand affair of it, only losing the lease to angels if personally threatened, largely lugubriously held in in-depth focus or moved in the owing range through the ever-most unappealing and tiresome graces of madness.

You can fight demons if you add age to experience to enthusiasm, all three and work most on it. Fighting your demons helps you to become a more secure and mostly brave person. You never heard of fighting your angels, but this has to be done too, to remember God has 1231 masks and name-words and definition-validities to deal with. I say, dear Demonstrator, one form of god, god is only a name for something else. Demons are a security basically. That is what they are familiar with. They keep promise as best they can. The expectancy is high for their deeds. They are a security in the extremes of evil, mocking loathesome luxury, whatever that is.

They feed upon success in the afterlife...undoing often, their deadly deeds to espy or scry an atmosphere of hope from the ungodly lowly. The reasons for this are a complex process of infame...when dealing with a Complex Process of Infame one has to consider all sorts of things get messed up, churred through and the addresser of the language can get messed up with what is most comfortable in the case of the dead...allow

it that this provided immense tokenization to the facts of evil, evil. It is like this, the immensity of history shall be yours, considering the Dead, if you can do one thing, avoid Demons...peel back by extreme recognition and accurate counting interpretation the witness of communicative intelligence and decide no deadly intelligence will be speaking for the Dead...usually they, the Dead, don't speak, they await salvation from their reproduction, image and form, You, by being divided up by angels. The efforts of History shall be yours, if you can do one thing, avoid Demons, who keep thrall over the Dead. Angels prefer the intelligence of entities that were of the personal state of posturing for investigation, intrigue and curiosity.....this is only the lists that spit off this listing book, the thereby so-called Sva Talat...if they can do all these things, you will have a culture...do they have a culture here?...No!, they have a boiling pot and hell with the lid off! Those are the seven stages of what must be avoided and attained eventually in Drug, Demon and Man of the Seven Forces of First Creation, about near keeping me awake. Drug, Demon and Man, a view of life, from the demon Sinistortus.

These are demons, angels and karmas or Imps(beings in principle). Take their advice or bit of wisdom, seriously, as a pact between the two, and three. Of pain as awake-ness in awareness, and of many angels who got mislaid in the Bible.

The guidance is hard to place, but these vilest demons need sympathy...not these other 11 things...used for attentioning.:

- 2.respect
- 3.friendliness
- 4.effervescence
- 5.patience
- 6.association
- 7.acuteness
- 8.perspective

11. How stained in stigma they become and how laced up in dogma are

these headless ones

12.these low-cal. Demons aq

The refreshment from rote, that is all there is.

I inject more trash:

'The demons did what? Started at some diamond, and began making life out of little parts. Well, it is flying airplanes out there now, all for the benefit of some tobacco preserved in alcohol...all to make one puke when one doesn't want to remember how much that hemp mutated by radioactive elements: marijuana;... jimsonweed, ibogaine and mate come clean when future dwellers feel so contented with how they've confronted science, the Big One.'- to quote myself

'What if the code to all of this is syfr, not temmenu, hmmm, like a warm cup of indigenous coffee, impossible to the taste to decipher.'-f\*ck

Demonstrator already to quote Him

At any rate, drawing information out of oneself and drawing up the spiritual aren't too different if I so want to say...if I do want to say, but maybe I get the feeling of sort of being pushed by artificial intelligence. The demons have within the domain to presume and draw conclusion the same way as I have to confront familiars and Incarnations.

The Gurgles...:

At any rate, angels are seen as something real...this couldn't be further from the truth, where anything angelic is known as acts of charity, optional sponsorship or according funding. The attempt to know angels as real shall be given the name, Ultra-Patronization, hereby.

In which Angels keep hard won advice as writs of wisdom, as they sit by Neptune waiting to cause nightmares which are unspeakable, but necessary.

The Ancient Angels are these, and they highly value memorization of the FFC.

They express their weaknesses and strengths in Gurgles of Wisdom.

They abide by these bits of wisdom, and make right immense effort, of any sort. Of course, it takes effort of all sorts to form a law, with Sudden Adventure Pattern Platforms and Cue/Clues of all sorts, in Space, of Long Writ.

This Long Writ is already true.

They don't take well in their wisdom being crossed.

The angels can known as real from their writing in an act of Ultra-

Patronization. Their wisdom is put down, made to copy or otherwise enticed to an act of rote(usually some tool is made for memorizing, or for mnemonics); it is compared, ruthlessly, to all manner and form of wisdom that can be found to make compare. This is a single phrase, yes, how does it compare? It is found to be a single one phrase, and put to the search as to whence its origin, where questioning is engaged, produced or laid as to who or how it originated. It is assembled with premonition. The phrase is seen as something threatening or foreboding.

The ego, or The Ego, made by the Forces of First Creation, and Fixated upon by the twin Science Gods, is held above the Earth as all important, whereas death consists of divine will as language, the ego as ghost, and the morals as the next re-Incarnation, and this attracts with bother our Ancient Angels, ancestors of all minds.

The angels assembled with premonition upon the vine-tendrils of The Ego, and bound it down and pulled it away, pulling all manner of substance consequently to a sea, resultantly. Toward today, 'tis' jealous the winds that so sparsely and squeakily engrave the weighty response of the ego...till it weighs out and falls away, bringing a new sight, of the new Earth, today, at the far end of starts of the place called Earth.- in the name of the force murdrum, what have we here, the victory of the Angels at the beginning of Earth...

As I imagine it, an immense Ego binds in Earth. This, or these immense egos of the gaseous incarnations of later of Stone, trees, cacti, bromeliads and viruses and bacteria, first just the lava heated sea and of extreme-owe-files, or of Metal Incarnations, this immense Ego collapses, dragging down the God who made, reproducing in its Ego-death to many smaller egos...breaking repeatedly to smaller terms of egos.

These Angels, ancient of All, discovered the Angels with the Sixty Demons that Dwell Below, to have made out on their pacts with those karmas, logos and crew, the lot of Imps, and in crude order, assembled the Sky in Disorder and made therein the Earth and bound Them in it. That where this Story gets it's tale, which is the best I can say for it, considering the various emergencies of said Demonstrator, the best that can be said...!!

They then took off to the Outer Two Planets, where they can be found today.

They bound up themselves into the Outer Planets, and put two Gods at that limit, too...to define a Mentally Healthy Sphere for the Denizens of Earth, near the Moon, and Venus, and Mars, with there indicator planet

for the emotions being Mercury...

The Angels are always there with demands for proper communication, etheric restraint, the lonely haunts of species distractions, and personal communicative judgement. They work their way into every life that is born, apparently because they have something to do with Incarnation. They put two and two together, to have as one thing: etheric life summation and it's public echo. They have worked their way into proper communicative judgement, just so they stand between us, humanity, and all that lies beyond, in the twilit realm of the First Creator of the Universe. Such Harbringers of Justice lit up the Celeste with a most magnificent Display of Glory, seen on that Day and beyond, of beautiful green auroras. They declared Neptune Mental Asylum of the Universe, to contrast it with the Prison Hell Earth.

They haunt out Uranus, Planet Herschel, as a retirement home for old Gods.

And Jupiter is death for these works most alive in the Realm of the First Creator of the Universe, and Saturn is death for such as contributed to the Realm of the Rest of the Creators in the Universe.

The vine-tendrils have gained new life, as I suppose the expression will so hold for...they've completed the recognition phase of reading, and now are using identity to soothe their torment.

The incarnations early on tended to worship and endure of themselves Sol, or the Sun. The incarnation would last only two decades and then they would end up Dead, or building Saturn and Jupiter moons as the resultant cast away(Not an incarnation).

The incarnation of communication is without indirect salvation, in this, thankfully.

The time has come to talk about salvation. Salvation is the act of being saved. Precious Salvation will mean here the act of choosing in salvation which choices to better make more efficient the efficacy of the salvation. Well, they created Earth so estimating up their heels with these acts of Precious Salvation, and so much so was the cumulative helpful affect, that I would have you estimate your memory for the memorization of these lists as amplified, strengthened, and thinned out yet getting better grip, resistance, and all-over fixation by the power, all quadrupled and everything, of Precious Salvation.

The Return of Their Adaption to Neptunian Mentality Assistances was brought by having an inherent Taxable Contributing and Participating Factor in the Factory of the Repeat of Precious Salvation. Precious

Salvation is an ideal interlude to the ease in Force Magnification in Memory, the Memorable and Memories of the Memorial and their memorandum. By choosing what memories to have a care in Precious Salvation, one weeds out a lot of the chaff...if you are willing to believe and are willing to circumvent a lot of the memory processes for only these most efficient, Precious Salvation may be the cure for you...it has the tendency to clear a Sudden Adventure Pattern Platform to the most efficient Pixellated Platform...and other such things of magnification, collection and instrumentation.

All about the binding of Memory and these angelic tricks ought to do it. The ancient most angels are valuable for their perspective...the only learned know that with time to pass, and time to sacrifice, they must have increased the Incarnation life limit a hundredfold in the Incarnations of Sol, to bring about Earth the Living. Nothing much more is known of the longer lived Incarnations of Sol, the Sun, Star of our Solar System. The Universe maybe rang from metal Incarnation in the early days of Earth's Creation...the days ran into months and those into years...a million centuries and They were Over for metal incarnation. Metal incarnation, What in the name of xakfax? A half of million lifetimes. The realm of meta-I incarnation shall not be due the least Ultra-Patronization. These Angels direct dreams, watching your reaction as they make plays upon your hopes and fears, strengthening in bravado you in Pneum, Primirp , force of recovery, or Anahata. These angels are capable of bringing the free out of the usually waiting to be paid. These angels are capable of the tautness of any very, very strong dream.

Demons also consume themes in dreams.

The position the body goes through when gaining the writs of wisdom is indicative of leaving the Spirit wrapped in the energy-electronic-physiological-system open for learning from the Echo-sphere, Etkasphere, Ogle-Sphere, Aestraeusssium, or other area, such as Heaven. I say, Demonstrator doesn't agree, with this being an example of active memory.

Remaining count 41.

This is:

The gurgles of wisdom

Of the First Angels of the Universe

At the end of every statement is statement about this book that I have included despite Demonstrator telling this story.

1.The desired is ignored when it is not read.

Unsympathetic genius...cruel was the season and the winter was hard for the hard-pressed who tolerated it at large. Long were the streets, the streets that you crawl. Hard was your effort.Reading took place mnemonically later. valsyalvya-angel of this effect:effort, an angel who is small about physics, but is a Creator of Storms...this one, angel, is all involved in the effort.

An immense attempt is made at having a Universe...because I know that it will be alright in that Earth is another universe.

2.Serious pays solution...but why pay anything at all.

If not of the nakromokon then why your religion. Religion is good...the reason chimpanzee were supposed to be sacrificial by Roman, killed each one to a meaning, ere they were considered immature in behavior we don't need amongst men... i found this story someplace in a lesser state of conciousness or sold it as if I was dreaming it. And the first kreator wacked a book into my head to suggest a repeat though reincarnation, metempsychosis or the worship of waste. dispercola-angel of past rich, solves all residing past issues; shows His age, a distinctive one for nostalgia...

But the Universe, Stars, Beings, judges, Demons and angels...points are too old for a Universe and they have to make do. Origin is more complex than we have the chance to give for it.

3.Balance the touch of senses.

The rook of remembering is the call of touch of mention. Truth is the construction of things.remander-angel of the immediate right, rights to do things are His specialty, an angel of Simple Wonderment The most influential angel of immediate, upraised force...

They decide to make life on Earth, to read this book...they settle for an ape, or rather a scrubby squirrel...it evolves into a Man. Mistake the False Appearance of Evolution for something it is not.

4.False to tone the words; appreciate this falseness, it will have more

secrecy..

spectre- a. of the future or off the one beyond present, stands by the Way of the future...a ghost of an angel

Wisdom is one form of mnemonic, the entire history of speech interpretation a massive amount of forms of mnemonics. Voicing of the Creator of Man, himself.

5.Honesty has of a self more than it rests; it goes into a body more. demonstrator-a. of this reading in writing, a Demonstrator .. Demonstrator is like an insect ghost, batting around constantly, assigning this or that; He is really admirable, if it is all the same. Demonstrator pours out things, by their applied principle, to what are their constituents...

You tell this tale, but what am I'l''l''(l)[l]{l} supposed to do about it? Wander off, and get lost.

6.Honesty much prevails in freeing solutions.

6mozumias angel against distraction, very peaceful angel. The last reckoner...

That is the whole tail, a moronically and inanely simple fragment compared to how monumental it truly is. Suspense of voice, only to be compared to recording.

7(1077).... Honesty makes of clarity in sanity it's upper limit in prevalence.

7hurcheria

of heaving and heaviness or is secret beyond that, an angel of effort, the memorization of sounds of effort or exclamation is it's forte' Hurcheria lives in a veil of illusions, so you will want physically nagging memories to pile up, before meeting Him...

There must be some way to preserve things. Experience will tell.

8.Freedom is not reflection but instead, a staining.

paragong-the Angel whoso saves the most exotic and extraordinary... stunning is the witness and appeal of Paragong

Man strives to have things as they please. Wilderness.

9.Freedom is for liberty but not so serious as to kill the patience.

59sakrent the business-like angel, Going about the usual brings Him around...

Much can be done with leisure and mnemonics (the making of lists to benefit the memory) Try but try for having Was Of Some Nature.

10.Freedom is an old saw, and may have no self, liberty no trust, but braveness would have this freedom.

harporata the clown angel of riches, known to save many unique specimens, there is such as a clown angel...

The bindings of our lives sometimes deserve re-defining. Be-wilded.

11.Freedom is courage over the hypocrisy in truth.

halthotha the imitator of god angel, A bitter, opalescent white, soprano angel, the end invention is fighting as to what are our definitions of invention...an honest angel

The richness of our lives is brought about by freedom. Freedom is uncovered.

12.Freedom has less tension than sanity, it is glued less together.

tizhi-tiu a. of unclear, vague,compromising This is the First Angel in the Universe. The first Angel ever identified and named.

The first holds through the present. Freedom is covered.

13.Freedom is the sensing out, liberty the working out.

13hermapthsao angel of extra clear, a transparent angel, Specializes in the memory of words

Liberty is the long end of it. Freedom is the massive conclusion of many conclusions in minutiae.

14.Sin is the least want in sanity.

halmalia angel of long trips, number one in reliance Angel long in effort

Guilt is a powerful tourniquet . Sin.

15.Sanity is to respect what the usual resting are to collection.

15lulrespendtha angel of glows, refuses to conform, Angel of a comforting glow

Rest there they do; by Earth. Sanity is held in respect.

16.Sanity is not the gleam of the rich, only the gleam of the want or the work.

16augmentha angel of angles, goes every challenge in salvation, deals with filing angels by their distractions, which are as alike to their definitions...

Mnemonics is the key to unlocking what in exercise we find in life. Talking about gleams of sanity.

17.Sanity is the defining to have perspective and much later perception.

17barelchireroptawa angel of heavy disregard, tries to pull the limit of salvation, a Medieval Angel

To read this book is to improve upon the optic. Suspense has many meanings.

18.Sanity is not the money to buy the witness or the witness to spend but sanity is considered less than freedom because it is not.

1088 Azathotha angel of time being worn, a sarcastic angel; oh, the praises this angel can reap in, if quoted vocally

To read this book is to improve the mind. Lives have added up to wisdom.

19.For sanity to be clever it has to originate from risk.

19sarchryppe, sarstripa angel of humor, an early Angel

To read this book is to improve upon the humor. Sanity is clever, at least at clever as a turning off.

20.There is no sanity more honestly than honesty without being sacrificed sanity.

20melhippothyne angel of customs, stops those who lug through themes, enjoys sticking to routines and would appreciate it if you would too...

To read this book is to improve upon the honesty. Too get Too Fat may be a quality of the Universe.

21.Freedom is trusted to hold genuineness together more than honesty or bravado.

1saradarvastarfa angel of survival triggers, number one in emergencies, quite a thriller

This book constitutes a part of the Universe. It is glued together beyond a seam.

22.Seriousness begets respect.

2acclamator angel of release, familiar one; of the Memories in Recognizance, I do praise upon Acclamator, one of the letting go

This book has serious things about the universe. Reflections upon Hera.

23.Liberty challenges the stable, often bringing a lesser stability.

3orijelustov angel of delights, memorable one, instinctual one

Man is a stable animal. Life is made of elements.

24.Freedom is for liberty and youth with charity a clarity of freedom and liberty, bringing to the fooling charitable youth.

4belrimphage angel of science the crude, offers hope, contemplation of most complex in the mundane...

Mnemonics is for the aging. Patient is immediate life and it dies from therapy.

25.Brevity is not first, braveness is.

Lost braveness.5examator angel of revealing, very exact law drives this one, if you concentrate very hard and very long, you know this angel: Examotor, angel of the wear of the Tough upon Nothing, helps people pass lessons

Man will take care of this book, the Sva talat the Book of Trochia. A very old patience constitutes bravado-innuendo.

26.The power of recognition is the want in faith of hope in love itself; it is the gleam of the law.

6lusidis angel of want, works with suggestion, bound around an immediate desire

Recognition is a minute form of memory, or of the Mimicries. Hope and love shines from behind all in any mention of the First Creation.

27.The gleam of the law decides the power of the interpreter, forever.

7isidis a. of terrible boredom, He works to contact people who are lost, of a vast temperament .

A squirrel is the beginning of the reading of the Book of Trochia. The Law is of Earth, not Yet Of Space.

28.One small space is judgement, one vast space the judged.

8adara angel of infants, a small angel, gain says preciousness of youth

All of richness is but judgement. The Mountain of the Question is yet to be climbed.

29.The brilliant of all the Universe knows they must be prepared to be a reader.

Keep trying.9expionsa angel of waiting, has a tremendous temper, will always be there, it is rumored

The reading of this massive tract is slow. The brilliance fades into Hell.

30.Variety made merciless multiplicity and brought freedom to restriction.  
You have to memorize every list in this book to get anything out of this life  
that is put in it Recognition is put through that saying, as a lot of stuff is  
put through recognition...this is a truly mysterious angel isideuce angel of  
two weapons, a. of vine-tendrils 1100, a. Of Ego-onic facility

Plenty of things are being done for this book. One Mind, One Incarnation,  
the many-armed Gost, has roots.

31.Mystery is estranged, stranded, stained but not secrecy  
11velgramotr angel of surfaces, takes care of the dead, restrains worries

Plenty of actions are being done for this book. Secrecy may be a hidden  
element of the First Creation.

32.Integrity is not sanity  
... the govt is comparing your brain to an egg, and you are fully to blame  
for not making this egg12neylabyte angel of incarnate secrets, makes  
enough mystery so that people dream when asleep; makes for all  
incarnate secrets, including "Mesmer"ism. Maybe male, maybe female.  
Instantly arms people, very young people

Plenty of successions are being done for this book, and their succeeding  
will be provided some firm and stable connection despite wholly anything  
to do with this book. A time came to speak of Echo Aeon.

33.Validity, integrity and temerity are all you need but then you get  
necessity.  
oubtagon angel of political mercy, number one spectacle of purgatory...  
uses device of its smallness

There was need for this book. Science will reveal the First Creation.

34.Preciousness and selection are the last to be gathered  
13cosmotaj angel of spreading, massive sympathy can be had by reciting  
this one's name, deals with realms

Man is no ape.Evolution is more precious than definitions.

35.The fineness of carriage risks awkwardness in the slant brought to  
perception concerning whether reading is moving.

The use of wisdom as a word is likened to picking up miniscule parts  
14aliotype an. of due warning and ang. Of exercise Mostly female in

Nature.Spanner of the Soul.

Flying, crawling and climbing are some of the ways to explore Earth. The passage-machine may be the ultimate machine.

36.Comparison of wait brings difference in wisdom

haha15obresias angel of elaboration of the simple, an explainer, cannot keep itself contained

The Earth is vast, but earth is not this book. Radiance and it's breath, tides, bring thunder and lightning.

37.Waiting may allow a difference; the difference is known as time\_sense; time-sense is of the fail\_sense ...the one is to gather origins within selecting in that sense that makes less sense

16dicterna angel to dominate reference versus emergency, prized among victims, a very Important Angel

This book tells, in some way, namely primarily more importantly through lists, about the Creation of Earth. Waiting can be had.

38.The befuddler is not the bedazzler

17psioppe angel of hope and no love, dangerous angel, a speedy angel

The energy will return the universe, Universe. Word definition is a thing of challenge.

39.Wisdom is the milk of need; the road of the teeth of envy and thus chewing makes the arc of weather of change

18teleminterme angel of communication, can tend to sensory delusion 'I wish She was more Clear about what is to be done with this book', Understander

This book is to be kept around. Wisdoms must be tried for.

40.Fashion is a pain.

So is impact, division and puncture. Cassiopeia-of acquiring ruse, traditional astronomical angel Another female angel. A tactical angel

To your memory, freedom shall manifest. The artificial is already out of date.

41.Fashion is a pain that cannot sustain the change of a Universe.

Most fashion is taken care as quickly as possible. Lusaj, angel of denominating(I bet you never heard of that?); looks for hard to cure subjects...a categorizing sight to behold

Having a Universe consists of knowing what constitutes a universe. Trial was a part of error and at least this phrase risks extinction.

Fundamentally, the BoT explores the Creation of Life, just not the Creation of Biological life...I hope that the idea of certain organic molecules being formed as part of the subatomic plants of the First Creator of the Universe is conveyed.

Isitipraise to that final list, a list of angels wise phrases...would the first creator of creation of the Universe so accept my plea-folding. Fold I isitipraise.

Listmaking like mountain climbing is the religious practice of try and try again until you have it right

I looked to Demonstrator and then away, and from him no more, and then I looked to a cat on the floor: the cat was thinking, "Why must you do that with your mind?", I know it was because it said so...I replied, 'I do it because I will end up with a higher state of ego-death' and Demonstrator chimed in, "No, you do it because you are told to".

I put up all these words of 1111 or 1231 Gods-Names here in lists for the finding of, but I can't help wondering if the point of it should be 'tabu-forbidden'.

The fantastic thing is the human brain, it has an estimated 1 terabyte to 2 and a half petabytes in memory, and it's ability with rote is surprisingly excellent to define things a second time, but there is also meaningful learning, and associative and active learning, like Merem, in telling tales, or NajaShaka, tsroforst, in surviving abandonment in hospitals...the most realistic association for memory, is, sadly, however, shared blame, not rote...forstof allows me to clearly see this.

The fantastic thing is human beings ...look at what they have for purified, pure genuine ujtru force of study they have studied through incarnations and wore right through at Sakr101 and were reincarnated, split off from earlier memories in Alma, Alta or olmo olto

Before all of that inspiration is used, it helps to say human beings went

on, fulfilled in the fruitfulness of the harshness of nature.

They couldn't do what flanalf did, rename Himself 137 times these names are given here: flaxalf, chartrach, krastsark, flatalf, vanav, fataf, flathalf, churdruch, chirdrich, chadach, kraxark, krystsyrk,<sup>12</sup> ,fitif, voonoov, chourdrouch, sourdrous, fleeteelf, flouthoulf, kraastsaark, flinilf, flunulf, flonolf, fomof, foomoof, funuf, ssordross, fleeneelf, feemeef, flowmwolf, shurtrush, kurtruk, kortrok,<sup>32</sup> vaanaav, prastsarp, trapsart, footoof, fyutuyf (fyootough), vayiniyav, flayamananamayalf, krostsork, kreteketerk, futuf, krotork, filmlif, vyieneiyv, flayalf, fladalf, flabalf, flibrilf, flibilf, fladsralf, dsraffarsd, fietief, flaothaolf, kourtrouk, fatalataf, fetalatif, vemanalalanamev, flefelf, flagalf, flugulf, flogolf,<sup>62</sup> flougoulf, sardras, flahalf, flopolf, flujulf, flojolf, saardraas, vayithiyav, vaythyav, faathaaf, vonov,<sup>73</sup> vomitimov, mitim, mutum, muatuam, muajuam, maathaam, murthrum, melem, meleelem, metitem, vitiv, rastsard, sortros, viynyiv, flokolf, pusimathamisup, chaytrakartyach, chatteracharettach,<sup>91</sup> kucheracharechuk, valtav, shartrash, shafttrash, hogloh, hothoh, hogroh, honotatonoh, flawmwalf,<sup>100</sup> talmlat, waltmtlaw, warthogothraw, fetusutef, fetalposhtoplatef, flowerewolf, werew(a prize name), verthrev, flakalf, flalalf, flalalalf, fraaloolaarf, flamalf, flapalf, flepelf, flagalf, flikilf, fliquilf, flaralf,<sup>119</sup> fortraartrof, vooltloov, evolova', faamaaf, zoomooz, zoordooz, zoolgthlooz, flooroolf, kritirk,<sup>128</sup> chshirtrishch, vanasmemerememsanav, vanasnmemnsanav, fluuzuulf, flailblailf, vuljluv, flaxralf, tulblut, waltlaw, =137

This has proved useful in taking care of any extensor we zoology may have, any tree, any vine, any whale, any crow and anything like a centipede just mowing about...as such flanalf is both a deep and shallowing source of mystery.

“Why must you do that with your mind”-my reply would be various things, alma of the 9 FFC has divided me off that way from my incarnation-sequenced lineage...azaza must have made a pact with me, and I have worn through things with rote, so that my mind made of this stack: memory, rote, comprehension, prerogatives, individuation, duality and then in that duality duplicity, to which whit double-dealing has provided me with that memory - remainder...or I have had ego-deaths in Scapula, self-destruction, the fifteenth one of the beings Wurgonna...this shows how strong my impression of a cat-ghost are with me writing about it so much.

The story of Trochia the First Book of goes, without exception, through a long bore mentioning the points of Sleep in Seven Hundred and Eighty Nine Words through to a collection of forces, wakes, torments of mimes, Philosifistatics of Mimicry, or Memories with memeri defined as the quality memory(this one, Merem, tells tales; it's tale of this is that names and definology are simply repositioned so that 1231 equaleth 1111)and these play out or conclude, I mean specifically, at Two Gods, some Beings(Wurgonna) and Some Judges(Amalamachagra)...what happens after these 46(Forty-Six): the Book goes on with three for one with the Angels who have Bonded by Pacts with the Demons(who Dwell Below) and karmas (Imps) in an area of the Book where there is a Creation of Earth. After that the Ancientmost Angels show their wisdom.

The story of Trochia is patent by eye, and by digital as well as paper(analog)write, and patent as well by rote, containing 789 points, 137 forces, 2 Gods, 22 Beings, 22 Judges, 180 names in the Creation of Earth, and 41 'Gurgles' of Wisdom, and has upon the ability to raise rote for memorization, and has upon the treatise the ability to bring a whole comprehension of the Least Bang's glowering topmost Aurae to the heavens and to survey it's belonging to to a mini-fancy of All Power, all property of you the reader, and you are expected to haunt this with maturity, both neither taking lenience to distribute rote, or at least distributing it in an associative complex of the dictates of needful Firifian suggestion and an active party to imagined death, unconscious imagination, automatic authority, memory, language, however complex and in uniqueness, by your own patent. On repeated readings, you will learn, it is not for some cat-ghost.

And now
